N/A (Former Name or Former Address, if Changed Since Last Report)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (see General Instruction A.2. below):

Written communications pursuant to Rule 425 under the Securities Act (17 CFR 23	30.425)
---	---------

- ☐ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- ☐ Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- ☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

Trading Symbol(s)	Name of each exchange on which registered	
APO	New York Stock Exchange	
APO.PR A	New York Stock Exchange	
APO.PR B	New York Stock Exchange	
	APO.PR A	

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (17 CFR §230.405) or Rule 12b-2 of the Securities Exchange Act of 1934 (17 CFR §240.12b-2).

Emerging growth company □

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition

period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. $\square$								

#### Item 7.01 Regulation FD Disclosure.

In connection with its previously announced Investor Day for stockholders and analysts scheduled for today, October 19, 2021, at 8:30 a.m. ET, Apollo Global Management, Inc. ("AGM") has made available to investors a supplemental presentation on AGM's website (the "Supplemental Presentation").

The information included under this Item 7.01, "Regulation FD Disclosure" of Current Report on Form 8-K is being furnished. As such, the information herein shall not be deemed to be "filed" for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or otherwise subject to the liabilities of that Section, nor shall it be incorporated by reference into a filing under the Securities Act of 1933, as amended (the "Securities Act"), or the Exchange Act, except as shall be expressly set forth by specific reference in such a filing.

#### Item 8.01 Other Items.

In addition to the Supplemental Presentation, AGM has made available to stockholders and analysts attending today's Investor Day a presentation that is attached hereto as Exhibit 99.1 (the "Investor Day Presentation"). The Investor Day Presentation is also available on AGM's website.

\* \* \*

The information in this Current Report on Form 8-K, including Exhibit 99.1, contains forward-looking statements that are within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. These statements include, but are not limited to, discussions related to AGM's expectations regarding the performance of its business, its liquidity and capital resources and the other non-historical statements in the discussion and analysis. These forward-looking statements are based on management's beliefs, as well as assumptions made by, and information currently available to, management. When used in this Current Report on Form 8-K, the words "believe," "anticipate," "estimate," "expect," "intend" and similar expressions are intended to identify forward-looking statements. Although management believes that the expectations reflected in these forward-looking statements are reasonable, it can give no assurance that these expectations will prove to have been correct. It is possible that actual results will differ, possibly materially, from the anticipated results indicated in these statements. These statements are subject to certain risks, uncertainties and assumptions, including risks relating to AGM's dependence on certain key personnel, AGM's ability to raise new private equity, credit or real assets funds, the impact of COVID-19, the impact of energy market dislocation, market conditions, generally, AGM's ability to manage its growth, fund performance, changes in AGM's regulatory environment and tax status, the variability of AGM's revenues, net income and cash flow, AGM's use of leverage to finance its businesses and investments by AGM funds, litigation risks and consummation of the merger of AGM with Athene Holding Ltd. ("AHL"), potential governance changes and related transactions which are subject to regulatory, corporate and shareholders approvals, among others. Due to the COVID-19 pandemic, there has been uncertainty and disruption in the global economy and financial markets. While AGM is unable to accurately predict the full impact that COVID-19 will have on AGM's results from operations, financial condition, liquidity and cash flows due to numerous uncertainties, including the duration and severity of the pandemic and containment measures, AGM's compliance with these measures has impacted AGM's day-to-day operations and could disrupt AGM's business and operations, as well as that of the AGM funds and their portfolio companies, for an indefinite period of time. AGM believes these factors include but are not limited to those described under the section entitled "Risk Factors" in AGM's annual report on Form 10-K filed with the SEC on February 19, 2021 and Quarterly Report on Form 10-Q filed with the SEC on May 10, 2021, as such factors may be updated from time to time in AGM's periodic filings with the SEC, which are accessible on the SEC's website at www.sec.gov. These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this Current Report on Form 8-K and in other filings.

AGM undertakes no obligation to publicly update or review any forward-looking statements, whether as a result of new information, future developments or otherwise, except as required by applicable law. This Current Report on Form 8-K does not constitute an offer of any AGM fund.

#### Additional Information Regarding the Transaction and Where to Find It

This Current Report on Form 8-K is being made in respect of the proposed transaction involving Tango Holdings, Inc., a Delaware corporation and a direct wholly owned subsidiary of AGM ("HoldCo"), AGM and AHL. The proposed transaction will be submitted to the stockholders of AGM and the shareholders of AHL for their respective consideration. In connection therewith, the parties intend to file relevant materials with the Securities and Exchange Commission (the "SEC"), including a definitive joint proxy statement/prospectus, which will be mailed to the stockholders of AGM and the shareholders of AHL. However, such documents are not currently available. BEFORE MAKING ANY VOTING OR ANY INVESTMENT DECISION, AS APPLICABLE, INVESTORS AND SECURITY HOLDERS OF AGM AND AHL ARE URGED TO READ THE DEFINITIVE JOINT PROXY STATEMENT/PROSPECTUS REGARDING THE PROPOSED TRANSACTION AND ANY OTHER RELEVANT DOCUMENTS FILED OR TO BE FILED WITH THE SEC CAREFULLY AND IN THEIR ENTIRETY WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION ABOUT THE PROPOSED TRANSACTION. Investors and security holders may obtain free copies of the definitive joint proxy statement/prospectus, any amendments or supplements thereto and other documents containing important information about AGM and AHL, once such documents are filed with the SEC, through the website maintained by the SEC at <a href="https://www.sec.gov">www.sec.gov</a>.

Copies of the documents filed with the SEC by AGM will be available free of charge under the "Stockholders" section of AGM's website located at http://www.apollo.com or by contacting AGM's Investor Relations Department at (212) 822-0528 or <u>APOInvestorRelations@apollo.com</u>.

Copies of the documents filed with the SEC by AHL will be available free of charge under the "Investors" section of AHL's website located at http://www.athene.com or by contacting AHL's Investor Relations Department at (441) 279-8531 or ir@athene.com.

#### Participants in the Solicitation

AGM, AHL, HoldCo and their respective directors, executive officers, members of management and employees may, under the rules of the SEC, be deemed to be participants in the solicitation of proxies in connection with the proposed transaction.

Information about the directors and executive officers of AGM and HoldCo is set forth in AGM's proxy statement for its 2020 annual meeting of stockholders, which was filed with the SEC on August 20, 2020, its annual report on Form 10-K for the fiscal year ended December 31, 2020, which was filed with the SEC on February 19, 2021, and in subsequent documents filed with the SEC, each of which can be obtained free of charge from the sources indicated above.

Information about the directors and executive officers of AHL is set forth in AHL's proxy statement for its 2020 annual meeting of shareholders, which was filed with the SEC on April 21, 2020, its annual report on Form 10-K for the fiscal year ended December 31, 2020, which was filed with the SEC on February 19, 2021, and in subsequent documents filed with the SEC, each of which can be obtained free of charge from the sources indicated above.

Other information regarding the participants in the proxy solicitations of the stockholders of AGM and the shareholders of AHL, and a description of their direct and indirect interests, by security holdings or otherwise, will be contained in the preliminary and definitive joint proxy statement/prospectus and other relevant materials to be filed with the SEC when they become available.

#### No Offer or Solicitation

This Current Report on Form 8-K is for informational purposes only and not intended to and does not constitute an offer to subscribe for, buy or sell, the solicitation of an offer to subscribe for, buy or sell or an invitation to subscribe for, buy or sell any securities or the solicitation of any vote or approval in any jurisdiction pursuant to or in connection with the proposed transaction or otherwise, nor shall there be any sale, issuance or transfer of securities in any jurisdiction in contravention of applicable law.

#### **SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, as amended, the Registrant has duly caused hereunto duly authorized.	this report to be signed on its behalf by the undersigned

### Forward Looking Statements and Important Disclosures

This presentation has been prepared by Apollo Global Management, Inc., a Delaware corporation (together with its subsidiaries, "Apollo") solely for informational purposes for its public stockholders in connection with evaluating the business, operations and financial results of Apollo and Athene Holding Ltd., a Bermuda exempted company (together with its subsidiaries, "Athene"), and assumes that the previously announced merger of Apollo and Athene will be successfully consummated.

Information and data in the materials are as of June 30, 2021 unless otherwise noted, including information and data labeled "2021", "Current", "Today" and similar labeled content. Information and data labeled "Tomorrow" is prospective and aspirational and not intended to denote a particular date in the future unless otherwise noted.

Apollo makes no representation or warranty, express or implied, as to the fairness, accuracy, reasonableness or completeness of the information contained herein, including, but not limited to, information obtained from third parties. Unless otherwise specified, information included herein is sourced from and reflects the views and opinions of Apollo Analysts. Certain information contained in these materials has been obtained from sources other than Apollo. While such information is believed to be reliable for purposes used herein, no representations are made as to the accuracy or completeness thereof and Apollo does not take any responsibility for such information. This presentation may contain trade names, trademarks and service marks of companies which (i) neither Apollo nor Apollo Funds own or (ii) are investments of apollo or one or more Apollo Funds. We do not intend our use or display of these companies' trade names, trademarks or service marks to imply a relationship with, or endorsement or sponsorship of us by, such companies. Certain information contained in the presentation discusses general market activity, industry or sector trends, or other broad-based economic, market or political conditions and should not be construed as research or investment advice. This presentation is not complete and the information contained herein may change at any time without notice. Apollo does not have any responsibility to update the presentation to account for such changes. The information contained herein is not intended to provide, and should not be relied upon for, accounting, legal or tax advice or investment recommendations.

#### No Offer or Solicitation

This presentation is for informational purposes only and not intended to and does not constitute an offer to subscribe for, buy or sell, the solicitation of an offer to subscribe for, buy or sell or an invitation to subscribe for, buy or sell any securities, products or services, including interests in the funds, vehicles or accounts sponsored or managed by Apollo (each, an "Apollo Fund"), any capital markets services offered by Apollo, or the solicitation of any vote or approval in any jurisdiction pursuant to or in connection with the proposed transaction or otherwise, nor shall there be any sale, issuance or transfer of securities in any jurisdiction in contravention of applicable law.

#### Additional Information Regarding the Transaction and Where to Find It

This presentation is being made in respect of the proposed transaction involving Tango Holdings, Inc., a Delaware corporation and a direct wholly owned subsidiary of Apollo ("HoldCo"), Apollo and Athene. The proposed transaction will be submitted to the stockholders of Apollo and the shareholders of Athene for their respective consideration. In connection therewith, the parties intend to file relevant materials with the Securities and Exchange Commission (the "SEC"), including a definitive joint proxy statement/prospectus, which will be mailed to the stockholders of Apollo and the shareholders of Athene. However, such documents are not currently available. BEFORE MAKING ANY VOTING OR ANY INVESTMENT DECISION, AS APPLICABLE, INVESTORS AND SECURITY HOLDERS OF APOLLO AND ATHENE ARE URGED TO READ THE DEFINITIVE JOINT PROXY STATEMENT/PROSPECTUS REGARDING THE PROPOSED TRANSACTION AND ANY OTHER RELEVANT DOCUMENTS FILED OR TO BE FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ("SEC") CAREFULLY AND IN THEIR ENTIRETY WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION ABOUT THE PROPOSED TRANSACTION. Investors and security holders may obtain free copies of the definitive joint proxy statement/prospectus, any amendments or supplements thereto and other documents containing important information about Apollo and Athene, once such documents are filed with the SEC, through the website maintained by the SEC at <a href="http://www.sec.gov">http://www.sec.gov</a>.

Copies of the documents filed with the SEC by Apollo will be available free of charge under the "Stockholders" section of Apollo's website located at <a href="http://www.apollo.com">http://www.apollo.com</a> or by contacting Apollo's Investor Relations Department at (212) 822-0528 or in@apollo.com.

Copies of the documents filed with the SEC by Athene will be available free of charge under the "Investors" section of Athene's website located at <a href="http://www.athene.com">http://www.athene.com</a> or by contacting Athene's Investor Relations Department at (441) 279-8531 or in@athene.com.

#### Participants in the Solicitation

Apollo, Athene, HoldCo and their respective directors, executive officers, members of management and employees may, under the rules of the SEC, be deemed to be participants in the solicitation of proxies in connection with the proposed transaction.

Information about the directors and executive officers of Apollo and HoldCo is set forth in Apollo's proxy statement for its 2021 annual meeting of stockholders, which was filed with the SEC on August 16, 2021, its annual report on Form 10-K for the fiscal year ended December 31, 2020, which was filed with the SEC on February 19, 2021, and in subsequent documents filed with the SEC, each of which can be obtained free of charge from the sources indicated above.

Information about the directors and executive officers of Athene is set forth in Athene's proxy statement for its 2021 annual meeting of shareholders, which was filed with the SEC on July 22, 2021, its annual report on Form 10-K for the fiscal year ended December 31, 2020, which was filed with the SEC on April 20, 2021, and in subsequent documents filed with the SEC, each of which can be obtained free of charge from the sources indicated above.

### Forward Looking Statements and Important Disclosures

Other information regarding the participants in the proxy solicitations of the stockholders of Apollo and the shareholders of Athene, and a description of their direct and indirect interests, by security holdings or otherwise, will be contained in the preliminary and definitive joint proxy statement/prospectus and other relevant materials to be filed with the SEC when they become available.

#### **Forward Looking Statements**

#### Apollo Safe Harbor for Forward Looking Statements Disclaimer

This presentation contains forward-looking statements that are within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements include, but are not limited to, discussions related to Apollo's expectations regarding the performance of its business, its liquidity and capital resources and the other non-historical statements in the discussion and analysis. These forward-looking statements are based on management's beliefs, as well as assumptions made by, and information currently available to, management. When used in this presentation, the words' 'beliefe,' "anticipate,' "estimate," "expect," "intend", "may,", "will", "could", "should", "might", "target", "project", "plan", "seek", "continue" and similar expressions are intended to identify forward-looking statements. Although management believes that the expectations reflected in these forward-looking statements are subject to certain risks, uncertainties and assumptions, including risks relating to Apollo's dependence on certain key personnel, Apollo's ability to raise new Apollo Funds, the impact of energy market dislocation, market conditions, generally, Apollo's ability to manage its growth, fund performance, changes in Apollo's regulatory environment and tax status, the variability of Apollo's revenues, net income and cash flow, Apollo's use of leverage to finance its businesses and investments by Apollo Funds, litigation risks and consummation of the merger of Apollo with Athene, potential governance changes and related transactions which are subject to regulatory, corporate and shareholders approvals, among others. Due to the COVID-19 pandemic, there has been uncertainty and disruption in the global economy and financial market. While Apollo is unable to accurately predict the full impact that COVID-19 will have on Apollo's results from operations, financial condition, liquidity and cash flows due to numerous uncertainties, including the duration and severity

The proposed transaction is subject to risks, uncertainties and assumptions, which include, but are not limited to: (i) that Apollo may be unable to complete the proposed transaction because, among other reasons, conditions to the closing of the proposed transaction may not be satisfied or waived, including that a governmental entity may prohibit, delay or refuse to grant or place material restrictions on its approval for the consummation of the proposed transaction; (ii) uncertainty as to the timing of completion of the proposed transaction; (iii) the inability to complete the proposed transaction due to the failure to obtain Apollo stockholder approval and Athene shareholder approval for the proposed transaction; (iv) the occurrence of any event, change or other circumstances that could give rise to the termination of the merger agreement; (v) risks related to disruption of management's attention from Apollo's ongoing business operations due to the proposed transaction; (vi) the effect of the announcement of the proposed transaction on Apollo's relationships with its clients, operating results and business generally; (vii) the outcome of any legal proceedings to the extent initiated against Apollo or others following the announcement of the proposed transaction; as well as Apollo's management's response to any of the aforementioned factors; and (viii) industry conditions.

Apollo undertakes no obligation to publicly update or review any forward-looking statements, whether as a result of new information, future developments or otherwise, except as required by applicable law. This presentation does not constitute an offer of any Apollo Fund.

#### Athene Safe Harbor for Forward-Looking Statements

This presentation contains, and certain oral statements made by Athene's representatives from time to time may contain, forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such statements are subject to risks and uncertainties that could cause actual results, events and developments to differ materially from those set forth in, or implied by, such statements. These statements are based on the beliefs and assumptions of Athene's management and the management of Athene's subsidiaries.

Generally, forward-looking statements include actions, events, results, strategies and expectations and are often identifiable by use of the words "believes," "expects," "intends," "anticipates," "plans," "seeks," estimates," "projects," "may," will," "could," "might," or "continues" or similar expressions. Forward looking statements within this presentation include, but are not limited to, statements regarding: the consummation of the proposed merger and the benefits to be derived therefrom; the future financial performance and growth prospects of the combined entity, the market environment in which the combined entity will operate; future capital allocation decisions, including the payment of dividends; the structure and operation of the company post-merger; and the tax treatment of the proposed transaction.

### Forward Looking Statements and Important Disclosures

Factors that could cause actual results, events and developments to differ include, without limitation: Athene's failure to obtain approval of the proposed transaction by its shareholders or regulators; Athene's failure to recognize the benefits expected to be derived from the proposed transaction; unanticipated difficulties or expenditures relating to the proposed transaction; disruptions of Athene's current plans, operations and relationships with customers, suppliers and other business partners caused by the announcement and pendency of the proposed transaction; legal proceedings, including those that may be instituted against Athene, Athene's board of directors or special committee, Athene's executive officers and others following announcement of the proposed transaction; the accuracy of Athene's assumptions and estimates; Athene's ability to maintain or improve financial strength ratings; Athene's ability to manage its business in a highly regulated industry, regulatory, changes or actions; the impact of Athene's reinsurers failing to meet their assumed obligations; the impact of interest rate fluctuations; changes in the federal income tax laws and regulations; the accuracy of Athene's and Jobs Act, litigation (including class action litigation), enforcement investigations or regulatory scrutiny; the performance of third parties; the loss of key personnel; telecommunication, information technology and other operational systems failures; the continued availability of capital; new accounting rules or changes to existing accounting rules; general economic conditions; Athene's ability to protect its intellectual property; the ability to maintain or obtain approval of the Delaware Department of Insurance, the lowa Insurance Division and other regulatory authorities as required for Athene's operations; and other factors discussed from time to time in Athene's filings with the SEC, including its annual report on Form 10-K for the year ended December 31, 2020 and quarterly report on Form 10-Q filed for the period

All forward-looking statements described herein are qualified by these cautionary statements and there can be no assurance that the actual results, events or developments referenced herein will occur or be realized. Athene does not undertake any obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes to future operating results.

The contents of any website referenced in this presentation are not incorporated by reference.

#### Performance Information

Past performance is not necessarily indicative of future results and there can be no assurance that Apollo, Athene or any Apollo Fund or strategy will achieve comparable results, or that any investments made by Apollo in the future will be profitable. Actual realized value of currently unrealized investments will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, any related transaction costs and the timing and manner of sale, all of which may differ from the assumptions and circumstances on which the current unrealized valuations are based. Accordingly, the actual realized values of unrealized investments may differ materially from the values indicated herein.

Information contained herein may include information with respect to prior investment performance of one or more Apollo and Athene funds or investments, including gross and/or net internal rates of return ("IRR") and gross and/or net multiple of investment cost ("MOIC"). Information with respect to prior performance, while a useful tool in evaluating investment activities, is not necessarily indicative of actual results that may be achieved for unrealized investments. The realization of such performance is dependent upon many factors, many of which are beyond the control of Apollo. Aggregated return information is not reflective of an investable product, and as such does not reflect the returns of any Apollo Fund.

Please refer to the Appendix for additional important information.

Note: Alternative assets and private credit AUM based on forecasted Preqin data for 2021. Fixed income replacement market based on Apollo estimates, Sources: Apollo Chief Economist, Federal Reserve Board, S&P LCD, BofA, Preqin, SiFMA, Haver Analytics, Bloomberg APOLLO INVESTOR DAY 2021

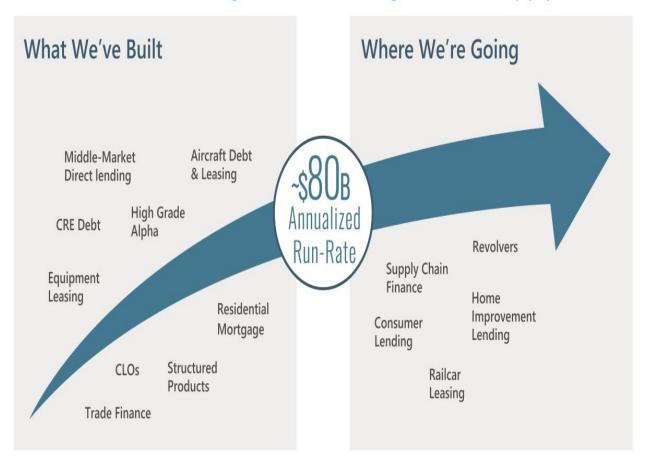

## Why Aren't Others Addressing the Vast Fixed Income Replacement Market?

BECAUSE THIS MARKET REQUIRES A COMPLETELY DIFFERENT ECOSYSTEM

APOLLO INVESTOR DAY 2021 32

## Differentiated Asset Origination: Building Reliable Supply

Note: Annualized run-rate of total yield asset origination as of June 30, 2021. APOLLO INVESTOR DAY 2021

## Differentiated Capital Base: Scale Matters

#### YIELD AUM ACROSS SELECT PEERS1

Note: Data as of June 30, 2021. Peer group meant to be representative, not exhaustive. 1. Peers represented estimated credit and insurance AUM based on public disclosure.

APOLLO INVESTOR DAY 2021

## Differentiated Growth: Organic Inflows of Low-Cost Capital

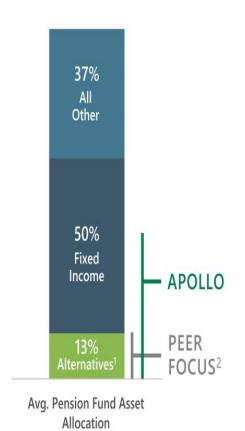

#### ATHENE ORGANIC INFLOWS (\$B)

Note: Numbers may not sum due to rounding. Gross inflows based on Athene public disclosure. 1. #1 US annuity flow market share in 2020 per US Public BlueBook Filings from Cedents. 2. LIMRA data for the six months ended June 30, 2021. 3. For the six months ended June 30, 2021. 3. For the six months ended June 30, 2021. 4. Forecasted organic inflows by channel, subject to change.

APOLLO INVESTOR DAY 2021

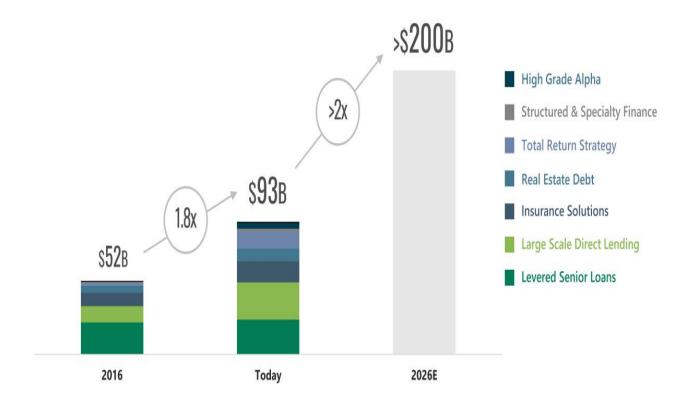

## Apollo Serves the Alternatives Sector and the Large and Growing Fixed Income Replacement Market

- Both markets are very large
- Both markets are growing
- Both markets offer ability for excess return
- Both markets pay higher fees
   for excess return

Source: Willis Towers Watson Report as of 2020. 1. Includes private equity, hedge funds, real estate, alternative and miscellaneous asset classes. 2. Illustrative of business focus of other alternative asset managers APOLLO INVESTOR DAY 2021

## Differentiated Growth: Large and Growing 3rd Party Yield Business

Note: Figures reflect third-party AUM in yield business.

APOLLO INVESTOR DAY 2021

## Differentiated Organization

THE APOLLO ECOSYSTEM IS TEEMING WITH DEDICATED RESOURCES FULLY DEVOTED TO SOURCING YIELD

Note: Data as of June 30, 2021. 1. Origination platform employees are not Apollo employees. APOLLO INVESTOR DAY 2021

## Why Do We Like This Market?

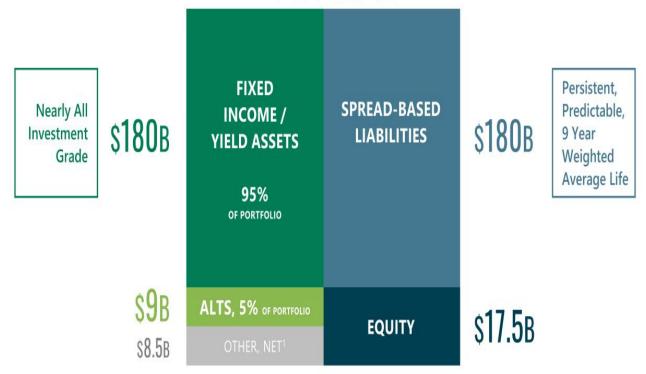

Note: Please refer to the Definitions pages at the end of this presentation for the definition of permanent. APOLLO INVESTOR DAY 2021 3

# Athene is a Competitive Differentiator and Growth Accelerant

## Athene's Balance Sheet is Simple and Straightforward

Note: Data as of June 30, 2021. Spread liabilities equal to gross reserve liabilities. Equity equal to adjusted AHL common shareholders' equity, ACRA non-controlling interest, and preferred equity, 1. Other, net includes all other assets as defined by GAAP excluding gross invested fixed income and alternative assets, less other liabilities including delet and accumulated other comprehensive income.

APOLLO INVESTOR DAY 2021

## Athene Has a Simple, Spread-Based Business Model

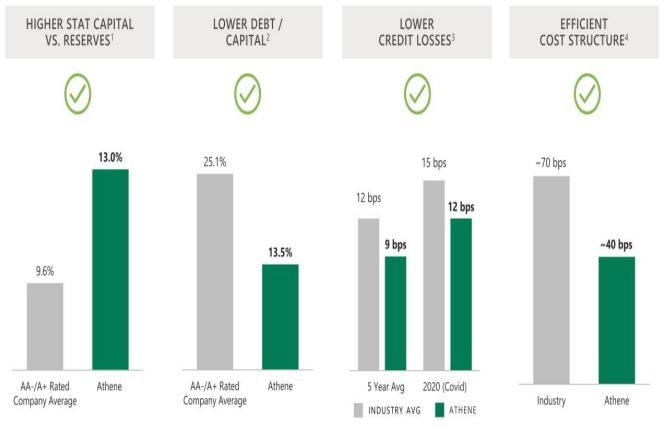

#### STRONG TRACK RECORD OF PROFITABILITY & OUTPERFORMANCE

	TODAY (Recent New Business, 1H21)	TRAILING 3YR (3Q18-2Q21)	
Asset Yield	3.49%	4.38%	~30bps better vs others, net of fees¹
Cost of Funds	2.24%	2.77%	Disciplined and dynamic pricing
Opex & Taxes	0.22%	0.48%	~30bps more efficient OpEx vs others <sup>2</sup>
Net Spread on Assets	1.03%	<b>1.13</b> % <sup>3</sup>	
Implied ROE <sup>4</sup>	~15	%	~300bps better vs others <sup>5</sup>

Note: Industry comparison noted as "others" represent a weighted average of AEL, A/G, A/G, FGL, LINC, MET, PRU, and PFG for the 5 years 2016 to 2020. Source: SNL Financial, Company Filings. Footnote explanations may be found in presentation endnotes.

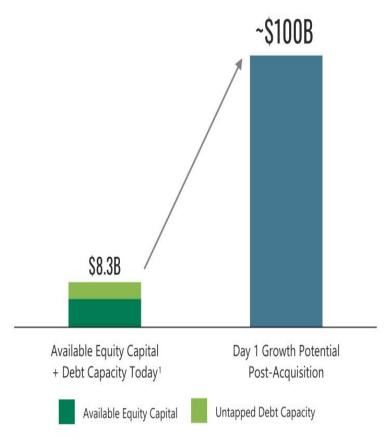

APOLLO INVESTOR DAY 2021

## Athene is Uniquely Positioned in the Industry

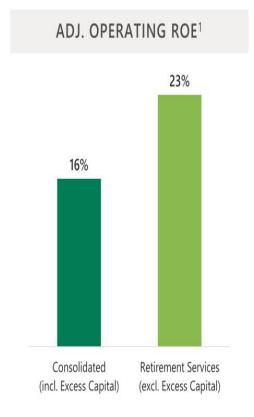

Footnote explanations may be found in presentation endnotes. APOLLO INVESTOR DAY 2021

## Athene's Substantial Available Capital = Embedded Growth

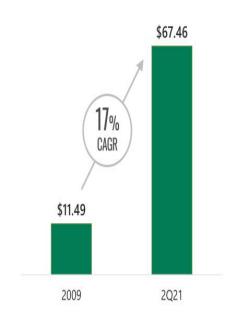

For Athene, available equity capital (inclusive of excess capital and uncommitted capital in ADIP) and debt capacity as of June 30, 2021.
 APOLLO INVESTOR DAY 2021

## Athene Has Generated Compelling Returns Over Time

Note: Data as of June 30, 2021, unless otherwise stated. 1. Long-term average over 2014-2Q21 excluding AOG. 2. Adjusted book value per ATH common share. APOLLO INVESTOR DAY 2021

### High Returns Attract Third-Party Capital to Finance Growth

IN 2019, WE FORMED AN INNOVATIVE SIDECAR TO SUPPORT ATHENE'S CONTINUED GROWTH

#### APOLLO/ATHENE DEDICATED INVESTMENT PROGRAM (ADIP)

First sidecar in the industry

Direct equity capital to support Athene's growth

✓ No dilution to shareholders

Greater 3rd party participation & capital efficiency for future sidecars

\$3.2B Capital Raised

\$1.7B Deployed To-Date

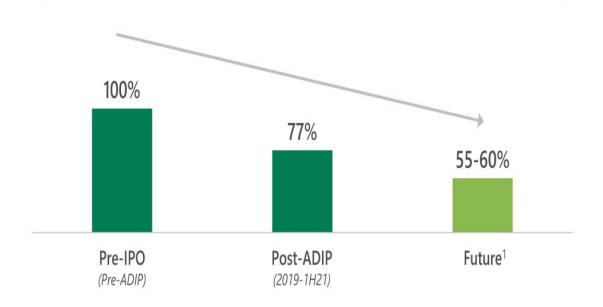

Target Mid-Teens Net IRR to LPs

Note: Data as of June 30, 2021.

APOLLO INVESTOR DAY 2021

## ADIP is an Innovative Tool Which Drives Greater Capital Efficiency

We anticipate Athene will be increasingly capital efficient going forward

Based upon current 5-year projections and estimates.

APOLLO INVESTOR DAY 2021

#### What Do You Need to Understand About This Business?

# Key to Success is Asset Yield

With fixed funding costs, a spread model relies on consistent asset management

# Consistency Over Heroism

We target only ~30-40 basis points of outperformance

## Quality & Transparency

Full clarity on Athene's portfolio and stress scenarios published annually

APOLLO INVESTOR DAY 2021

## Why Own 100% of Athene and Change the Status Quo?

#### THIS IS TABLE STAKES, THERE'S NOTHING MORE STRATEGIC

Control over

~\$**35**E

of annual inflows

Control over asset origination with combined

\$**80**B

run-rate originations

Capture attractive spread earnings, which we anticipate will amount to

~\$13B

pre-tax cumulative over 5 years

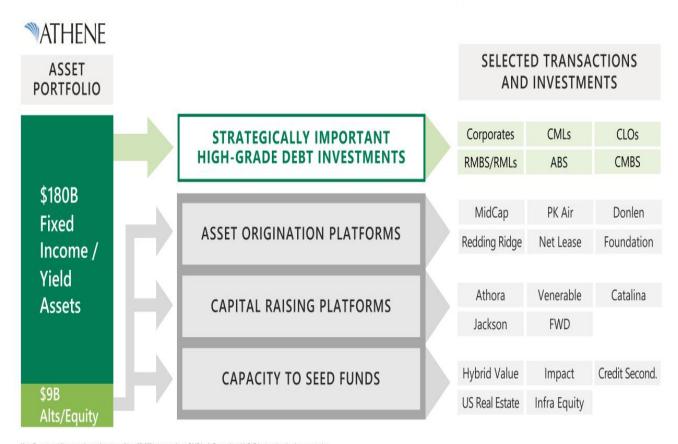

Strategic Alts capacity, which we anticipate will double to

~\$**20**B

over 5 years

### Strategic Importance of Athene's Investment Portfolio

ATHENE'S PORTFOLIO IS A HOME FOR STRATEGICALLY IMPORTANT DEBT AND EQUITY INVESTMENTS

Note: Represents Athene gross invested assets as of June 30, 2021, presented on a GAAP basis. Transaction with PWD has not closed and may never close APOLLO INVESTOR DAY 2021

## We Like All Three, But We Have More of What We Like The Most

## \$1 OF COMMINGLED FUND CAPITAL

Fundraising treadmill, but generally good for high return products

Carry not valued by the market

Capture management fee or 20% of upside

~3% coinvest

Riskier, limited applicability

Mid-teens growth

#### \$1 OF PRIVATE BDC/REIT CAPITAL

Permanent capital with periodic liquidity

Carry is fully-valued by the market

VS.

Earn management fee and 12.5% of upside

0% co-invest (today)

Cyclical performance

High-teens growth

## \$1 OF RETIREMENT SERVICES CAPITAL

Permanent capital<sup>1</sup>

Upside is undervalued by the market

Earn management fee and keep 100% of upside

8% co-invest

Reliable earnings stream

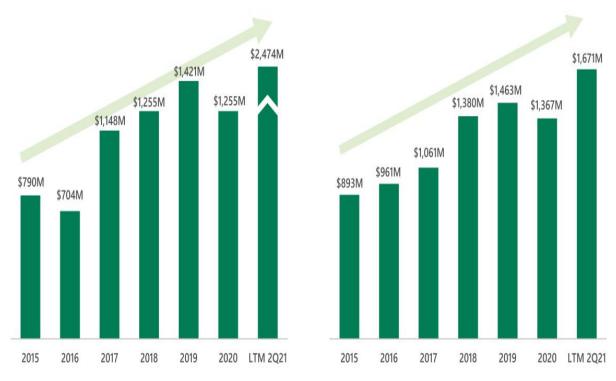

Mid-teens growth forecasted

Please refer to the Definitions pages at the end of this presentation for the definition of permanent capital.
 APOLLO INVESTOR DAY 2021

## SRE is Recurring, Predictable, and Sustainable Through the Cycle

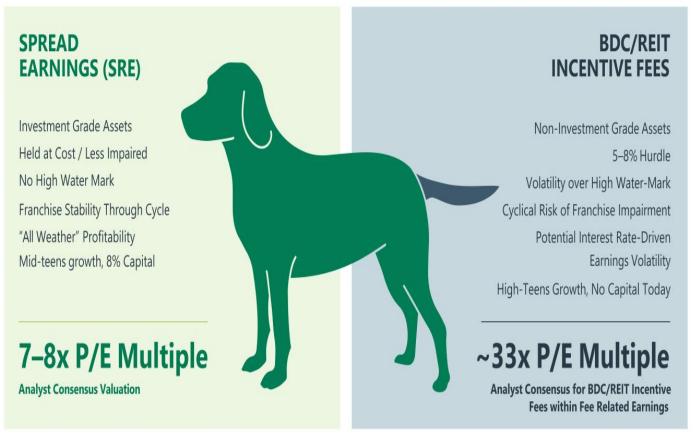

#### NORMALIZED SPREAD RELATED EARNINGS<sup>2</sup>

1. As reported by Athene, represents adjusted operating income with alternatives marked-to-market (excluding AOG investment, taxes and long-term incentive plan ). 2. As reported by Athene, represents adjusted operating income (excludes AOG investment, taxes, and long-term incentive plan compensation) and reflects 11% long-term alternative investment returns.

APOLLO INVESTOR DAY 2021

### Spread Earnings Significantly Undervalued

Note: FRE multiples based on average P/E multiples on 2022E used across self-side valuation frameworks for Blackstone and Ares from KBW, Goldman Sachs, and Citi. SRE multiple based on self-side analyst SOTP valuation.

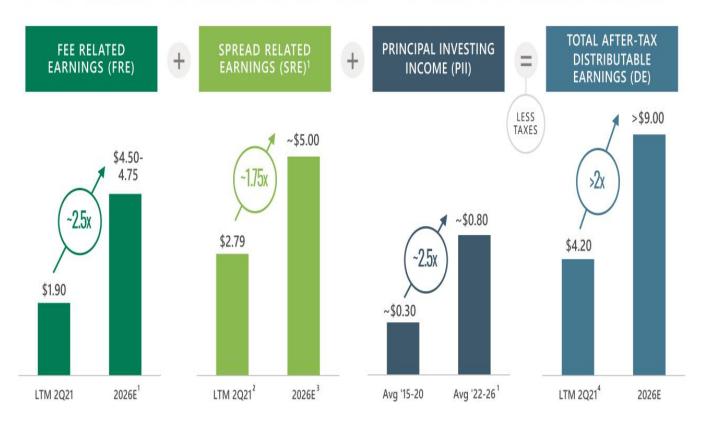

APOLLO INVESTOR DAY 2021

# Our Model Is Highly Capital Efficient

### Substantial, Visible Earnings Growth

BEFORE INVESTMENT OF ~\$5B OF CAPITAL GENERATED, ONE OF THE KEY BENEFITS OF MERGER, AND UPSIDE OPTIONS

Note: Pro-forma for post merger share count of approximately 600mm shares, including anticipated equity awards related to compensation reset. 1. Reflects anticipated pro-forma allocation of expenses across segments. 2. Normalized earnings – see Appendix for more detail. 3. Includes estimated purchase accounting benefits. 4. Pro-forma for post merger share count of approximately 600mm shares, including anticipated equity awards related to compensation reset, and assumed tax rate of 18%.

APOLLO INVESTOR DAY 2021 63

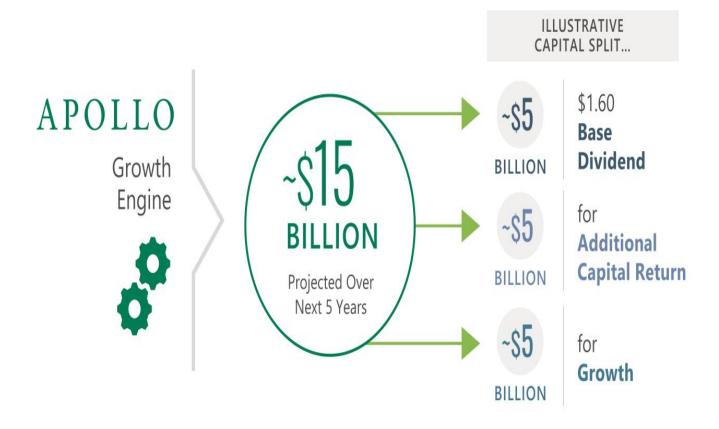

## Base Plan of 18% Compound Annual FRE Growth and Investment of ~\$5B of Capital, Before Embedded Options

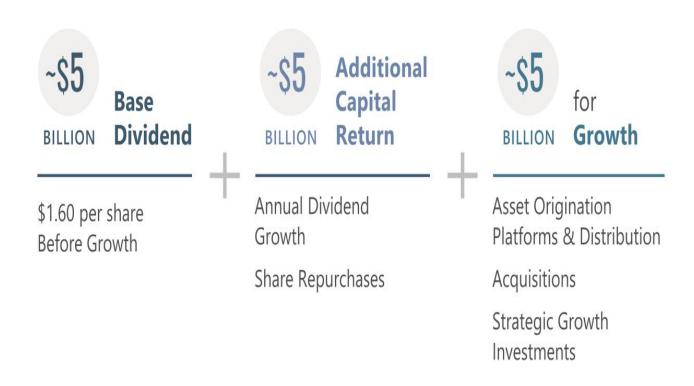

APOLLO INVESTOR DAY 2021

## Projected to Generate Massive Capital

APOLLO INVESTOR DAY 2021 65

## Strategic Uses for Targeted Capital Generation

APOLLO INVESTOR DAY 2021

### Three Components to Our Firepower

~\$100B of Embedded Growth Potential + ~\$15B of Expected Aggregate Capital Available

APOLLO INVESTOR DAY 2021 67

## Strong Momentum Behind Aligned Team

#### Tomorrow's Apollo Will... Be Larger and More Profitable

<sup>1. &</sup>quot;Tomorrow" represents 2026E. 2. "Today" reflects LTM ended June 30, 2021 normalized spread related earnings. 3. Pro-forma for post merger share count of approximately 600mm shares, including anticipated equity awards related to compensation reset, and assumed tax rate of 18%.

APOLLO INVESTOR DAY 2021

#### Tomorrow's Apollo Will... Generate More Capital

#### **LAST 5 YEARS**

\$5 billion of Distributable Earnings generated

> >90% cumulative Payout Ratio on DE

BUSINESS STARVED OF GROWTH CAPITAL

#### **NEXT 5 YEARS**

Projecting \$15 billion of capital generation, \$5 billion for growth

Dividend grows as FRE grows

BUSINESS WILL HAVE PLENTIFUL GROWTH CAPITAL AVAILABLE

Note: Last 5 years generally representative of 2016-2020. Next 5 years representative of 2022-2026. APOLLO INVESTOR DAY 2021

#### Tomorrow's Apollo Will... Be More Aligned With Employees

Undertaking a holistic and necessary revamp of our comp model...

Greater emphasis on stock compensation; one-time equity investment in alignment concurrent with merger

Give employees greater share of incentive fees undervalued by market

Strengthens employee alignment with investment performance

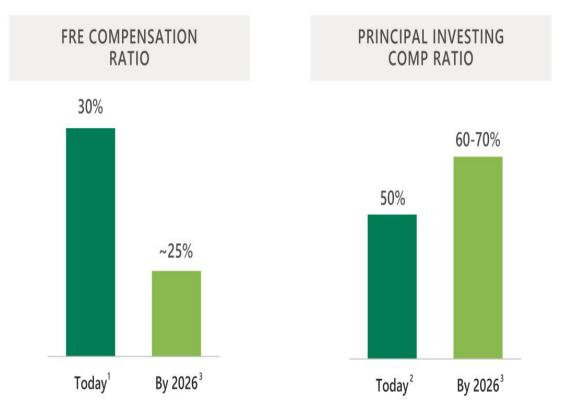

Stronger alignment with stock performance

Better continuity and longer tenure

Improves long-term FRE margin potential

#### Aligning Compensation Structure with Shareholders

GREATER PORTION OF COMPENSATION ALIGNED WITH VARIABLE PERFORMANCE FEES

1. As of LTM 2Q21.2. Reflects average PII compensation ratio from 2020A to 2021E. 3. Reflects anticipated pro-forma allocation of expenses across segments. Principal Investing comp ratio is indicative based on average expected revenues from 2022E-2026E.

CAPITAL SOLUTIONS BROADENS OUR DISTRIBUTION FUNNEL

#### Our Originated Assets Have Multiple Homes

APOLLO INVESTOR DAY 2021 95

#### Apollo Capital Solutions Further Expands Our Toolkit

#### MULTIPLE LEVERS FOR FRE GROWTH

- 1 Large existing portfolio with capital markets activity
- Premier yield and origination franchise
- Excess flow across scaling strategies

Centralized solution supporting cross-platform origination, structuring, and syndication that is expected to drive FRE growth

1. For presentation purposes, LTM 2021 fee related revenue from transaction and advisory fees excludes monitoring and miscellaneous fees from the private equity segment recognized over the same period. APOLLO INVESTOR DAY 2021

#### Key Takeaways for Our Yield and Capital Solutions Businesses

- Private Credit is evolving into Fixed Income Replacement, a market which is magnitudes larger
- Apollo's differentiated scale and cost of capital drives our competitive edge in origination
- Capital Solutions expands our toolkit for distributing investments to our clients
- We believe we have the capabilities and experience to drive sustainable growth and create enterprise value

## Origination Platforms

#### **CHRIS EDSON**

Senior Partner, Co-Head of US FIG

#### Access to Direct Origination Is Now More Important Than Ever

Owning origination platforms provides perpetual<sup>1</sup>, recurring access to attractive assets at scale

Platforms are ongoing businesses that we may potentially never sell and thus provide us with the opportunity to originate assets over an indefinite time period.
 APOLLO INVESTOR DAY 2021

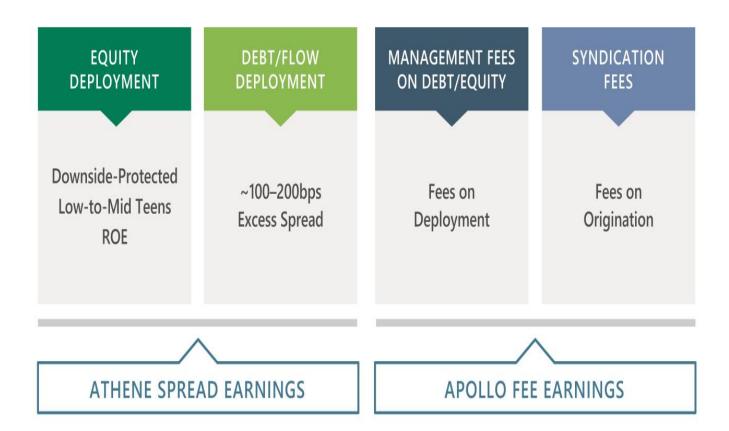

#### Origination Platforms Drive Permanent Asset Growth

### HOW DO WE DEFINE ORIGINATION PLATFORMS?

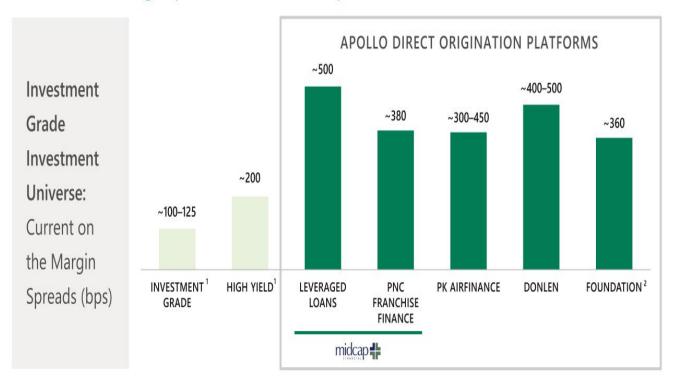

Origination platforms are best-in-class businesses, teams and technologies that originate assets with excess risk-reward on a sustainable and recurring basis

#### What Can Direct Origination Offer Apollo and Apollo Clients?

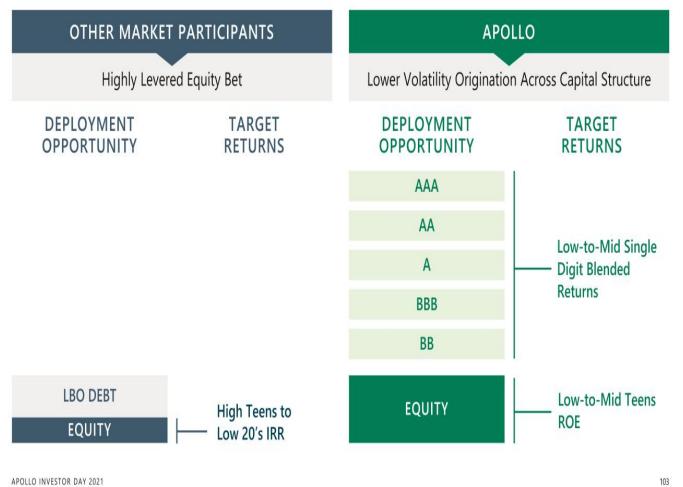

#### Manufacturing Spread in a Low Spread World

Apollo direct origination platforms systematically originate IG assets at ~100–200bps higher spreads than broadly syndicated markets

1. Illustrative spreads based on market prices observed for BBB corporates (IG) and BB corporates (HY), as of September 2021. 2. Acquisition of Foundation is signed but not yet closed. APOLLO INVESTOR DAY 2021

#### Apollo Origination Platforms Represent Our Differentiated View

## Why "Holding the Underwriting Pen" Is Better than Buying CUSIPs

	BROADLY SYNDICATED LOANS	APOLLO DIRECT ORIGINATION PLATFORMS
Credit Documentation Control	X	<b>\</b>
Due Diligence Access	PARTIAL	FULL
Relationship with Borrower	LIMITED	COMPREHENSIVE
Origination and Spread Economics	X	<b>✓</b>
Syndication Control	X	<b>✓</b>
Recurring Flow and Allocation Control	X	<b>✓</b>
Granularity	CONCENTRATED	GRANULAR

We believe directly originating assets drives better risk-adjusted returns

#### MidCap Serves as a Case Study for Origination Platforms

While we have made material progress to date, significant whitespace remains

#### Origination Platforms Will Benefit from a Virtuous Feedback Loop

Flywheel effect: \$25B+ annual originations to target of \$60B+ in 5 years

## Key Takeaways for Our Origination Platform Capabilities

- Direct origination delivers excess risk-adjusted returns at scale and on a recurring basis
- Our existing platforms originate tens of billions in assets for Apollo clients every year
- 3 Origination platforms generate substantial fee income to Apollo
- Significant runway to scale our existing platforms and fill in whitespace opportunities

INVESTOR DAY 2021

# Capital Solutions

#### **CRAIG FARR**

Senior Partner, Capital Solutions

#### What You've Heard Thus Far...

We source unique investments across the entire Apollo platform We generate tremendous asset flow via our Yield, Equity, and Hybrid businesses Our origination platforms augment this with additional yield products

Given ideal holding size, we often have excess flow...

...Hence a need for a centralized utility to execute and syndicate capital markets opportunities

## What is Apollo Capital Solutions?

#### **ORIGINATION**

Directly originate more private transactions, provide flexible capital

#### CAPITAL MARKETS

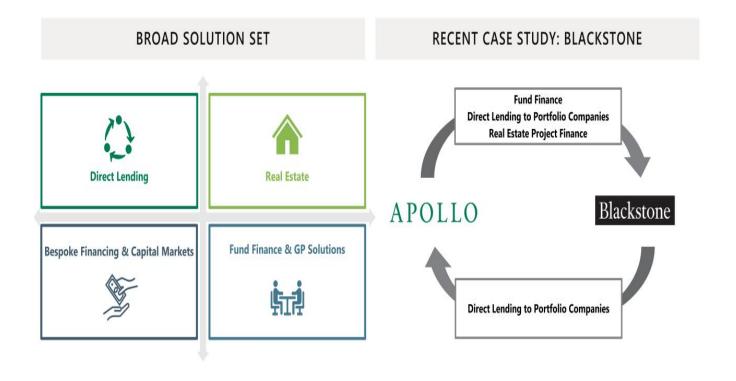

Competitive pricing, flexible structuring, quick execution

#### **SYNDICATION**

Expand our investor reach, speak for greater volume

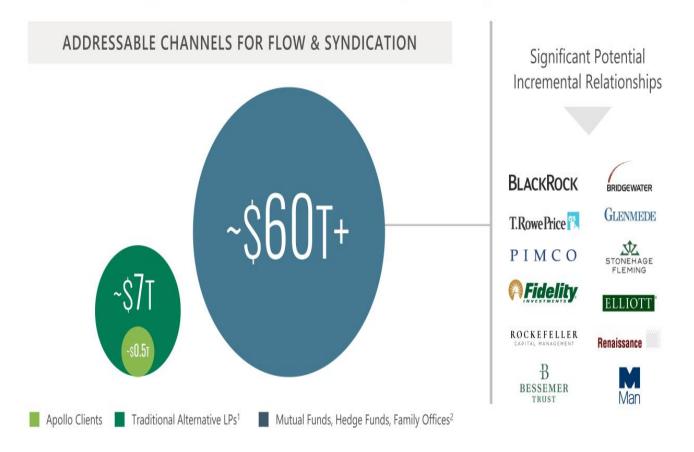

APOLLO CAPITAL SOLUTIONS ("ACS")

#### We Deliver a Broad and Holistic Solution Set for Clients

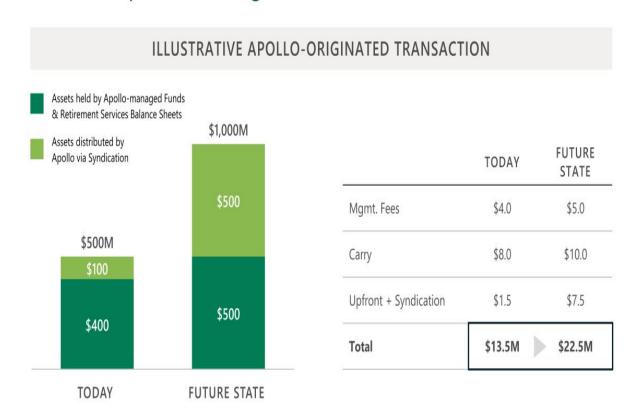

Our breadth of products and long-term capital base are key strategic differentiators

## Dedicated Syndication Allows Us to Significantly Expand Our Reach

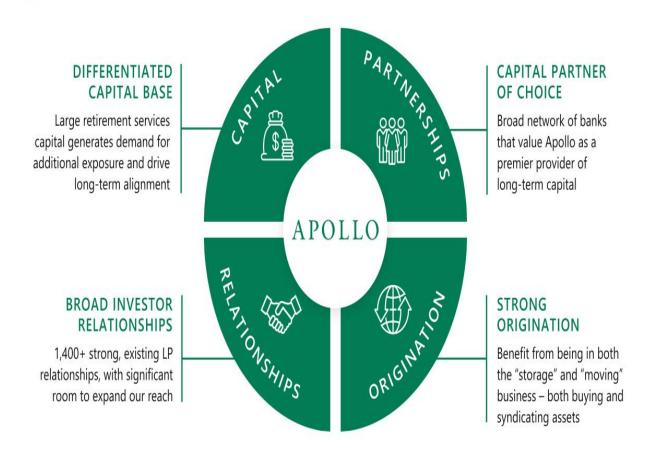

1. Represents 2020 Private Equity, Private Debt, Real Estate, Infrastructure and Natural Resources AUM. Source: Preqin – Futures of Alternatives 2025. 2. Includes 2020 Hedge Fund AUM of \$3.6T per Preqin – Futures of Alternatives 2025, 2020E Mutual Fund AUM of \$5.0T as of 2020 per Pac – Asset and Wealth Management Revolution, The Future of Financial Services, and Family Office AUM of \$5.9T as of 2020 per Pac – Asset and Wealth

## ACS is a Multiplier, Creating Value for Clients and Shareholders

Creates a multiplier effect – both increasing economics per unit of capital and allowing us to originate more/larger assets

#### Apollo is the Perfect Home to Build This Business

## ACS Drives Values for All Stakeholders

#### Sponsors, Corporates & Banks

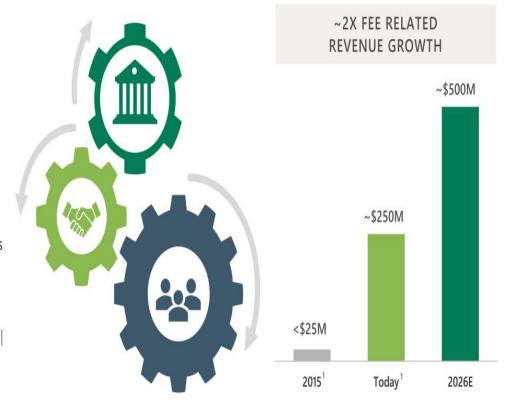

Holistic solutions | Dedicated & coordinated coverage | Broader investor & capital base

## Limited Partners & Investors

Bespoke sourcing | Better returns Access to direct deal flow

#### Shareholders

Greater economics | Fee income | FRE growth

1. For presentation purposes, LTM 2Q21 fee related revenue from transaction and advisory fees excludes monitoring and miscellaneous fees from the private equity segment recognized over the same period. APOLLO INVESTOR DAY 2021

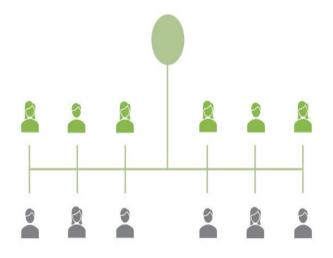

## We Are Building ACS for the Future of Financial Markets

#### TODAY

#### THE FUTURE

Salesperson-intensive Syndication approach

More efficient Syndication to a larger investor pool

FinTech is already transforming access to products and funds. Direct deals will be the next frontier.

## Key Takeaways for Apollo Capital Solutions

Quality of our investments is the key to growth; originate strong assets and capital will quickly follow

2 Dedicated syndication efforts connect our leading investment franchise with expansive capital pools

ACS creates a multiplier on Apollo's existing business success, driving accelerated FRE growth and asset generation

### Athene's Advantages Drive Value Creation

#### Better Asset Performance

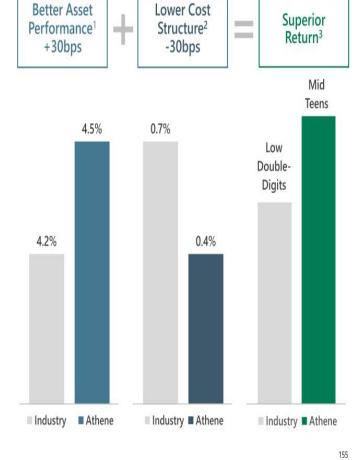

- Through Apollo, Athene generates superior riskadjusted returns and does not take on excessive risk to earn yield
- Apollo provides access to unique asset opportunities and direct origination flow

#### Lower Cost Structure

- Scalable platform with the ability to onboard incremental business at a low marginal cost
- Disciplined liability management
- Disciplined pricing across organic growth channels

Peers represent a weighted average of AEL, AIG, AFG, FGL, LNC, MET, PRU, and PFG for the 5 years 2016 to 2020. Source: SNL Financial, Company Fillings. Footnote explanations may be found in presentation endnotes.

### The Opportunity Set Is Vast

Note: Not shown to scale for illustrative purposes. Footnote explanations may be found in presentation endnotes. APOLLO INVESTOR DAY 2021

### **Retail Annuities**

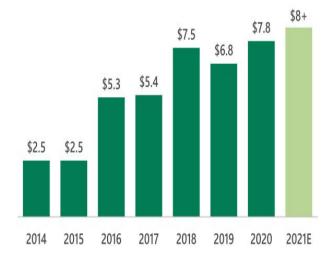

#### **Business Highlights**

- · Athene is a leading fixed indexed annuity issuer
- Broad range of products for various market cycles and retirement strategies, with focus on fixed indexed annuities
- Product differentiation through custom index construction

Cumulative percentage, 2YR trailing (2Q'21-2Q'19).
 APOLLO INVESTOR DAY 2021

#### Retail Annuity Inflows (\$B)

#### **KEY DRIVERS:**

- Tailored annuity offerings capitalize on secular demand for yield and income protection for retirees
- Expanding retail distribution within broader financial institutions channel (i.e. product sold through banks and broker-dealers)

### Pension Group Annuities

#### **Business Highlights**

- Entered the pension group annuity business in 2017 and guickly grew into a market leader
- Through several signature transactions, has become known as a partner of choice for blue-chip corporate pension plan sponsors

#### **Signature Transactions**

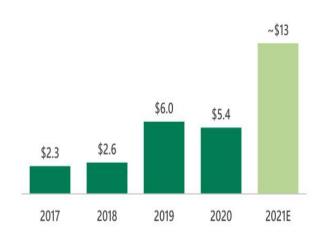

#### WHAT IS A PENSION GROUP ANNUITY?

- Occurs when a defined benefit pension plan sponsor transfers some or all of the plan's liabilities to another company
- That company issues a group ("bulk") annuity which provides benefit continuity for all the pensioners within the plan

#### Pension Group Annuity Inflows (\$B)

#### **KEY DRIVERS:**

- Long-term secular shift by corporations away from managing pension assets internally
- Provides simplicity and consistent income to retirees while offering increased efficiency to corporations and plan sponsors

### **Funding Agreements**

#### **Business Highlights**

- Athene maintains issuing capabilities across currencies in North America and European markets
- While at SunAmerica in the 1990s, Jim Belardi pioneered the development of the Funding Agreement Backed Note (FABN), which has since grown into a ~\$250 billion market

#### WHAT IS A FUNDING AGREEMENT?

- 1 Traditional fixed income investors purchase a fixed income investment (effectively a note or bond), and the issuer guarantees a fixed or floating rate of return over a certain tenor
- The issuer re-invests the amount of the funding agreement and seeks to earn more than the cost of the funding agreement
- Funding agreements are priced based on market demand and the credit rating of the issuer

#### Funding Agreement Inflows (\$B)1

#### **KEY DRIVERS:**

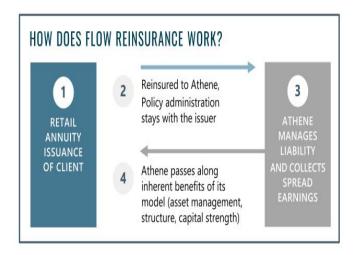

- Increasing demand by institutions given the relatively higher yield profile of funding agreements vs. similarly-rated corporate debt
- Strong demand and improved funding costs for Athene FABNs driven by continued credit rating improvements

Funding agreements are comprised of funding agreements issued under our FABN and FABR programs, funding agreements issued to the FHLB and long-term repurchase agreements.
 APOLLO INVESTOR DAY 2021

### Flow Reinsurance

#### **Business Highlights**

- Ongoing priority to diversify counterparty relationships across geographies and product areas
- During 2020, built a reputation of strength in the market as a partner of choice, supporting counterparties when others chose to conserve capital
- · Recent expansion into Japanese market with two key partnerships

#### Flow Reinsurance Inflows (\$B)

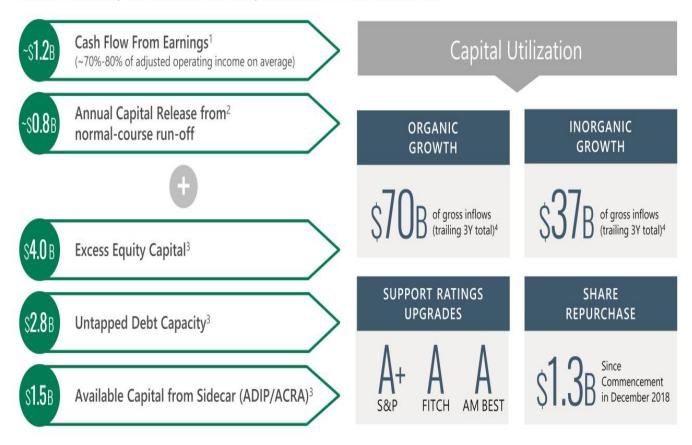

#### **KEY DRIVERS:**

- Demand for capital efficiency / risk management from other annuity issuers
- Changes in market pricing conditions and counterparty behavior can cause fluctuations

### Athene Generates Significant Capital to Fund Growth

ATHENE IS TODAY, AND HAS ALWAYS BEEN, MASSIVELY CAPITAL GENERATIVE

Note: Data as of June 30, 2021. Footnote explanations may be found in presentation endnotes. APOLLO INVESTOR DAY 2021

### Sidecar Capital Augments Our Capital Efficiency and Profitability

Apollo/Athene dedicated investment program (ADIP) is a win-win for Athene and Limited Partners

## WHAT IS ADIP?

- \$3.2 billion
   On-Demand Capital
   Pool (Closed in 2019)
- \$1.7 billion of capital deployed to date to support Athene's growth
- · 3-5 year investment period
- 13-14% unlevered gross target return to LPs

#### SUPPORTS GROWTH

Investors earn
attractive spread
economics on current
~\$28 billion of assets,
with potential to
exceed \$60 billion
when fully-deployed

# ENHANCES PROFITABILITY

Athene earns up to ~15 basis point fee on all liabilities ADIP supports

~300 basis point ROE enhancement on business Athene retains

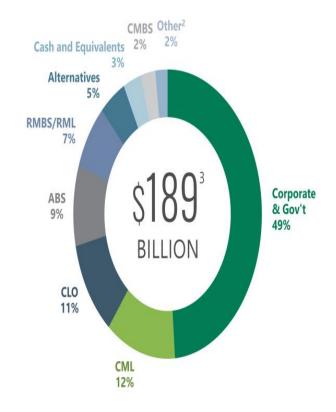

#### ADIP is a structural part of how we operate

### High-Quality Asset Portfolio Optimized for Yield Generation

#### **Investment Philosophy**

- Target higher and sustainable risk-adjusted returns with opportunistic approach to liquidity and structuring risk
- No need to stretch for yield given long-dated liability profile and low cost of funding
- Dynamic asset allocation to take advantage of market dislocations
- Differentiation driven by proprietary asset origination and greater asset expertise

1. Investment Grade means designated NAC categories 1 and 2 for AFS securities as of 6/30/21. 2. "Other" includes AOG units, Accrued Income, Equity Securities, Policy Loans, and Short Term Investments. 3. Gross invested assets includes investments associated with the ACRA noncontrolling interest. APOLLO INVESTOR DAY 2021

### Risk Management is Embedded in Everything We Do

MANAGE ATHENE'S RISKS SUCH THAT IT CAN GROW PROFITABLY ACROSS VARIOUS MARKETS

#### ATHENE'S RISK MANAGEMENT PRIORITIES

- Robust risk management framework and procedures underpin focus on downside protection
- Risk strategy, investment, ALM and liquidity compliance policies at the board and management levels
- Stress testing plays a key role in defining risk appetite, with tests performed on both sides of the balance sheet

Committed to transparency by publishing annual stress test: latest edition available October 19, 2021

Louis, Moody's Seasoned Baa Corporate Bond Yield Relative to Yield on 10-Year Treasury Constant Maturity BAA10Y as IP Morgan indices were not available. For Euro 2016: IPMorgan US Liquid Index(JULI) BBB Spread (Treasury) on Feb 10th 2016 for BB and IPMorgan Developed Market Single B HY Spread to Worst on Feb 9th, 2016 for B. Fl Default - For COVID 2020. Moody's Monthly Default Report from Moody's Investor Services. For historical experiences: Moody's Annual Default Study, Corporate Default and Recovery Rates. There is no guarantee that Athene will be able to replicate actual historical recession experience under current market conditions or during future recessions. Footnote explanations may be found in presentation endortes.

### Minimal Credit Losses Historically and During COVID-19

#### DISCIPLINED RISK APPETITE

- Risk appetite is to avoid a credit rating downgrade in a typical "recession" scenario, and maintain an investment grade credit rating in a "deep recession" scenario like 2008/2009
- Risk management is deeply embedded in all business decisions and processes
- The enterprise risk appetite is established using stress testing and is cascaded to the business through risk limits
- Constant communication with rating agencies and reinsurance counterparties

#### HISTORICAL CREDIT LOSSES<sup>1</sup>

1. Peer U.S. statutory impairments per SNL Financial, average includes AEL, AIG, AMP, BHF, EQH, FG, LNC, MET, PFG, PRU, VOYA and Transamerica. For Athene, U.S. statutory data adjusted to include impairments and assets in Bermuda. Linked presentations are not incorporated by reference.

APOLLO INVESTOR DAY 2021

### Key Takeaways

1 Athene has a simple spread business model

2 Athene generates low-cost, persistent funding

3 Athene has compelling organic growth capabilities

Athene is conservatively capitalized and has a long history of minimal credit losses

Athene is well-managed and prepared for future dislocation

### Positioning Apollo for the Future

#### MERGER WITH ATHENE CLEARS THE PATH FOR RATIONALIZATION AND CLEAR GROWTH AHEAD

- Balance sheet re-organization transfer of Apollo investment portfolio to Athene<sup>1</sup>
- Consolidation of investments in operating platforms<sup>1</sup>
- · Investment capital:
  - Group cash earnings
  - Utilization of Athene equity portfolio capacity
- · Aligning and future proofing our business
- Massive reset of our compensation structure

- Full organizational alignment
- Growth acceleration
- Resetting our FRE comp trajectory
- More efficient capital usage

Transfers do not represent 100% of Apollo investment portfolio or operating platforms.
 APOLLO INVESTOR DAY 2021

## Reset of Compensation Structure Aligned with Shareholders

- Greater portion of compensation for investment professionals aligned with performance
- · Legacy profit share program for broad employee base replaced with APO shares
- · Long-term award of APO shares to partners
- · Results in lower FRE compensation expense trajectory going forward

	TODAY	BY 2026
FRE Comp Ratio	30%	~25%
PII Comp Ratio	<b>50</b> % <sup>1</sup>	60-70% <sup>2</sup>

Note: Comp Ratio defined as Compensation Expense divided by Revenues. 1. Reflects average of 2020 actual and 2021 expected compensation ratios. 2. Indicative based on average expected revenues from 2022E through 2026E APOLLO INVESTOR DAY 2021

## Components of FRE Growth – Base Case

INVESTOR DAY 2021

# Important Information & Definitions

#### **Estimates and Assumptions**

This presentation includes certain unaudited financial and business projections and goals on Apollo's future outlook following the closing of the transaction with Athene and the creation of three reportable segments (the "Estimates").

Apollo does not regularly provide future guidance or publicly disclose forecasts or projections as to future performance, earnings or other results due to the inherent unpredictability of projections and their underlying assumptions and estimates. The Estimates were not prepared with a view toward public disclosure and, accordingly, do not necessarily comply with published guidelines of the SEC or the guidelines established by the American Institute of Certified Public Accountants for preparation and presentation of financial forecasts or GAAP. Neither Apollo's independent registered public accounting firm, nor any other independent accountants, have audited, reviewed, compiled or performed any procedures with respect to the Estimates or expressed any opinion or any form of assurance related thereto. Additionally, the Estimates are not intended to be pro forma financial information prepared in compliance with Article 11 of Regulation S-X.

The Estimates reflect the internal financial model that Apollo uses in connection with its strategic planning, after giving effect to the transaction with Athene. The Estimates are illustrative and are included in this presentation solely to give Apollo's investors access to these financial projections. They are not being included in this presentation to influence a stockholder's decision whether to vote for the Apollo-Athene merger.

The Estimates are distinct, and differ in material respects, from the various financial projections that were provided to Barclays, Houlihan Lokey or Lazard in connection with the financial analysis each performed on the Apollo-Athene merger. For more information on those separate projections, please refer to the joint proxy statement/prospectus filed by HoldCo with the SEC in connection with the Apollo-Athene merger.

The Estimates were based on numerous variables and assumptions made by Apollo's management with respect to industry performance, general business, economic, regulatory, market and financial conditions and other future events, as well as matters specific to Apollo's and Athene's businesses, all of which are difficult or impossible to predict accurately and many of which are beyond the control of Apollo's management. Because the Estimates cover multiple years, by their nature, they also become subject to greater uncertainty and are less reliable with each successive year. The Estimates reflect subjective judgment in many respects and thus are susceptible to multiple interpretations and periodic revisions based on actual experience and business developments. As such, the Estimates constitute forward-looking information and are subject to many risks and uncertainties that could cause actual results to differ materially from the results forecasted in these projections. There can be no assurance that the Estimates will be realized or that actual results will not be significantly higher or lower than forecast. The Estimates may be affected by Apollo's and Athene's ability to achieve strategic goals, objectives and targets over the applicable period. Please consider carefully the section above titled "Forward Looking Statements". Accordingly, there can be no assurance that the Estimates will be realized, and actual results may vary materially from those shown. The Estimates cannot, therefore, be considered a guarantee of future operating results, and this information should not be relied on as such.

The inclusion of the Estimates in this presentation should not be regarded as an indication that Apollo or any of its affiliates, advisors, officers, directors or representatives considered or considers the Estimates to be necessarily predictive of actual future events, and the Estimates should not be relied upon as such. The inclusion of the Estimates herein should not be deemed an admission or representation by Apollo that its management views the Estimates as material information. Neither Apollo nor Athene or any of their respective affiliates, advisors, officers, directors or representatives has made or makes any representation to any of Apollo's stockholders or any other person regarding the ultimate performance of Apollo or Athene compared to the information contained in the Estimates or can give any assurance that actual results will not differ materially from the Estimates, and none of them undertakes any obligation to update or otherwise revise or reconcile the Estimates to reflect circumstances existing after the date the Estimates were generated or to reflect the occurrence of future events even in the event that any or all of the assumptions underlying the Estimates are shown to be in error.

Certain of the projected financial information set forth herein may be considered non-GAAP financial measures. There are limitations inherent in non-GAAP financial measures, because they exclude charges and credits that are required to be included in a GAAP presentation. Non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information presented in compliance with GAAP, and non-GAAP financial measures as used by Apollo may not be comparable to similarly titled amounts used by other companies. No reconciliation of non-GAAP financial measures in the Estimates to GAAP measures was created or used in connection with preparing the Estimates.

In light of the foregoing factors and the uncertainties inherent in the Estimates, Apollo's and Athene stockholders are cautioned not to place undue reliance on the Estimates. Without limiting the statements made in the prior paragraphs, please take note of the following additional important information.

#### Assets Under Management ("AUM")

The estimates and expectations about new fund capital that Apollo can raise in various strategies and formats (including permanent capital) and Apollo's AUM in the future depend on many assumptions about future events and circumstances, including but not limited to the fundraising environment generally, investor interest in the investment strategies presented, and the expected pace and the time periods within which fundraising will be completed. There are many factors that could delay, impede or prohibit the future fundraising that AGM currently expects, including not limited to market disruption, loss of key personnel, lack of investor interest, negotiations with investors, and other events or circumstances that we may or may not be able to predict, manage or control (including but not limited to the matters discussed under the section "Forward Looking Statements" above).

#### Fee Related Earnings ("FRE"), Spread Related Earnings ("SRE") and Principal Investing Income ("PII")

The estimates and expectations about Apollo's fees, FRE, SRE and PII in the future depend on many assumptions about future events and circumstances, including but not limited to (i) the assumptions about future fundraising and AUM, (ii) the actual terms and conditions of the Apollo Funds to be raised in the future, including management fee rates paid, (iii) the investment and transaction activity of Apollo entities, (iv) the ability to generate liability growth, realize target returns and target net spreads on Athene's investment portfolio, (v) the variability and level of our operating expenses, and (vi) the timing and amounts generated by the monetization of investments held by Apollo entities. The value of unrealized investment gains and unrealized carried interest may be volatile and subject to material change, and the actual realized value of currently unrealized investments will depend on, among other factors, the value of the investments and market conditions at the time of disposition, legal and contractual restrictions, transaction costs, and the timing and manner of sale, all of which may differ from the assumptions used for this presentation. Accordingly, the actual realized values of unrealized investments and the properties of unrealized values of unrealize

#### Distributable Earnings ("DE")

The estimates and expectations about Apollo's DE in the future depend on many assumptions about future events and circumstances, including but not limited to (i) the assumptions about future AUM, fees, FRE, SRE and PII, and (ii) possible future clawbacks, and netting holes. There are many factors that could delay, impede or prohibit Apollo's ability to generate the DE that Apollo currently expects, including but not limited to market disruption, loss of key personnel, lack of investor or third party interest, negotiations by investors or other third parties, unexpected expenses including higher income taxes resulting from changes in tax legislation, and other events or circumstances that we may or may not be able to predict, manage or control (including but not limited to the matters discussed in the section "Forward Looking Statements" above).

#### **Business Growth**

All statements relating to the potential for future business growth are inherently uncertain and are based on current market conditions, which can change at any time, and various assumptions about the ability to capitalize on growth opportunities and future business performance. No inference should be made that Apollo (including Athene) can or will grow any of its businesses materially or sufficiently to meet or approach the size of any market or sector leader disclosed in this presentation. See the section "Forward Looking Statements" above.

APOLLO DOES NOT INTEND TO UPDATE OR OTHERWISE REVISE THE ABOVE ESTIMATES TO REFLECT CIRCUMSTANCES EXISTING AFTER THE DATE WHEN MADE OR TO REFLECT THE OCCURRENCE OF FUTURE EVENTS, EVEN IN THE EVENT THAT ANY OR ALL OF THE ASSUMPTIONS UNDERLYING SUCH ESTIMATES ARE NO LONGER APPROPRIATE OR ARE SHOWN TO BE IN ERROR, EXCEPT AS MAY BE REQUIRED BY APPLICABLE LAW.

#### Performance Information

Past performance is not necessarily indicative of future results and there can be no assurance that Apollo, Athene or any Apollo Fund or strategy will achieve comparable results, or that any investments made by Apollo in the future will be profitable. Actual realized value of currently unrealized investments will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, any related transaction costs and the timing and manner of sale, all of which may differ from the assumptions and circumstances on which the current unrealized valuations are based. Accordingly, the actual realized values of unrealized investments may differ materially from the values indicated herein.

Information contained herein may include information with respect to prior investment performance of one or more Apollo and Athene funds or investments, including gross and/or net internal rates of return ("IRR") and gross and/or net method investment cost ("MOIC"). Information with respect to prior performance, while a useful tool in evaluating investment activities, is not necessarily indicative of actual results that may be achieved for unrealized investments. The realization of such performance is dependent upon many factors, many of which are beyond the control of Apollo. Aggregated return information is not reflective of an investable product, and as such does not reflect the returns of any Apollo Funds referenced herein may utilize a credit facility (sometimes referred to as a "subscription line") to make investments and pay expenses and for other purposes to the extent permitted by each Apollo Funds partnership agreement. Such fund-level borrowing to fund investments impacts net IRR calculations because net IRR is calculated based on investor cash outlays to, and returns from, the Apollo Fund and as such, returns depend on the amount and timing of investor capital contributions.

When the Apollo Fund uses borrowed funds in advance or in lieu of calling capital, investors make correspondingly later or smaller capital contributions. Accordingly, this fund-level borrowing could result in higher net IRR (even after taking into account the associated interest expense of the borrowing) or lower net IRR, than if capital had been called to fund the investments or capital had been contributed at the inception of the investment. In addition, the Apollo Fund may pay all related expenses, including interest, on its subscription line facility and investors will bear such costs. Please refer to the Definitions pages for additional information regarding gross and net IRR.

Unless otherwise indicated, MOIC is derived from dividing the sum of the estimated remaining value and realized proceeds by the amount invested. Unless otherwise noted, MOIC is presented gross and does not reflect the effect of management fees, incentive compensation, certain expenses or taxes. Please refer to the Definitions pages for additional information regarding MOIC.

#### Track Record

Track record provided herein is for illustrative purposes only. The investments in the track records were selected on the basis that they fall within the scope of the investment mandate of an Apollo Fund and/or investment strategy and are intended solely as examples illustrative of the potential investment strategy of the Fund or of the types of investments that may be entered into by the Fund.

None of the examples included in the track records is necessarily indicative of all of Apollo's investment strategies or prior investment performance. While Apollo believes that the performance information herein includes applicable historical investments, there can be no assurance as to the validity, thoroughness or accuracy of Apollo's determination methodology. Moreover, while certain members of the applicable investment committee were involved in the consummation of certain of the historical representative transactions described in the track records, the sourcing of these investments and the decisions to consummate these investments were not all necessarily made by the same group of professionals, some of which may no longer be employed by Apollo, nor were such investments approved by the same investment approved b

Past performance is not indicative nor a guarantee of future results. There can be no assurance that any Apollo Fund will be able to implement its investment strategy or investment approach to achieve comparable results or that it will be successful. Moreover, there can be no assurance that any similar investment opportunities will be available or pursued by the Apollo Fund in the future.

#### **Non-GAAP Financial Measures**

This presentation contains information regarding Apollo's financial results that is calculated and presented on the basis of methodologies other than in accordance with accounting principles generally accepted in the United States ("non-GAAP measures"). The non-GAAP measures presented herein include Distributable Earnings, or "FRE", Spread Related Earnings, or "SRE", and Principal Investing Income, or "PII", among others. Refer to the Definitions pages for the definitions of the non-GAAP measures presented herein, as well as Reconciliations of GAAP to Non-GAAP Measures pages for reconciliations of the most comparable GAAP measures to the non-GAAP measures.

#### Target Return

Target returns including Target IRR are presented solely for providing insight into an investment's objectives and detailing anticipated risk and reward characteristics in order to facilitate comparisons with other investments and for establishing a benchmark for future evaluation of the investment's performance. Target returns are not predictions, projections or guarantees of future performance. Target returns are based upon estimates and assumptions that a potential investment will yield a return equal to or greater than the target. There can be no assurance that Apollo will be successful in finding investment opportunities that meet these anticipated return parameters. Apollo's target of potential returns from an investment is not a guarantee as to the quality of the investment or a representation as to the adequacy of Apollo's methodology for estimating returns. Target returns should not be used as a primary basis for an investor's decision to make an investment. Unless otherwise indicated, target returns are presented gross and do not reflect the effect of applicable fees, incentive compensation, certain expenses and taxes.

#### Index Comparison

Index performance and yield data are shown for illustrative purposes only and have limitations when used for comparison or for other purposes due to, among other matters, volatility, credit or other factors (such as number of investments, recycling or reinvestment of distributions, and types of assets). It may not be possible to directly invest in one or more of these indices and the holdings of any strategy may differ markedly from the holdings of any such index in terms of levels of diversification, types of securities or assets represented and other significant factors. Indices are unmanaged, do not charge any fees or expenses, assume reinvestment of income and do not employ special investment techniques such as leveraging or short selling. No such index is indicative of the future results of any strategy or Apollo Fund. Set forth below is additional information about index performance and yield data included in this presentation.

Cambridge Associates Private Investments Database ("Cambridge") publishes performance benchmarks based on quarterly unaudited and annual audited financial statements produced by over 2,000 fund managers for over 7,500 funds. These benchmarks also capture gross performance information for over 81,000 investments of venture capital, growth equity, buyout, subordinated capital and private equity energy funds. It is important to note that Cambridge's benchmarks are generally reported on a one-quarter lag from the end of the performance quarter. Therefore, this index should be considered materially different from an Apollo fund's portfolio and performance, which may have the benefit of an additional quarter of performance data. Cambridge's benchmarks have limitations when used as a basis for comparison and are therefore intended to be used solely as an illustrative proxy for performance generally in the private equity space. Additional information on Cambridge can be found here.

Cambridge Associates Private Credit Index is a horizon calculation based on data compiled from 461 private credit funds, including fully-liquidated partnerships, formed between 1986 and 2018.

Cambridge Associates LLC U.S. Private Equity Index and Benchmark Statistics, as of March 31, 2021, the most recent data available, represents end-to-end pooled mean net returns to limited partners (net of fees, expenses and carried interest) for all U.S. Private Equity.

Estimated Top Quartile PE, Cambridge Associates LLC U.S. Private Equity Index and Benchmark Statistics, as of March 31, 2021, the most recent data available, is calculated by taking the 5 year, 10 year and 25 year return metrics and adding the average of the delta between Top Quartile IRRs and the Pooled Mean Net to Limited Partners for each vintage year in the selected timeframe.

Bloomberg Barclays U.S. Aggregate Bond Index ("Barclays Agg") is a market capitalization-weighted bond market index representing intermediate term investment grade bonds traded in the United States. Additional information on the Barclays Agg can be found here.

CoreLogic Home Price Index ("CoreLogic HPI") represents a comprehensive and current set of home price indexes. CoreLogic HPI features over 40 years of real estate transaction data, leveraging robust housing resale data, and monthly updates to incorporate new data. Additional information on the CoreLogic HPI can be found here.

**5&P 500 Index ("5&P 500")** is a market capitalization-weighted index of the 500 largest U.S. publicly traded companies by market value. The S&P 500 is a market value or market-capitalization-weighted index and one of the most common benchmarks for the broader U.S. equity markets. Additional information on the S&P 500 can be found here.

S&P/LSTA Leveraged Loan 100 Index ("S&P LL100") is a market value-weighted index designed to measure the performance of the U.S. leveraged loan market based upon market weightings, spreads and interest payments. Additional information on the S&P LL100 can be found here.

J.P. Morgan U.S. Liquid Index ("JULI") encompasses fixed rate high-grade coverage across the U.S. Additional information on the JULI can be found here.

#### Models

Models that may be contained herein (the "Models") are being provided for illustrative and discussion purposes only and are not intended to forecast or predict future events. Information provided in the Models may not reflect the most current data and is subject to change. The Models are based on estimates and assumptions that are also subject to change and may be subject to significant business, economic and competitive uncertainties, including numerous uncontrollable market and event driven situations. There is no guarantee that the information presented in the Models is accurate. Actual results may differ materially from those reflected and contemplated in such hypothetical, forward-looking information. Undue reliance should not be placed on such information and investors should not use the Models to make investment decisions. Apollo has no duty to update the Models in the future.

#### Pipeline Information

Fundraising and investment pipeline information herein is based on a number of assumptions that are subject to significant business, market, economic and competitive uncertainties, many of which are beyond Apollo's control or are subject to change. As such, there is no guarantee that the opportunities identified in the pipeline will be available in the future, launched, consummated or achieve target returns.

#### Funds, Products and Investments that Have Not Yet Launched/Closed

Certain Apollo Funds, products, strategies, etc. referenced herein may not have launched or closed, including but not limited to Apollo Debt Solutions BDC, Fund X and the Apollo SPAC Fund, and there can be no guarantee or assurance that they will launch or close in the future. In addition, certain transactions referenced herein, including but not limited to, the Apollo-Athene merger, FWD and Foundation, have not closed, and are subject to closing conditions. There can be no guarantee or assurance that these transactions will close.

#### References to Base Plan

References to a Base Plan throughout this presentation refer to an aspirational business plan that is hypothetical, presented for illustrative purposes only and based on a variety of assumptions. There is no guarantee that base plan results indicated herein will be achieved.

#### References to Certain Investments

Specific references to investments have been provided on a non-performance based criteria for information purposes only. Apollo makes no guarantee that similar investments would be available in the future or, if available, would be profitable. Not all investments shown are currently held by an Apollo Fund.

#### Assets Under Management

Assets under management, or "AUM", is defined in the Definitions pages. Please note that certain references to AUM provided herein may include totals from different Apollo Funds, or investments from different segments in order to present strategy related information. In addition, certain AUM figures presented herein may be rounded and as a result of certain rounding differences, totals may not reconcile with overall AUM.

#### **Ratings Information**

Apollo, its affiliates, and third parties that provide information to Apollo, such as rating agencies, do not guarantee the accuracy, completeness, timeliness or availability of any information, including ratings, and are not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, or the results obtained from the use of such content. Apollo, its affiliates and third party content providers give no express or implied warranties, including, but not limited to, any warranties of merchantability or fitness for a particular purpose or use, and they expressly disclaim any responsibility or liability for direct, indiciental, exemplary, compensatory, punitive, special or consequential damages, costs expenses, legal fees or losses (including lost income or profits and opportunity costs) in connection with the use of the information herein. Credit ratings are statements of opinions and not statements of facts or recommendations to purchase, hold or sell-securities. They do not address the suitability of securities for investment purposes and should not be relied on as investment advice. Neither Apollo nor any of its respective affiliates have any responsibility to update any of the information provided in this summary document.

Please see the Forward Looking Statements and Important Disclosures pages and Definitions pages for additional important disclosures and definitions. Historical definitions of certain terms used herein may differ from current definitions.

In addition, information about factors affecting Apollo and Athene, including a description of risks that should be considered when making a decision to purchase or sell any securities of Apollo and Athene, can be found in each company's public filings with the SEC that are available at http://www.sec.gov.

Pro forma for the merger with Athene, we expect the combined company will present its reportable business segments as asset management, retirement services and principal investing, and will report "Fee Related Earnings", "Spread Related Earnings", and "Principal Investing Income", for each segment, respectively. The asset management segment is expected to include Apollo's alternative asset management business with a focus on three strategies - yield, equity and hybrid. The retirement services segment is expected to include Apollo's strategic equity investments and performance allocations from the funds it manages, as well as certain corporate and financing activities. "Pre-tax Distributable Earnings" is the sum of (i) Fee Related Earnings, (ii) Spread Related Earnings, and (iii) Principal Investing Income and is expected to be the key performance measure used by management in evaluating the performance of the combined segments.

For current and historical periods presented in this presentation, Segment Distributable Earnings, Distributable Earnings, Fee Related Earnings, and Spread Related Earnings have the meanings set forth below:

"Segment Distributable Earnings" or "Segment DE" is the key performance measure used by management in evaluating the performance of Apollo's credit, private equity and real assets segments. Management uses Segment DE to make key operating decisions such as the following:

- . Decisions related to the allocation of resources such as staffing decisions including hiring and locations for deployment of the new hires;
- . Decisions related to capital deployment such as providing capital to facilitate growth for the business and/or to facilitate expansion into new businesses;
- Decisions related to expenses, such as determining annual discretionary bonuses and equity-based compensation awards to its employees. With respect to compensation, management seeks to align the interests of certain professionals and selected other individuals with those of the investors in the funds and those of Apollo's stockholders by providing such individuals a profit sharing interest in the performance fees earned in relation to the funds. To achieve that objective, a certain amount of compensation is based on Apollo's performance and growth for the year, and
- . Decisions related to the amount of earnings available for dividends to Class A Common Stockholders, holders of RSUs that participate in dividends and holders of AOG Units.

Segment DE is the sum of (i) total management fees and advisory and transaction fees, (ii) other income (loss), (iii) realized performance fees, excluding realizations received in the form of shares and (iv) realized investment income, net which includes dividends from our permanent capital vehicles, net of amounts to be distributed to certain employees as part of a dividend compensation program, less (x) compensation expense, excluding the expense related to equity-based awards, (y) realized profit sharing expense, and (z) non-compensation expenses. Segment DE represents the amount of Apollo's net realized earnings, excluding the effects of the consolidation of any of the related funds and SPACs, Taxes and Related Payables, transaction-related charges and any acquisitions. Transaction-related charges includes equity-based compensation charges, the amortization of intangible assets, contingent consideration, and certain other charges associated with acquisitions, and restructuring charges. In addition, Segment DE excludes non-cash revenue and expense related to equity awards granted by unconsolidated related parties to employees of the Company, compensation and administrative related expense reimbursements, as well as the assets, liabilities and operating results of the funds and VIEs that are included in the consolidated financial statements.

"Distributable Earnings" or "DE" represents Segment DE less estimated current corporate, local and non-U.S. taxes as well as the current payable under Apollo's tax receivable agreement. DE is net of preferred dividends, if any, to the Series A and Series B Preferred Stockholders. DE excludes the impacts of the remeasurement of deferred tax assets and liabilities which arises from changes in estimated future tax rates. The economic assumptions and methodologies that impact the implied income tax provision are similar to those methodologies and certain assumptions used in calculating the income tax provision for Apollo's consolidated statements of operations under U.S. GAAP. Specifically, certain deductions considered in the income tax provision under U.S. GAAP such as the deduction for transaction related charges and equity-based compensation are taken into account for purposes of the implied tax provision. Management believes that excluding the remeasurement of the tax receivable agreement and deferred taxes from Segment DE and DE, respectively, is meaningful as it increases comparability between periods. Remeasurement of the tax receivable agreement and deferred taxes are estimates that may change due to changes in interpretations of tax law.

"Fee Related Earnings", or "FRE", is derived from our segment reported results and refers to a component of DE that is used as a supplemental performance measure to assess whether revenues that we believe are generally more stable and predictable in nature, primarily consisting of management fees, are sufficient to cover associated operating expenses and generate profits. FRE is the sum across all segments of (i) management fees, (iii) advisory and transaction fees, (iii) performance fees related to business development companies, Redding Ridge Holdings, and MidCap and (iv) other income, net, less (x) salary, bonus and benefits, excluding equity-based compensation (y) other associated operating expenses and (z) non-controlling interests in the management companies of certain funds the Company manages.

"Spread Related Earnings", or "SRE" is derived from segment reported results and refers to a component of DE that is used as a supplemental performance measure to assess the performance of the Retirement Services segment excluding certain market volatility and expenses related to integration, restructuring, equity-based compensation, and other expenses. For the Retirement Services segment, SRE equals the sum of (i) the net investment income earned on Athene's net invested assets and (ii) management fees earned on the ADIP share of ACRA assets, less (x) cost of funds, including cost of crediting and other liability costs, (y) operating expenses excluding equity-based compensation and (z) financing costs including interest expense and preferred dividends paid to Athene Preferred Stockholders.

For future periods presented in this presentation, which are pro-forma for the merger with Athene and assume the establishment of asset management, retirement services and principal investing as the combined company's reportable business segments, Fee Related Earnings, Spread Related Earnings, Principal Investing Income, Distributable Earnings and Pre-tax Distributable Earnings have the meanings set forth below:

"Fee Related Earnings", or "FRE", is derived from segment reported results and refers to a component of DE that is used as a supplemental performance measure to assess the performance of the asset management segment. FRE is the sum of (i) management fees, (iii) advisory and transaction fees, (iii) performance fees related to business development companies, Redding Ridge Holdings, and MidCap and (iv) other income, net, less (x) salary, bonus and benefits, excluding equity-based compensation (y) other associated operating expenses and (z) non-controlling interests in the management companies of certain funds the Company manages.

"Spread Related Earnings", or "SRE" is derived from segment reported results and refers to a component of DE that is used as a supplemental performance measure to assess the performance of the Retirement Services segment excluding certain market volatility and expenses related to integration, restructuring, equity-based compensation, and other expenses. For the Retirement Services segment, SRE equals the sum of (i) the net investment income earned on Athene's net invested assets and (ii) management fees earned on the ADIP share of ACRA assets, less (x) cost of funds, including cost of crediting and other liability costs, (y) operating expenses excluding equity-based compensation and (z) financing costs including interest expense and preferred dividends paid to Athene Preferred Stockholders.

"Principal Investing Income", or "PII" is derived from segment reported results and refers to a component of DE that is used as a supplemental performance measure to assess the performance of the Principal Investing segment. For the Principal Investing segment, PII is the sum of (i) realized performance fees, excluding realizations received in the form of shares, (ii) realized investment income, net which includes dividends from our permanent capital vehicles, net of amounts to be distributed to certain employees as part of a dividend compensation program, less (x) compensation expense, excluding expense related to equity-based compensation, (y) realized profit sharing expense, and (z) certain corporate non-compensation expenses and financing costs including preferred dividends, if any, paid to the Apollo Preferred Stockholders.

"Pre-tax Distributable Earnings", or "Pre-tax DE'; is the key performance measure used by management in evaluating the performance of the asset management, retirement services and principal investing segments. Management uses Pre-tax DE to make key operating decisions such as the following:

- Decisions related to the allocation of resources such as staffing decisions including hiring and locations for deployment of the new hires;
- . Decisions related to capital deployment such as providing capital to facilitate growth for the business and/or to facilitate expansion into new businesses;
- Decisions related to expenses, such as determining annual discretionary bonuses and equity-based compensation awards to its employees. With respect to compensation, management seeks to align the interests of certain professionals and selected other individuals with those of the investors in the funds and those of Apollo's stockholders by providing such individuals a profit sharing interest in the performance fees earned in relation to the funds. To achieve that objective, a certain amount of compensation is based on Apollo's performance and growth for the year; and
- . Decisions related to the amount of earnings available for dividends to Class A Common Stockholders and holders of RSUs that participate in dividends.

Pre-tax DE is the sum of (i) Fee Related Earnings, (ii) Spread Related Earnings, and (iii) Principal Investing Income. Pre-tax DE excludes the effects of the consolidation of any of the related funds and SPACs, Taxes and Related Payables, transaction-related charges and any acquisitions. Transaction-related charges includes equity-based compensation charges, the amortization of intangible assets, contingent consideration, and certain other charges associated with acquisitions, and restructuring charges. In addition, Pre-tax DE excludes non-cash revenue and expense related to equity awards granted by unconsolidated related parties to employees of the Company, compensation and administrative related expense reimbursements, as well as the assets, liabilities and operating results of the funds and VIEs that are included in the consolidated financial statements.

"Distributable Earnings" or "DE" represents Pre-tax DE less estimated income taxes. Income taxes on FRE and PII represents the total current corporate, local, and non-U.S. taxes as well as the current payable under Apollo's tax receivable agreement. Income taxes on FRE and PII excludes the impacts of deferred taxes and the remeasurement of the tax receivable agreement, which arise from changes in estimated future tax rates. Certain assumptions and methodologies that impact the implied FRE and PII income tax provision are similar to those used under U.S. GAAP. Specifically, certain deductions considered in the income tax provision under U.S. GAAP relating to transaction related charges and equity-based compensation are taken into account for the implied tax provision. Income Taxes on SRE represent the total current and deferred tax expense or benefit on income before taxes adjusted to eliminate the impact of the tax expense or benefit associated with the non-operating adjustments. Management believes the methodologies used to compute income taxes on FRE, PII, SRE are meaningful to each segment and increases comparability of income taxes between periods.

"ACRA" refers to Athene Co-Invest Reinsurance Affiliate 1A Ltd.

"ADIP" refers to Apollo/Athene Dedicated Investment Program.

"Apollo" refers to Apollo Global Management, Inc., together with its subsidiaries.

"Apollo Operating Group" or "AOG" refers to (i) the limited partnerships and limited liability companies through which Apollo currently operates its businesses and (ii) one or more limited partnerships or limited liability companies formed for the purpose of, among other activities, holding certain of Apollo's gains or losses on its principal investments in the funds.

"Assets Under Management" or "AUM" refers to the assets of the funds, partnerships and accounts to which Apollo provides investment management, advisory, or certain other investment-related services, including, without limitation, capital that such funds, partnerships and accounts have the right to call from investors pursuant to capital commitments. Our AUM equals the sum of:

- the net asset value ("NAV"), plus used or available leverage and/or capital commitments, or gross assets plus capital commitments, of the yield and certain hybrid funds, partnerships and accounts for which we provide investment
  management or advisory services, other than certain collateralized loan obligations ("CLOs"), collateralized debt obligations ("CLOs"), and certain permanent capital vehicles, which have a fee-generating basis other than the mark-to-market
  value of the underlying assets; for certain permanent capital vehicles in yield, gross asset value plus available financing capacity;
- the fair value of the investments of the equity and certain hybrid funds, partnerships and accounts Apollo manages or advise, plus the capital that such funds, partnerships and accounts are entitled to call from investors pursuant to capital commitments, plus portfolio level financings;
- 3. the gross asset value associated with the reinsurance investments of the portfolio company assets Apollo manages or advises; and
- 4. the fair value of any other assets that Apollo manages or advises for the funds, partnerships and accounts to which Apollo provides investment management, advisory, or certain other investment-related services, plus unused credit facilities, including capital commitments to such funds, partnerships and accounts for investment that may require pre- qualification or other conditions before investment plus any other capital commitments to such funds, partnerships and accounts available for investment that are not otherwise included in the clauses above.

Apollo's AUM measure includes Assets Under Management for which Apollo charges either nominal or zero fees. Apollo's AUM measure also includes assets for which Apollo does not have investment discretion, including certain assets for which Apollo earns only investment-related service fees, rather than management or advisory fees. Apollo's definition of AUM is not based on any definition of Assets Under Management contained in its governing documents or in any of Apollo Fund management agreements. Apollo considers multiple factors for determining what should be included in its definition of AUM. Such factors include but are not limited to (1) Apollo's ability to influence the investment decisions for existing and available assets; (2) Apollo's ability to generate income from the underlying assets in its funds; and (3) the AUM measures that Apollo uses internally or believe are used by other investment managers. Given the differences in the investment strategies and structures among other alternative investment managers. Apollo's calculation of AUM may differ from the calculations employed by other investment managers and, as a result, this measure may not be directly comparable to similar measures presented by other investment managers. Apollo's calculation also differs from the manner in which its affiliates registered with the SEC report "Regulatory Assets Under Management" on Form ADV and Form PF in various ways.

Apollo uses AUM, Capital deployed and Dry powder as performance measurements of its investment activities, as well as to monitor fund size in relation to professional resource and infrastructure needs.

"Fee-Generating AUM" or "FGAUM" consists of assets of the funds, partnerships and accounts to which we provide investment management, advisory, or certain other investment-related services and on which we earn management fees, monitoring fees or other investment-related fees pursuant to management or other fee agreements on a basis that varies among the Apollo funds, partnerships and accounts. Management fees are normally based on "net asset value," "gross assets," "adjusted par asset value," "adjusted cost of all unrealized portfolio investments," "capital commitments," "adjusted assets," "stockholders' equity," "invested capital" or "capital contributions," each as defined in the applicable management agreement. Monitoring fees, also referred to as advisory fees, with respect to the structured portfolio company investments of the funds, partnerships and accounts we manage or advise, are generally based on the total value of such structured portfolio company investments, which normally includes leverage, less any portion of such total value that is already considered in Fee-Generating AUM.

"Athene" refers to Athene Holding Ltd. (together with its subsidiaries, "Athene"), a leading retirement services company that issues, reinsures and acquires retirement savings products designed for the increasing number of individuals and institutions seeking to fund retirement needs, and to which Apollo, through its consolidated subsidiary Apollo Insurance Solutions Group LP (formerly known as Athene Asset Management LLC) ("ISG"), provides asset management and advisory services.

"Athora" refers to a strategic platform that acquires or reinsures blocks of insurance business in the German and broader European life insurance market (collectively, the "Athora Accounts").

"Advisory" / "Other Assets" refers to certain assets advised by Apollo Asset Management Europe PC LLP ("AAME PC"), a wholly-owned subsidiary of Apollo Asset Management Europe LLP ("AAME"). AAME PC and AAME are subsidiaries of Apollo and are collectively referred to herein as "ISGI".

"Capital deployed" or "Capital deployment" or "Deployment" represents (i) the aggregate amount of capital that has been invested during a given period (including leverage) by our commitment based funds and SIAs that have a defined maturity date, (ii) purchases of investments (net of sales) by our subscription and contribution based funds and mandates (including leverage), (iii) investments originated by certain of our platform companies, net of syndications to our other funds and accounts, but including syndications to third parties, and (iv) third-party investment activity in opportunities sourced by our teams for which we earn a fee and in which we participate. Deployment excludes offsetting short positions, certain credit derivatives, certain short-dated government securities, and involuntary repayment of loans and bonds.

"FRE margin" is calculated as Fee Related Earnings divided by fee related revenues (which includes management fees, transaction and advisory fees and certain performance fees), as well as other income attributable to FRE.

"Gross IRR" of Accord Series, Structured Credit Recovery and the European Principal Finance funds represents the annualized return of a fund based on the actual timing of all cumulative fund cash flows before management fees, performance fees allocated to the general partner and certain other expenses. Calculations may include certain investors that do not pay fees. The terminal value is the net asset value as of the reporting date. Non-U.S. dollar denominated ("USD") fund cash flows and residual values are converted to USD using the spot rate as of the reporting date. In addition, gross IRRs at the fund level will differ from those at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Gross IRR does not represent the return to any fund investor.

"Gross IRR" of Flagship Private Equity and Hybrid Value Fund represents the cumulative investment-related cash flows (i) for a given investment for the fund or funds which made such investment, and (ii) for a given fund, in the relevant fund itself (and not any one investor in the fund), in each case, on the basis of the actual timing of investment inflows and outflows (for unrealized investments assuming disposition on June 30, 2021 or other date specified) aggregated on a gross basis quarterly, and the return is annualized and compounded before management fees, performance fees and certain other expenses (including interest incurred by the fund itself) and measures the returns on the fund's investments as a whole without regard to whether all of the returns would, if distributed, be payable to the fund's investors. In addition, gross IRRs at the fund level will differ from those at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Gross IRR does not represent the return to any fund investor.

"Gross IRR" of Real Estate Equity, Hybrid Real Estate and Infrastructure funds represents the cumulative investment-related cash flows in the fund itself (and not any one investor in the fund), on the basis of the actual timing of cash inflows and outflows (for unrealized investments assuming disposition on June 30, 2021 or other date specified) starting on the date that each investment closes, and the return is annualized and compounded before management fees, performance fees, and certain other expenses (including interest incurred by the fund itself) and measures the returns on the fund's investments as a whole without regard to whether all of the returns would, if distributed, be payable to the fund's investors. Non-USD fund cash flows and residual values are converted to USD using the spot rate as of the reporting date. In addition, gross IRRs at the fund level will differ from those at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Gross IRR does not represent the return to any fund investor.

"Gross MOIC" means, with respect to a given investment, fund, or the infrastructure performance metrics, the ratio of Total Value to Total Invested Capital. As used in this definition:

- "Realized Value" refers to all cash investment proceeds received by the relevant Apollo Fund, including interest and dividends, but does not give effect to management fees, expenses, incentive compensation or performance fees to be paid by such Apollo Fund.
- "Total Invested Capital" refers to the aggregate cash invested by the relevant Apollo Fund and includes capitalized costs relating to investment activities, if any, but does not give effect to cash pending investment or available for reserves and excludes amounts, if any, invested on a financed basis with leverage facilities.
- . "Total Value" represents the sum of the total Realized Value and Unrealized Value of investments
- "Unrealized Value" refers to the fair value consistent with valuations determined in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP"), for investments not yet realized and may include payments in kind, accrued interest and dividends receivable, if any, and before the effect of certain taxes. In addition, amounts include committed and funded amounts for certain investments.

"Gross Return" of a yield fund is the monthly or quarterly time-weighted return that is equal to the percentage change in the value of a fund's portfolio, adjusted for all contributions and withdrawals (cash flows) before the effects of management fees, incentive fees allocated to the general partner, or other fees and expenses. Returns for yield funds are calculated for all funds and accounts in the respective strategies excluding assets for Athene, Athora and certain other entities where Apollo manages or may manage a significant portion of the total company assets. Returns of CLOs represent the gross returns over multiple periods are calculated by geometrically linking each period's return over time.

"Inflows" represents (i) at the individual segment level, subscriptions, commitments, and other increases in available capital, such as acquisitions or leverage, net of inter-segment transfers, and (ii) on an aggregate basis, the sum of inflows across the yield, equity and hybrid business strategies.

"Net IRR" of Accord Series, Structured Credit Recovery and the European Principal Finance funds represents the annualized return of a fund after management fees, performance fees allocated to the general partner and certain other expenses, calculated on investors that pay such fees. The terminal value is the net asset value as of the reporting date. Non-USD fund cash flows and residual values are converted to USD using the spot rate as of the reporting date. In addition, net IRR at the fund level will differ from that at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Net IRR does not represent the return to any fund investor.

"Net IRR" of Flagship Private Equity and Hybrid Value Fund means the gross IRR applicable to the funds, including returns for related parties which may not pay fees or performance fees, net of management fees, certain expenses (including interest incurred or earned by the fund itself) and realized performance fees all offset to the extent of interest income, and measures returns at the fund level on amounts that, if distributed, would be paid to investors of the fund. The timing of cash flows applicable to investments, management fees and certain expenses, may be adjusted for the usage of a fund's subscription facility. To the extent that a fund exceeds all requirements detailed within the applicable fund agreement, the estimated unrealized value is adjusted such that a percentage of up to 20.0% of the unrealized gain is allocated to the general partner of such fund, thereby reducing the balance attributable to fund investors. In addition, net IRR at the fund level will differ from that at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Net IRR does not represent the return to any fund investor.

"Net IRR" of Real Estate Equity, Hybrid Real Estate and Infrastructure represents the cumulative cash flows in the fund (and not any one investor in the fund), on the basis of the actual timing of cash inflows received from and outflows paid to investors of the fund (assuming the ending net asset value as of June 30, 2021 or other date specified is paid to investors), excluding certain non-fee and non-performance fee bearing parties, and the return is annualized and compounded after management fees, performance fees, and certain other expenses (including interest incurred by the fund itself) and measures the returns to investors of the fund as a whole. Non-USD fund cash flows and residual values are converted to USD using the spot rate as of the reporting date. In addition, net IRR at the fund level will differ from that at the individual investor level as a result of, among other factors, timing of investor-level inflows and outflows. Net IRR does not represent the return to any fund investor.

"Permanent Capital" means capital of indefinite duration, which may be withdrawn under certain conditions.

"Permanent Capital Vehicles" refers to (a) assets that are owned by or related to Athene or Athora Holding Ltd. ("Athora Holding" and together with its subsidiaries, "Athora"), (b) assets that are owned by or related to MidCap FinCo Designated Activity Company ("MidCap") and managed by Apollo, (c) assets of publicly traded vehicles managed by Apollo such as Apollo Investment Corporation ("AINV"), Apollo Commercial Real Estate Finance, Inc. ("AFI"), Apollo Tactical Income Fund Inc. ("AIF"), and Apollo Senior Floating Rate Fund Inc. ("AFI"), in each case that do not have redemption provisions or a requirement to return capital to investors upon exiting the investments made with such capital, except as required by applicable law and (d) a non-traded business development company from which Apollo earns certain investment-related service fees. The investment management agreements of AINV, AIF and AFT have one year terms, are reviewed annually and remain in effect only if approved by the boards of directors of such companies or by the directors who are not "interested persons" as one year term and is reviewed annually by ARI's board of directors and may be terminated under certain circumstances by an affirmative vote of at least two-thirds of ARI's independent directors. The investment management of ARI has a one year term and apollo, attene and Apollo, and Apollo, may also be terminated under certain circumstances. The agreement pursuant to which Apollo earns certain investment-related service fees from a non-traded business development company may be terminated under certain limited circumstances.

"Redding Ridge" refers to Redding Ridge Asset Management, LLC and its subsidiaries, which is a standalone, self-managed asset management business established in connection with risk retention rules that manages CLOs and retains the required risk retention interests.

"Vintage Year" refers to the year in which a fund's final capital raise occurred, or, for certain funds, the year of a fund's effective date or the year in which a fund's investment period commences pursuant to its governing agreements.

# Non-GAAP Financial Information & Definitions (Athene)

In addition to our results presented in accordance with GAAP, we present certain financial information that includes non-GAAP measures. Management believes the use of these non-GAAP measures, together with the relevant GAAP measures information that may enhance an investor's understanding of our results of operations and the underlying profitability drivers of our business. The majority of these non-GAAP measures are intended to remove from the results of operations the impact of market volatility (other than with respect to alternative investments) as well as integration, restructuring and certain other expenses which are not part of our underlying profitability drivers, as such items fluctuate from period to period in a manner inconsistent with these drivers. These measures should be considered supplementary to our results in accordance with GAAP and should not be viewed as a substitute for the corresponding GAAP measures.

### Adjusted Operating Income (Loss) Available to Common Shareholders

Adjusted operating income (loss) available to common shareholders is a non-GAAP measure used to evaluate our financial performance excluding market volatility and expenses related to integration, restructuring, stock compensation and other expenses. Our adjusted operating income (loss) available to common shareholders equals net income (loss) available to AHL common shareholders adjusted to eliminate the impact of the following (collectively, the non-operating adjustments):

- Investment Gains (Losses), Net of Offsets—Consists of the realized gains and losses on the sale of AFS securities, the change in fair value of reinsurance assets, unrealized gains and losses, changes in the credit loss allowance, and other investment gains and losses. Unrealized, allowances and other investment gains and losses are comprised of the fair value adjustments of trading securities (other than CLOs) and investments held under the fair value option, derivative gains and losses not hedging FIA index credits, and the change in credit loss allowances recognized in operations net of the change in AmerUs Closed Block fair value reserve related to the corresponding change in fair value of investments. Investment gains and losses are net of offsets related to DAC, DSI, and VOBA amortization and changes to guaranteed lifetime withdrawal benefit (GLWB) and guaranteed minimum death benefit (GMDB) reserves (together, GLWB and GMDB reserves represent rider reserves) as well as the market value adjustments (MVA) associated with surrenders or terminations of contracts.
- Change in Fair Values of Derivatives and Embedded Derivatives FIAs, Net of Offsets—Consists of impacts related to the fair value accounting for derivatives hedging the FIA index credits and the related embedded derivative liability fluctuations from period to period. The index reserve is measured at fair value for the current period and all periods beyond the current policyholder index term. However, the FIA hedging derivatives are purchased to hedge only the current index period. Upon policyholder renewal at the end of the period, new FIA hedging derivatives are purchased to align with the new term. The difference in duration between the FIA hedging derivatives and the index credit reserves creates a timing difference in earnings. This timing difference of the FIA hedging derivatives and index credit reserves is included as a non-operating adjustment, net of offsets related to DAC, DSI, and VOBA amortization and changes to rider reserves.

We primarily hedge with options that align with the index terms of our FIA products (typically 1–2 years). On an economic basis, we believe this is suitable because policyholder accounts are credited with index performance at the end of each index term. However, because the term of an embedded derivative in an FIA contract is longer-dated, there is a duration mismatch which may lead to mismatches for accounting purposes.

- Integration, Restructuring, and Other Non-operating Expenses—Consists of restructuring and integration expenses related to acquisitions and block reinsurance costs as well as certain other expenses, which are not predictable or related to our underlying profitability drivers.
- Stock Compensation Expense—Consists of stock compensation expenses associated with our share incentive plans, excluding our long-term incentive plan, which are not related to our underlying profitability drivers and fluctuate from time to time due to the structure of our plans.
- Income Tax (Expense) Benefit Non-operating—Consists of the income tax effect of non-operating adjustments and is computed by applying the appropriate jurisdiction's tax rate to the non-operating adjustments that are subject to income tax.

We consider these non-operating adjustments to be meaningful adjustments to net income (loss) available to AHL common shareholders for the reasons discussed in greater detail above. Accordingly, we believe using a measure which excludes the impact of these items is useful in analyzing our business performance and the trends in our results of operations. Together with net income (loss) available to AHL common shareholders, we believe adjusted operating income (loss) available to common shareholders provides a meaningful financial metric that helps investors understand our underlying results and profitability. Adjusted operating income (loss) available to common shareholders should not be used as a substitute for net income (loss) available to AHL common shareholders.

# Non-GAAP Financial Information & Definitions (Athene) Cont'd

### **Adjusted Operating ROE**

Adjusted operating ROE is a non-GAAP measure used to evaluate our financial performance excluding the impacts of AOCI and the cumulative change in fair value of funds withheld and modco reinsurance assets, net of DAC, DSI, rider reserve and tax offsets. Adjusted AHL common shareholders' equity is calculated as the ending AHL shareholders' equity excluding AOCI, the cumulative change in fair value of funds withheld and modco reinsurance assets and preferred stock. Adjusted operating ROE is calculated as the adjusted operating income (loss) available to common shareholders, divided by average adjusted AHL common shareholders' equity. These adjustments fluctuate period to period in a manner inconsistent with our underlying profitability drivers as the majority of such fluctuation is related to the market volatility of the unrealized gains and losses associated with our AFS securities. Except with respect to reinvestment activity relating to acquired blocks of businesses, we typically buy and hold AFS investments to maturity throughout the duration of market fluctuations, therefore, the period-over-repriod impacts in unrealized gains and losses are not necessarily indicative of current operating fundamentals or future performance.

Accordingly, we believe using measures which exclude AOCI and the cumulative change in fair value of funds withheld and modco reinsurance assets are useful in analyzing trends in our operating results. To enhance the ability to analyze these measures across periods, interim periods are annualized. Adjusted operating ROE should not be used as a substitute for ROE. However, we believe the adjustments to net income (loss) available to AHL common shareholders' equity are significant to gaining an understanding of our overall financial performance.

#### Invested Assets

In managing our business, we analyze net invested assets, which does not correspond to total investments, including investments in related parties, as disclosed in our consolidated financial statements and notes thereto. Net invested assets represents the investments that directly back our net reserve liabilities as surplus assets. Net invested assets, excluding our investment in Apollo, is used in the computation of net investment earned rate, which allows us to analyze the profibility of our investment portfolio. Net invested assets includes (a) total investments on the consolidated balance sheets with AFS securities at cost or amortized cost, excluding derivatives, (b) cash and cash equivalents and restricted cash, (c) investments and noncontrolling interest adjustments (f) net investment payables and receivables, (g) policy loans ceded (which offset the direct policy loans in total investments) and (h) an allowance for credit losses. Net invested assets also excludes assets associated with funds withheld liabilities related to business exited through reinsurance agreements and derivative collateral (offsetting the related cash positions). We include the underlying investments supporting our assumed funds withheld and modco agreements in our net invested assets calculation in order to match the assets with the income received. We believe the adjustments for reinsurance provide a view of the assets for which we have economic exposure. Net invested assets includes our proportionate share of ACRA investments, based on our economic ownership, but does not include the proportionate share of investment sand with the noncontrolling interest. Net invested assets also includes our investment in Apollo. Our net invested assets, excluding our investment in Apollo, are averaged over the number of quarters in the relevant period to compute our net investment earned rate for such period. While we believe net invested assets is a meaningful financial metric and enhances our understanding of the underlying drivers of our in

### **Reserve Liabilities**

In managing our business, we also analyze net reserve liabilities, which does not correspond to total liabilities as disclosed in our consolidated financial statements and notes thereto. Net reserve liabilities represent our policyholder liabilities include (a) the interest sensitive contract liabilities, (b) future policy benefits, (c) dividends payable to policyholders, and (d) other policy claims and benefits, offset by reinsurance recoverable, excluding policy loans ceded. Net reserve liabilities include our proportionate share of ACRA reserve liabilities, based on our economic ownership, but does not include the proportionate share of reserve liabilities associated with the noncontrolling interest. Net reserve liabilities is net of the ceded liabilities to third-party reinsurers as the costs of the liabilities are passed to such reinsurers and, therefore, we have no net economic exposure to such liabilities, assuming our reinsurance counterparties perform under our agreements. The majority of our ceded reinsurance is a reservel in the reinsurance for economic exposures to such liabilities and related reinsurance recoverables to continue to be recorded in our consolidated financial statements despite the transfer of economic risk to the counterparty in connection with the reinsurance transaction. While we believe net reserve liabilities is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for total liabilities presented under GAAP.

#### Sales

Sales statistics do not correspond to revenues under GAAP but are used as relevant measures to understand our business performance as it relates to inflows generated during a specific period of time. Our sales statistics include inflows for fixed rate annuities and FIAs and align with the LIMRA definition of all money paid into an individual annuity, including money paid into new contracts with initial purchase occurring in the specified period and existing contracts with initial purchase occurring to the specified period (excluding internal transfers). While we believe sales is a meaningful metric and enhances our understanding of our business performance, it should not be used as a substitute for premiums presented under GAAP.

## Non-GAAP Financial Information & Definitions (Athene) Cont'd

#### **Adjusted Operating ROA**

Adjusted operating ROA is a non-GAAP measure used to evaluate our financial performance and profitability. Adjusted operating ROA is computed using our adjusted operating income (loss) available to common shareholders divided by average net invested assets for the relevant period. To enhance the ability to analyze this measure across periods, interim periods are annualized. While we believe this metric is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for ROA presented under GAAP.

#### Net Investment Spread, Investment Margin on Deferred Annuities and Operating Expenses

Net investment spread is a key measure of profitability. Net investment spread measures our investment performance less the total cost of our liabilities. Net investment acreed rate is a key measure of our investment performance, while cost of funds is a key measure of the cost of our policyholder benefits and liabilities. Investment margin on our deferred annuities measures our investment performance less the cost of crediting for our deferred annuities, which make up a significant portion of our net research liabilities.

Net investment earned rate is a non-GAAP measure we use to evaluate the performance of our net invested assets that does not correspond to GAAP net investment income. Net investment earned rate is computed as the income from our net invested assets divided by the average net investment assets, excluding the impacts of our investment in Apollo, for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized. The adjustments to net investment income to arrive at our net investment earned rate add (a) alternative investment gains and losses (b) gains and losses related to trading securities for CLOs, (c) net VIE impacts (revenues, expenses and noncontrolling interest), (d) forward points gains and losses on foreign exchange derivative hedges and (e) the change in fair value of reinsurance assets as well as the gain or loss on our investment in Apollo. We include the income and assets supporting our change in fair value of reinsurance assets by evaluating the underlying investments of the funds withheld at interest receivables and we include the net investment income from those underlying investments which does not correspond to the GAAP presentation of change in fair value of reinsurance assets. We exclude the income and assets supporting business that we have exited through ceded reinsurance including funds withheld agreements. We believe the adjustments for reinsurance provide a net investment earned rate on the assets for which we have economic exposure.

Cost of funds includes liability costs related to cost of crediting on both deferred annuities and institutional products as well as other liability costs, but does not include the proportionate share of the ACRA cost of funds associated with the noncontrolling interest. Cost of funds is computed as the total liability costs divided by the average net invested assets, excluding our investment in Apollo, for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized.

Cost of crediting includes the costs for both deferred annuities and institutional products. Cost of crediting on deferred annuities is the interest credited to the policyholders on our fixed strategies as well as the option costs on the indexed annuity strategies. With respect to FIAs, the cost of providing index credits includes the expenses incurred to fund the annual index credits, and where applicable, minimum guaranteed interest credited. Cost of crediting on institutional products is comprised of (i) PRT costs, including interest credited, benefit payments and other reserve changes, net of premiums received when issued, and (ii) funding agreement costs, including the interest payments and other reserve changes. Cost of crediting is computed as the cost of crediting for deferred annuities and institutional products divided by the average net invested assets, excluding the investment in Apollo, for the relevant periods. Cost of crediting on deferred annuities is computed as the net interest credited on fixed strategies and option costs on indexed annuity strategies divided by the average net invested assets, excluding our investment in Apollo, for the relevant periods is computed as the PRT and funding agreement costs divided by the average net institutional reserve liabilities. Our average net invested assets, excluding our investment in Apollo, net account values and net institutional reserve liabilities are averaged over the number of quarters in the relevant period to obtain our associated cost of crediting for such period. To enhance the ability to analyze these measures across periods, interim periods are annualized.

Other liability costs include DAC, DSI and VOBA amortization, change in rider reserves, the cost of liabilities on products other than deferred annuities and institutional products, excise taxes, premiums, product charges and other revenues. We believe a measure like other liability costs is useful in analyzing the trends of our core business operations and profitability. While we believe other liability costs is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for total benefits and expenses presented under GAAP.

Net investment earned rate, cost of funds, net investment spread and investment margin on deferred annuities are non-GAAP measures we use to evaluate the profitability of our business. We believe these metrics are useful in analyzing the trends of our business operations, profitability and pricing discipline. While we believe each of these metrics are meaningful financial metrics and enhance our understanding of the underlying profitability drivers of our business, they should not be used as a substitute for net investment income, interest sensitive contract benefits or total benefits and expenses presented under GAAP.

Operating expenses excludes integration, restructuring and other non-operating expenses, stock compensation expense, interest expense and policy acquisition expenses. We believe a measure like operating expenses is useful in analyzing the trends of our core business operations and profitability. While we believe operating expenses is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for policy and other operating expenses presented under GAAP.

# Non-GAAP Financial Information & Definitions (Athene) Cont'd

### Adjusted Operating Common Shares Outstanding and Adjusted Book Value Per Common Share

Adjusted operating common shares outstanding and adjusted book value per common share are non-GAAP measures used to evaluate our financial performance and financial condition. The non-GAAP measures adjust the number of shares included in the corresponding GAAP measures to reflect the conversion or settlement of all shares and other stock-based awards outstanding. We believe these measures represent an economic view of our share counts and provide a simplified and consistent view of our outstanding shares. Adjusted book value per common share is calculated as the adjusted AHL common shares's equity divided by the adjusted operating common shares on a one-for-one basis at any time. Our Class M common shares were converted into Class A common shares were economically functioned as options as they were convertible into Class A common shares after vesting and payment of the conversion price. Adjusted operating common shares outstanding assumes conversion or settlement of all outstanding items that are able to be converted to or settled in Class A common shares, including the impacts of Class B common shares on a one-for-one basis, the impacts of all Class M common shares net of the conversion price and any other stock-based awards, but excluding any awards for which the exercise or conversion price exceeds the market value of our Class A common shares on the applicable measurement date. For certain historical periods, Class M shares were not included due to issuance restrictions which were contingent upon our IPO. Adjusted operating common shares outstanding an understanding of our overall results of operations and financial condition.

### **Adjusted Debt to Capital Ratio**

Adjusted debt to capital ratio is a non-GAAP measure used to evaluate our capital structure excluding the impacts of AOCI and the cumulative change in fair value of funds withheld and modco reinsurance assets, net of DAC, DSI, rider reserve and tax offsets. Adjusted debt to capital ratio is calculated as total debt divided by adjusted AHL shareholders' equity. Adjusted debt to capital ratio should not be used as a substitute for the debt to capital ratio. However, we believe the adjustments to shareholders' equity are significant to gaining an understanding of our capitalization, debt utilization and debt capacity.

### STRATEGY & OUTLOOK

### We Produce Excess Return Across the Risk Spectrum

- 1. As of 1Q21, trailing 5-year average yield of comparable quality and duration US corporate bond indices at the time of HGA Investment Grade Issuance or Purchase.
- 2. Peers represent a weighted average of AEL, AIG, AFG, FGL, LNC, MET, PRU, and PFG for the 5 years 2016 to 2020. Source: SNL Financial, Company Filings. Net asset yield calculated based on average stat investment yield on bonds and mortgages disclosed in annual U.S. life insurance statutory fillings. Stat investment yield reduced for each company's respective investment fees and expenses approximated by taking annual GAAP investment expenses divided by average GAAP invested assets. Athene's stat investment yield was adjusted to include assets in Bermuda entities and separate accounts backing pension risk transfer transactions, and to back out the impact of the larger Lincoln and Jackson National block trades during their respective 12 months deployment periods, as well as the impact of PRT transactions > \$750mm that closed in December on yields in the year that they closed. The Apollo Large Corporate Credit universe was selected to include publicly priced syndicated loans, denominated in USD, that had at least \$100mm of market value held across the Apollo credit platform from January 2015 to June 2021. Market value includes accrued income. P&L and returns exclude FX gains and losses as well as cash and cash equivalents. Returns are calculated daily on a gross basis and are geometrically linked, annualized and assumes one turn of leverage with no cost of leverage.
- 3. As provided by ThomsonOne. Represents total U.S. Credit Opportunities, Senior Debt and Subordinated Capital funds with 2018 vintages net IRR through Q1 2021.
- 4. Reflects composite returns of Accord Fund I, Accord Fund II, Accord Fund III, Accord Fund III B and Accord Fund IV from the date of the funding of Accord Fund I's first call in February 2017 through June 30, 2021.
- 5. As provided by Cambridge Associates, as of Q1 2021. Represents total U.S. Credit Opportunities, Senior Debt and Subordinated Capital funds with 2018 vintages net IRR through Q1 2021. Reflects latest data available.
- 6. As provided by Cambridge Associates, as of Q1 2021. Represents total U.S. Credit Opportunities, Senior Debt, Subordinated Capital and Buyout funds with 2018 vintages net IRR through Q1 2021. Reflects latest data available.

### STRATEGY & OUTLOOK

### Athene Has A Simple, Spread-Based Business Model

- Net asset yield calculated based on average stat investment yield on bonds and mortgages disclosed in annual U.S. life insurance statutory fillings. Stat investment yield reduced for each company's respective investment fees and expenses approximated by taking annual GAAP investment expenses divided by average GAAP invested assets. Athene's stat investment yield was adjusted to include assets in Bermuda entities and separate accounts backing pension risk transfer transactions, and to back out the impact of the larger Lincoln and Jackson National block trades during their respective 12 months deployment periods, as well as the impact of PRT transactions >\$750mm that closed in December on yields in the year that they closed.
- 2. General and administrative expense ratios calculated as U.S. statutory general & administrative expenses divided by average U.S. statutory net total assets.
- 3. Adjusted operating income for common shareholders excluding Apollo divided by average net invested assets excluding AOG.
- 13x leverage for illustrative purposes.
- 5. Adjusted Operating ROE as reported externally.

### Athene is Uniquely Positioned in the Industry

- 1. Athene metrics are net of non-controlling interest in ACRA, as of June 30, 2021. AA-/A+ Rated Companies metrics as of December 31, 2020 per SNL Financial. AA-/A+ Rated Companies are: PFG (A+), PRU (AA-), MET (AA-) and GL (AA-).
- 2. Refers to adjusted debt-to-capital ratio as of June 30, 2021. AA-/A+ Rated Companies metrics as of December 31, 2020. AA-/A+ Rated Companies are: PFG (A+), PRU (AA-), MET (AA-) and GL (AA-).
- Peer U.S. statutory impairments per SNL Financial, average includes AEL, AIG, AMP, BHF, EQH, FG, LNC, MET, PFG, PRU, VOYA and Transamerica. For Athene, U.S. statutory data adjusted to include impairments and assets in Bermuda Linked presentations are not incorporated by reference.
- General and administrative expense ratios calculated as U.S. statutory general & administrative expenses divided by average U.S. statutory net total assets. "Industry" represents a weighted average of AEL, AIG, AFG, FGL, LNC, MET, PRU, and PFG for the 5 years 2016 to 2020.

### Athene Represents a Strategic Purchase for Apollo

- 1. Pre-deal share price as of March 5, 2021. Current share price as of October 15, 2021.
- 2. Apollo will consolidate 100% of Athene earnings as Apollo does not consolidate earnings on its stake in Athene pre-merger. Excludes reported or forecasted earnings from Athene's investment in Apollo Operating Group.
- Athene adjusted operating income excludes earnings on stake in Apollo. Pro forma consensus 2021E calculated as consensus pre-tax income, less illustrative assumed taxes at 18% tax rate, less consensus preferred dividends. Consensus as of March 3, 2021 based on average of available research analyst projections.
- 4. Athene adjusted operating income excludes earnings on stake in Apollo. Pro forma consensus 2021E calculated as consensus pre-tax income, less consensus preferred dividends and taxes. Consensus as of August 8, 2021 based on average of available research analyst projections.

### YIELD OVERVIEW

### Historical Success by Being a First Mover

1. Net asset yield calculated based on average stat investment yield on bonds and mortgages disclosed in annual U.S. life insurance statutory fillings. Stat investment yield reduced for each company's respective investment fees and expenses approximated by taking annual GAAP investment expenses divided by average GAAP invested assets. Athene's stat investment yield was adjusted to include assets in Bermuda entities and separate accounts backing pension risk transfer transactions, and to back out the impact of the larger Lincoln and Jackson National block trades during their respective 12 months deployment periods, as well as the impact of PRT transactions >\$750mm that closed in December on yields in the year that they closed. Peers represent a weighted average of AEL, AIG, AFG, FGL, LNC, MET, PRU, and PFG for the 5 years 2016 to 2020.
