

News Release

ATHENE HOLDING LTD. REPORTS SECOND QUARTER 2018 RESULTS

Q2 net income of \$264 million

Q2 adjusted operating income of \$290 million

Q2 ROE of 12.3%, Q2 Retirement Services adjusted operating ROE of 19.8%

Q2 total new organic and inorganic deposits of \$21.8 billion

Q2 record retail deposits of \$2.0 billion

Total investments, including related parties, increased 25% year-over-year to \$98.7 billion

PEMBROKE, Bermuda – August 2, 2018 – Athene Holding Ltd. ("Athene") (NYSE: ATH), a leading provider of retirement savings products, today announced financial results for the second quarter 2018.

Net income for the second quarter 2018 was \$264 million, or \$1.33 per diluted Class A share ("diluted share"), compared to net income for the second quarter 2017 of \$326 million, or \$1.65 per diluted share.

Adjusted operating income¹ for the second quarter 2018 was \$290 million, or \$1.48 per adjusted operating share, compared to adjusted operating income for the second quarter 2017 of \$280 million, or \$1.43 per adjusted operating share.

"Our strong second quarter results continued our track record of producing consistently growing earnings and high ROEs," said Jim Belardi, CEO of Athene. "We sourced \$2.7 billion of organic deposits, driven by record retail sales of \$2.0 billion. Our multi-channel distribution platform allows us to prioritize channels where we meet our mid-teens return targets and is consistent with our opportunistic business model. On June 1 we closed the Voya reinsurance transaction bringing our total invested asset portfolio to approximately \$100 billion, a remarkable achievement for a nine-year-old company."

"We have powerful organic growth engines and our inorganic pipeline is as robust as I've ever seen. We are extraordinarily well positioned as a solutions provider to the financial services industry as it accelerates its restructuring," Mr. Belardi continued.

¹This news release references certain Non-GAAP measures. See *Non-GAAP Measures* for additional discussion.

Other Highlights

- Book value per share increased 2% year-over-year to \$43.10; adjusted book value per share increased 18% to \$42.60
- Total invested assets, excluding Germany, increased 40% year-over-year to \$98.6 billion
- Estimated ALRe RBC of 524%¹ as of June 30, 2018
- Estimated U.S. RBC of 438%, as of June 30, 2018
- Ranked #2 carrier in fixed indexed annuity sales for the each of the seven quarters ended March 31, 2018²
- Closed Voya reinsurance transaction on June 1, 2018
- Launched Athene AgilitySM product in June 2018, which has been one of the top-illustrated products since launch

¹ALRe RBC ratio is used in evaluating our capital position and the amount of capital needed to support our Retirement Services segment, and is calculated by applying the NAIC RBC factors to the statutory financial statements of ALRe and its non-U.S. reinsurance subsidiary, on an aggregate basis.
²Rankings as of March 31, 2018 per LIMRA.

Second Quarter Results

Net income for the second quarter was \$264 million, a decrease of \$62 million, or 19%, from the prior year. The decrease was driven by unfavorable impacts from assumed reinsurance embedded derivatives due to growth in the reinsurance block from the Voya transaction, increases in U.S. Treasury rates and credit spread widening. Partially offsetting the increase was a favorable change in FIA derivatives due to an increase in discount rates.

Adjusted operating income for the second quarter was \$290 million, an increase of \$10 million, or 4%, from the prior year. Adjusted operating income, excluding notable items, was \$279 million, an increase of \$40 million, or 17%. Growth of adjusted operating income, excluding notable items, was driven by an increase in investment income due to invested asset growth, earnings from the Voya reinsurance transaction and increased floating rate investment income. Offsetting this was a higher cost of crediting driven by block growth, including the addition of Voya liabilities, as well as higher income taxes.

Deposit Highlights

In the second quarter, Athene generated deposits of \$21.8 billion including inorganic deposits, an increase of 576% compared to the prior year. Despite record sales in our Retail channel, organic deposits of \$2.7 billion were down from the prior year, largely due to unfavorable issuance spreads for insurance companies in the funding agreement backed note market.

Retail Sales: In the second quarter, Athene generated a record \$2.0 billion of new deposits, up 25% from the prior year driven by channel expansion and new product launches. We continue to execute on our growth strategy to increase penetration within the Financial Institutions channel and year-to-date we have signed 16 new relationships. The launch of new products, including a new national fixed indexed annuity product, Athene AgilitySM, has increased penetration within Financial Institutions.

Flow Reinsurance: In the second quarter, Athene generated \$473 million of new deposits, up 121% from the prior year. Deposit growth in the quarter was driven by competitive positioning by our partners as well as the addition of new products to current treaties. Volumes in the quarter included \$25 million of annuitizations from Venerable.

Institutional: In the second quarter, Athene generated \$179 million of new deposits from a pension risk transfer transaction and the issuance of a funding agreement.

Inorganic: Athene closed the Voya reinsurance transaction on June 1, assuming \$19.1 billion of reserve liabilities.

Selected Results

<i>(In millions, except percentages and per share data)</i>	As of and for the three months ended June 30,	
	2018	2017
Organic deposits	\$ 2,690	\$ 3,226
Inorganic deposits	19,104	—
Total deposits	21,794	3,226
Investments, including related parties	98,669	78,699

Retirement Services		
Adjusted operating income	\$ 289	\$ 267
Adjusted operating ROE	19.8%	22.0%
Investment margin on deferred annuities	2.82%	2.96%

¹In January 2018, we issued \$1.0 billion of senior unsecured debt.

²Adjusted book value per share is calculated as the ending AHL adjusted shareholders' equity divided by the adjusted operating common shares outstanding.

³Represents common shares outstanding for all classes eligible to participate in dividends for each period presented. Utilized for the book value per share calculation.

⁴Adjusted operating common shares outstanding assumes conversion or settlement of all outstanding items that are able to be converted to or settled in Class A common shares, including the impacts of Class B common shares outstanding on a one-for-one basis, the impacts of all Class M common shares outstanding net of the conversion price and any other stock-based awards outstanding, but excluding any awards for which the exercise or conversion price exceeds the market value of Class A common shares on the applicable measurement date. Our Class B common shares are economically equivalent to Class A common shares and can be converted to Class A common shares on a one-for-one basis at any time. Our Class M common shares are in the legal form of shares but economically function as options as they are convertible into Class A shares after vesting and settlement of the conversion price. We believe this non-GAAP measure is an appropriate economic representation of our share counts for use in an economic view of book value metrics.

Rider reserve and DAC equity market performance	(13)	(44)
Tax impact of notable items	2	3
Retirement Services notable items	(11)	(41)
Retirement Services adjusted operating income excluding notable items	278	226
Corporate and Other adjusted operating income	1	13
Adjusted operating income excluding notable items	\$ 279	\$ 239

¹ Basic earnings per share, including basic weighted average shares outstanding includes all classes eligible to participate in dividends for each period presented.

² Diluted earnings per share on a GAAP basis for Class A common shares, including diluted Class A weighted average shares outstanding, includes the dilutive impacts, if any, of Class B common shares, Class M common shares and any other stock-based awards. Such dilutive securities totaled 369,955 weighted average shares for the quarter. Diluted earnings per share on a GAAP basis for Class A common shares are based on allocated net income of \$220 million (83% of net income) and \$181 million (55% of net income) for the three months ended June 30, 2018 and 2017, respectively.

³ Weighted average shares outstanding – adjusted operating assumes conversion or settlement of all outstanding items that are able to be converted to or settled in Class A common shares, including the impacts of Class B common shares on a one-for-one basis, the impacts of all Class M common shares net of the conversion price and any other stock-based awards, but excluding any awards for which the exercise or conversion price exceeds the market value of Class A common shares on the applicable measurement date. Our Class B common shares are economically equivalent to Class A common shares and can be converted to Class A common shares on a one-for-one basis at any time. Our Class M common shares are in the legal form of shares but economically function as options as they are convertible into Class A shares after vesting and settlement of the conversion price. In calculating Class A diluted earnings per share on a GAAP basis, we are required to apply sequencing rules to determine the dilutive impacts, if any, of our Class B common shares, Class M common shares and any other stock-based awards. To the extent our Class B common shares, Class M common shares and/or any other stock-based awards are not dilutive they are excluded. We believe this non-GAAP measure is an appropriate economic representation of our share counts for use in an economic view of adjusted operating earnings per share.

Segment Results

Retirement Services

Q2 Results

In the second quarter, Retirement Services adjusted operating income was \$289 million, an increase of \$22 million, or 8%, from the prior year. Adjusted operating income, excluding notable items, was \$278 million, an increase of \$52 million, or 23%, resulting in an adjusted operating ROE of 19.1%. The increase was driven by growth in investment income of \$162 million resulting from invested asset growth, earnings from the Voya reinsurance transaction and an increase in floating rate investment income of \$26 million. Partially offsetting this was a higher cost of crediting due to block growth, including the addition of Voya liabilities, as well as higher income tax expense.

Notable items in the current quarter included \$13 million of favorable rider reserves and DAC amortization due to equity market performance, compared with a \$44 million benefit from equity market performance and out of period actuarial adjustments in the prior year.

Investment margin on deferred annuities was 2.82%, a decrease of 14 basis points from the prior year. The net investment earned rate was 4.74%, a decrease of 11 basis points from the prior year, driven by lower new money rates over the past year and lower returns on the assets from the Voya reinsurance transaction. Partially offsetting this was \$26 million, or 14 basis points, of additional floating rate investment income in the quarter. Alternative investments returned 11.28% driven by MidCap and AmeriHome.

Cost of crediting was 1.92%, an increase of 3 basis points compared to the prior year. The increase was driven primarily by a higher rate on the Voya reinsurance liabilities.

Corporate and Other

Q2 Results

In the second quarter, Corporate and Other adjusted operating income was \$1 million, a decrease of \$12 million over the prior year. The decrease was driven by lower alternative investment income due to a decline in the market value of public equity positions in one of our funds and lower credit fund income.

Conference Call Information

This press release and the second quarter 2018 financial supplement will be posted to the Company's website at ir.athene.com.

Athene will conduct a conference call on Friday, August 3, 2018 at 9:00 a.m. ET to discuss second quarter 2018 results. Additionally, the company will post an earnings presentation deck on the ir.athene.com website prior to the call on August 3, 2018.

- Live conference call: Toll-free at 1-888-317-6003 (domestic) or 1-412-317-6061 (international)
- Participant entry number: 4128349
- Replay available through August 17, 2018 at 1-877-344-7529 (domestic) or 1-412-317-0088 (international)

About Athene Holding Ltd.

Athene, through its subsidiaries, is a leading retirement services company that issues, reinsures and acquires retirement savings products designed for the increasing number of individuals and institutions seeking to fund retirement needs. The products offered by Athene include:

- Retail fixed and fixed indexed annuity products;
- Reinsurance arrangements with third-party annuity providers; and
- Institutional products, such as funding agreements and group annuity contracts related to pension risk transfers.

Athene had total assets of \$114.8 billion as of June 30, 2018. Athene's principal subsidiaries include Athene Annuity & Life Assurance Company, a Delaware-domiciled insurance company, Athene Annuity and Life Company, an Iowa-domiciled insurance company, Athene Annuity & Life Assurance Company of New York, a New York-domiciled insurance company and Athene Life Re Ltd., a Bermuda-domiciled reinsurer.

Further information about our companies can be found at www.athene.com.

Non-GAAP Measures

In addition to our results presented in accordance with GAAP, our results of operations include certain non-GAAP measures commonly used in our industry. Management believes the use of these non-GAAP measures, together with the relevant GAAP measures, provides information that may enhance an investor's understanding of our results of operations and the underlying profitability drivers of our business. The majority of these non-GAAP measures are intended to remove from the results of operations the impact of market volatility (other than with respect to alternative investments) as well as integration, restructuring and certain other expenses which are not part of our underlying profitability drivers or likely to re-occur in the foreseeable future, as such items fluctuate from period to period in a manner inconsistent with these drivers. These measures should be considered supplementary to our results in accordance with GAAP and should not be viewed as a substitute for the GAAP measures. See *Non-GAAP Measure Reconciliations* for the appropriate reconciliations to the GAAP measures.

Adjusted operating income is a non-GAAP measure used to evaluate our financial performance excluding market volatility and expenses related to integration, restructuring, stock compensation, and other expenses. Our adjusted operating income equals net income adjusted to eliminate the impact of the following (collectively, the "non-operating adjustments"):

- Investment Gains (Losses), Net of Offsets
- Change in Fair Values of Derivatives and Embedded Derivatives – FIAs, Net of Offsets
- Integration, Restructuring, and Other Non-operating Expenses
- Stock Compensation Expense
- Bargain Purchase Gain
- Income Tax (Expense) Benefit – Non-operating

We consider these non-operating adjustments to be meaningful adjustments to net income for the reasons discussed in greater detail above. Accordingly, we believe using a measure which excludes the impact of these items is effective in analyzing the trends in our results of operations. Together with net income, we believe adjusted operating income, provides a meaningful financial metric that helps investors understand our underlying results and profitability. Adjusted operating income should not be used as a substitute for net income.

Adjusted ROE, adjusted operating ROE and adjusted net income are non-GAAP measures used to evaluate our financial performance excluding the impacts of AOCI and funds withheld and modco reinsurance unrealized gains and losses, in each case net of DAC, DSI, rider reserve and tax offsets. Adjusted ROE is calculated as adjusted net income, divided by adjusted shareholders' equity. Adjusted shareholders' equity is calculated as the ending shareholders' equity excluding AOCI and funds withheld and modco reinsurance unrealized gains and losses. Adjusted operating ROE is calculated as the adjusted operating income, divided by adjusted shareholders' equity. Adjusted net income is calculated as net income excluding funds withheld and modco reinsurance unrealized gains and losses, net of DAC, DSI, rider reserve and tax offsets. These adjustments fluctuate period to period in a manner inconsistent with our underlying profitability drivers as the majority of such fluctuation is related to the market volatility of the unrealized gains and losses associated with our AFS securities. Once we have reinvested

acquired blocks of businesses, we typically buy and hold AFS investments to maturity throughout the duration of market fluctuations, therefore, the period-over-period impacts in unrealized gains and losses are not necessarily indicative of current adjusted operating fundamentals or future performance. Accordingly, we believe using measures which exclude AOCI and funds withheld and modco reinsurance unrealized gains and losses are useful in analyzing trends in our operating results. To enhance the ability to analyze these measures across periods, interim periods are annualized. Adjusted ROE, adjusted operating ROE and adjusted net income should not be used as a substitute for ROE and net income. However, we believe the adjustments to equity are significant to gaining an understanding of our overall results of operations.

Adjusted operating earnings per share, weighted average shares outstanding – adjusted operating and adjusted book value per share are non-GAAP measures used to evaluate our financial performance and financial condition. The non-GAAP measures adjust the number of shares included in the corresponding GAAP measures to reflect the conversion or settlement of all shares and other stock-based awards outstanding. We believe using these measures represents an economic view of our share counts and provides a simplified and consistent view of our outstanding shares. Adjusted operating earnings per share is calculated as the adjusted operating income, over the weighted average shares outstanding – adjusted operating. Adjusted book value per share is calculated as the adjusted shareholders' equity divided by the adjusted operating common shares outstanding. Our Class B common shares are economically equivalent to Class A common shares and can be converted to Class A common shares on a one-for-one basis at any time. Our Class M common shares are in the legal form of shares but economically function as options as they are convertible into Class A shares after vesting and payment of the conversion price. In calculating Class A diluted earnings per share on a GAAP basis, we are required to apply sequencing rules to determine the dilutive impacts, if any, of our Class B common shares, Class M common shares and any other stock-based awards. To the extent our Class B common shares, Class M common shares and/or any other stock-based awards are not dilutive they are excluded. Weighted average shares outstanding – adjusted operating and adjusted operating common shares outstanding assume conversion or settlement of all outstanding items that are able to be converted to or settled in Class A common shares, including the impacts of Class B common shares on a one-for-one basis, the impacts of all Class M common shares net of the conversion price and any other stock-based awards, but excluding any awards for which the exercise or conversion price exceeds the market value of our Class A common shares on the applicable measurement date. For certain historical periods, Class M shares were not included due to issuance restrictions which were contingent upon our IPO. Adjusted operating earnings per share, weighted average shares outstanding – adjusted operating and adjusted book value per share should not be used as a substitute for basic earnings per share – Class A common shares, basic weighted average shares outstanding – Class A or book value per share. However, we believe the adjustments to the shares and equity are significant to gaining an understanding of our overall results of operations and financial condition.

Adjusted debt to capital ratio is a non-GAAP measure used to evaluate our financial condition excluding the impacts of AOCI and funds withheld and modco reinsurance unrealized gains and losses, net of DAC, DSI, rider reserve and tax offsets. Adjusted debt to capital ratio is calculated as total debt excluding consolidated VIEs divided by adjusted shareholders' equity. Adjusted debt to capital ratio should not be used as a substitute for the debt to capital ratio. However, we believe the adjustments to shareholders' equity are significant to gaining an understanding of our overall results of operations and financial condition.

Investment margin is a key measurement of the financial health of our Retirement Services core deferred annuities. Investment margin on our deferred annuities is generated from the excess of our net investment earned rate over the cost of crediting to our policyholders. Net investment earned rate is a key measure of investment returns and cost of crediting is a key measure of the policyholder benefits on our deferred annuities. We believe measures like net investment earned rate, cost of crediting and investment margin on deferred annuities are effective in analyzing the trends of our core business operations, profitability and pricing discipline. While we believe net investment earned rate, cost of crediting and investment margin on deferred annuities are meaningful financial metrics and enhance our understanding of the underlying profitability drivers of our business, they should not be used as a substitute for net investment income and interest sensitive contract benefits presented under GAAP.

- Net investment earned rate is a non-GAAP measure we use to evaluate the performance of our invested assets that does not correspond to GAAP net investment income. Net investment earned rate is computed as the income from our invested assets divided by the average invested assets for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized. The adjustments to arrive at our net investment earned rate add alternative investment gains and losses, gains and losses related to trading securities for CLOs, net VIE impacts (revenues, expenses and noncontrolling interest) and the change in reinsurance embedded derivatives. We include the income and assets

supporting our assumed reinsurance by evaluating the underlying investments of the funds withheld at interest receivables and we include the net investment income from those underlying investments which does not correspond to the GAAP presentation of reinsurance embedded derivatives. We exclude the income and assets supporting business that we have exited through ceded reinsurance including funds withheld agreements. We believe the adjustments for reinsurance provide a net investment earned rate on the assets for which we have economic exposure.

- Cost of crediting is the interest credited to the policyholders on our fixed strategies as well as the option costs on the indexed annuity strategies. With respect to FIAs, the cost of providing index credits includes the expenses incurred to fund the annual index credits, and where applicable, minimum guaranteed interest credited. The interest credited on fixed strategies and option costs on indexed annuity strategies are divided by the average account value of our deferred annuities. Our average account values are averaged over the number of quarters in the relevant period to obtain our cost of crediting for such period. To enhance the ability to analyze these measures across periods, interim periods are annualized.

In managing our business we analyze invested assets, which do not correspond to total investments, including investments in related parties, as disclosed in our consolidated financial statements and notes thereto. Invested assets represent the investments that directly back our policyholder liabilities as well as surplus assets. Invested assets is used in the computation of net investment earned rate, which allows us to analyze the profitability of our investment portfolio. Invested assets includes (a) total investments on the consolidated balance sheets with AFS securities at cost or amortized cost, excluding derivatives, (b) cash and cash equivalents and restricted cash, (c) investments in related parties, (d) accrued investment income, (e) the consolidated VIE assets, liabilities and noncontrolling interest, (f) net investment payables and receivables and (g) policy loans ceded (which offset the direct policy loans in total investments). Invested assets also excludes assets associated with funds withheld liabilities related to business exited through reinsurance agreements and derivative collateral (offsetting the related cash positions). We include the underlying investments supporting our assumed funds withheld and modco agreements in our invested assets calculation in order to match the assets with the income received. We believe the adjustments for reinsurance provide a view of the assets for which we have economic exposure. Our invested assets are averaged over the number of quarters in the relevant period to compute our net investment earned rate for such period.

Sales statistics do not correspond to revenues under GAAP, but are used as relevant measures to understand our business performance as it relates to deposits generated during a specific period of time. Our sales statistics include deposits for fixed rate annuities and FIAs and align with the LIMRA definition of all money paid into an individual annuity, including money paid into new contracts with initial purchase occurring in the specified period and existing contracts with initial purchase occurring prior to the specified period (excluding internal transfers).

Safe Harbor for Forward-Looking Statements

This press release contains, and certain oral statements made by our representatives from time to time may contain, forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such statements are subject to risks and uncertainties that could cause actual results, events and developments to differ materially from those set forth in, or implied by, such statements. These statements are based on the beliefs and assumptions of AHL's management and the management of AHL's subsidiaries. Generally, forward-looking statements include actions, events, results, strategies and expectations and are often identifiable by use of the words "believes," "expects," "intends," "anticipates," "plans," "seeks," "estimates," "projects," "may," "will," "could," "might," or "continues" or similar expressions. Factors that could cause actual results, events and developments to differ include, without limitation: the accuracy of our assumptions and estimates; our ability to maintain or improve financial strength ratings; our ability to manage our business in a highly regulated industry; regulatory changes or actions; the impact of our reinsurers failing to meet their assumed obligations; the impact of interest rate fluctuations; changes in the federal income tax laws and regulations; the implementation and the accuracy of our interpretation of the Tax Act, which was enacted on December 22, 2017 and made key changes to the U.S. tax law; litigation (including class action litigation), enforcement investigations or regulatory scrutiny; the performance of third parties; the loss of key personnel; telecommunication, information technology and other operational systems failures; the continued availability of capital; new accounting rules or changes to existing accounting rules; general economic conditions; our ability to protect our intellectual property; the ability to maintain or obtain approval of the Delaware Department of Insurance, the Iowa Insurance Division and other regulatory authorities as required for our operations; and other factors discussed from time to time in AHL's filings with the SEC, including our annual report on Form 10-K for the year ended December 31, 2017, and our quarterly report on Form 10-Q for the three months ended March 31, 2018, which can be found at the SEC's website www.sec.gov.

All forward-looking statements described herein are qualified by these cautionary statements and there can be no assurance that the actual results, events or developments referenced herein will occur or be realized. We do not undertake any obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes to future operating results.
