ATHENE HOLDING LTD. REPORTS THIRD QUARTER 2021 RESULTS

HAMILTON, Bermuda – November 3, 2021 – Athene Holding Ltd. ("Athene") (NYSE: ATH), a leading financial services company specializing in retirement solutions, today announced financial results for the quarter ended September 30, 2021.

- Quarterly diluted EPS of **\$3.51** and **quarterly adjusted operating EPS** of **\$2.73** or **\$541 million** of adjusted operating income
- **Record gross organic inflows** totaling **\$11.9 billion** underwritten to attractive returns and driving annualized net organic growth of **8%**
- **Solid profitability** during the third quarter with ROA of **1.27%** and ROE of **13.8%** and adjusted operating ROA of **1.32%** and adjusted operating ROE of **15.6%**
- **Strong quarterly investment performance from Alternatives** with consolidated Alts NIER of **16.3%** higher than long-term average of 11%
- **Robust capitalization** with **\$3.6 billion** of excess equity capital and **\$8.0 billion** of total deployable capital

"In the third quarter, we originated nearly \$12 billion of gross organic inflows, a new quarterly record for Athene. With this result, we have already surpassed the level of total organic inflows generated in all of 2020, which was our previous record. Our third quarter results also highlight that we are on pace to deliver our best year of annual profits since we started the company."

"These factors combined to drive Athene's adjusted book value to \$71.50 per share, which represents an impressive compound growth rate of 17% per year since inception, a level we believe is unmatched by our retirement services competitors and is among the very best in the financial services industry. I am truly excited to see Athene continue this success as a fully aligned partner with Apollo, following the completion of our pending merger in January."

- Jim Belardi, CEO

¹ Diluted earnings per common share on a GAAP basis for Class A common shares, including diluted Class A weighted average common shares outstanding, includes the dilutive impacts, if any, for all stock-based awards.

² Weighted average common shares outstanding – adjusted operating assumes conversion or settlement of all outstanding items that are able to be converted to or settled in Class A common shares, including the impacts of any stock-based awards, but excluding any awards for which the exercise or conversion price exceeds the market value of Class A common shares on the applicable measurement date. We believe this non-GAAP measure is an appropriate economic representation of our share counts for use in an economic view of adjusted operating earnings per common share.

Third Quarter 2021 Financial Results

Net income available to AHL common shareholders for the third quarter 2021 was \$698 million, or \$3.51 per diluted Class A common share ("diluted share"), compared to \$622 million, or \$3.16 per diluted share for the third quarter 2020. The increase from the prior year quarter was driven by higher adjusted operating income, realized gains on the sale of AFS securities and a decrease in income tax expense relating to non-operating adjustments, partially offset by an unfavorable change in fair value of reinsurance assets.

Adjusted operating income available to common shareholders for the third quarter 2021 was \$541 million, or \$2.73 per adjusted operating common share, compared to \$302 million, or \$1.53 per adjusted operating common share for the third quarter 2020. The increase from the prior year quarter was primarily driven by higher invested assets and the change in fair value of Athene's AOG investment.

Adjusted operating income available to common shareholders excluding notables and AOG for the third quarter 2021 was \$511 million, or \$2.57 per adjusted operating common share, compared to \$356 million, or \$1.81 per adjusted operating common share for the third quarter 2020. The increase from the prior year quarter was primarily driven by higher invested assets.

Growth Highlights

Organic Growth

In the third quarter 2021, Athene generated record gross organic inflows of \$11.9 billion, representing an increase of 61% year-over-year.

Strong organic inflows reflected the advantage of Athene's diversified funding channels, with particular strength on the institutional side of the business in funding agreements and pension group annuities (PGA). Organic inflows for third quarter 2021 were underwritten to attractive returns despite the low interest rate environment, reflecting Athene's ability to originate new business with low funding costs and generate alpha within its investment portfolio.

Retail:

In the third quarter 2021, Athene generated retail inflows of \$2.4 billion, representing a slight decrease of 4% year-over-year, despite increased competition for traditional fixed annuity / MYGA business. Third quarter inflows saw Athene set a record for fixed indexed annuity (FIA) sales.

Flow Reinsurance:

In the third quarter 2021, Athene generated flow reinsurance inflows of \$635 million. This represents a decrease of 73% year-over-year, down from the record quarterly inflows in the prior year quarter, which benefited from the onset of unusual pandemic-driven market dynamics.

Pension Group Annuities¹:

In the third quarter 2021, Athene completed three PGA transactions totaling \$6.6 billion, including a landmark \$4.9 billion transaction with Lockheed Martin, continuing a record pace of year-to-date activity. Subsequent to September 30, 2021, Athene executed one additional transaction totaling \$1.4 billion.

Funding Agreements²:

In the third quarter 2021, Athene generated \$2.3 billion of funding agreement activity, representing an 11% decrease year-over-year and a 43% decrease quarter-over-quarter. Despite the year-over-year and sequential declines, Athene's issuance activity led the industry in the quarter and was driven by four issuances across two currencies.

Net Organic Flows

In the third quarter 2021, Athene generated net organic flows of \$3.4 billion. This was driven by the aforementioned gross organic inflows of \$11.9 billion, less \$4.8 billion of inflows attributable to third party investors in Athene Co-Invest Reinsurance Affiliate (ACRA) related to PGA and funding agreement activity, as well as net outflows of \$3.7 billion, which were slightly elevated from prior year due to larger blocks of business lapsing upon reaching the end of their surrender charge period during the quarter. Athene's net annualized organic growth rate for the third quarter 2021 was 8% versus 13% in the prior year quarter.

¹ Pension group annuities (PGA) was previously referenced as pension risk transfer (PRT) ² Funding agreements are comprised of funding agreements issued under our FABN and FABR programs, funding agreements issued to the FHLLB and long-term repurchase agreements.

Segment Results

Retirement Services

For the third quarter 2021, adjusted operating income available to common shareholders in Retirement Services was \$537 million, an increase of \$176 million, or 49%, from the third quarter 2020, resulting in an adjusted operating ROE of 21.2%. Excluding notable items, adjusted operating income available to common shareholders in Retirement Services was \$517 million, resulting in an adjusted operating ROE of 20.4%.

The increase in adjusted operating income available to common shareholders over the prior year quarter was primarily driven by strong growth in average net invested assets of \$23 billion or 17%.

The net investment spread, which measures net investment earnings less cost of funds, was 1.53% of average net invested assets for the third quarter 2021, an increase of 12 basis points from the third quarter 2020. The increase from the prior year quarter was primarily driven by a lower cost of funds, partially offset by lower NIER.

The NIER was 4.00% for the third quarter 2021, compared to 4.22% in the prior year quarter. The annualized return on fixed income and other investments during the third quarter 2021 was 3.49%, compared to 3.70% in the prior year quarter. The year-over-year decline of 21 basis points was driven primarily by lower on-the-margin asset deployment yields resulting from the prolonged lower interest rate environment and lower income from floating rate investments, partially offset by lower cash levels and higher returns from the reinsured Jackson block, following its redeployment into higher-returning assets. The net annualized return on alternative investments during the third quarter 2021 was 15.10% compared to 17.24% in the prior year quarter, as both periods benefited from broad based appreciation in the portfolio and favorable market tailwinds.

Cost of funds, which is comprised of cost of crediting on deferred annuities and institutional products as well as other liability costs, was 2.47% for the third quarter 2021, a decrease of 34 basis points from the third quarter 2020, driven primarily by significant growth underwritten to a lower average cost of funds in a low interest rate environment.

Total cost of crediting was 1.74% for the third quarter 2021, a decrease of 13 basis points from the prior year quarter, driven by lower rates on both institutional business and deferred annuities. The cost of crediting on institutional business was 2.47%, a decrease of 48 basis points from the prior year quarter. The year-over-year decrease was driven by lower rates on funding agreement and pension group annuities issuances due to the prolonged lower interest rate environment and a favorable mix shift toward lower cost funding agreements.

The cost of crediting on deferred annuities was 1.83%, a decrease of 15 basis points from the prior year quarter, driven by lower crediting rates on new issuances and renewals due to favorable crediting rate actions and lower option costs.

Other liability costs, which are primarily applicable to deferred annuities, were 0.73% for the third quarter 2021. The decrease of 21 basis points from the prior year quarter was driven by favorable equity market impacts and actuarial adjustments.

Corporate & Other

In the third quarter 2021, the adjusted operating income (loss) available to common shareholders was \$4 million in Corporate & Other, an increase of \$63 million from \$(59) million in the third quarter 2020. The increase in adjusted operating income (loss) available to common shareholders from the prior year quarter was driven by the change in fair value of Athene's AOG investment, partially offset by lower net investment income and an increase in interest expense and preferred dividends.

In the third quarter 2021, the change in fair value of Athene's AOG investment, net of tax, resulted in a \$10 million gain, or \$0.06 per common share, primarily reflecting \$17 million of dividend income, partially offset by a 1% decrease in the common stock price of Apollo Global Management (NYSE: APO).

Conference Call Information

Athene will host a conference call today, November 3, 2021 at 10:00 a.m. ET. During the call, members of Athene's senior management team will review Athene's financial results for the third quarter 2021 ended September 30, 2021. This press release, the third quarter 2021 earnings presentation, and quarterly financial supplement are posted to Athene's website at ir.athene.com.

- Live conference call: Toll-free at (877) 876-9173 (domestic) or (785) 424-1667 (international)
- Conference call replay available through November 10, 2021 at (800) 839-2394 (domestic) or (402) 220-7207 (international)
- Conference ID number: ATHQ321
- Live and archived webcast available at ir.athene.com

About Athene

Athene, through its subsidiaries, is a leading retirement services company with total assets of \$224.4 billion as of September 30, 2021 and operations in the United States, Bermuda, and Canada. Athene specializes in helping its customers achieve financial security and is a solutions provider to institutions. Founded in 2009, Athene is *Driven to Do More* for our policyholders, business partners, shareholders, and the communities in which we work and live. For more information, please visit www.athene.com.

Non-GAAP Measures

In addition to our results presented in accordance with GAAP, we present certain financial information that includes non-GAAP measures. Management believes the use of these non-GAAP measures, together with the relevant GAAP measures, provides information that may enhance an investor's understanding of our results of operations and the underlying profitability drivers of our business. The majority of these non-GAAP measures are intended to remove from the results of operations the impact of market volatility (other than with respect to alternative investments) as well as integration, restructuring and certain other expenses which are not part of our underlying profitability drivers, as such items fluctuate from period to period in a manner inconsistent with these drivers. These measures should be considered supplementary to our results in accordance with GAAP and should not be viewed as a substitute for the corresponding GAAP measures.

Adjusted operating income (loss) available to common shareholders is a non-GAAP measure used to evaluate our financial performance excluding market volatility and expenses related to integration, restructuring, stock compensation and other expenses. Our adjusted operating income (loss) available to common shareholders equals net income (loss) available to AHL common shareholders adjusted to eliminate the impact of the following (collectively, the non-operating adjustments):

- Investment Gains (Losses), Net of Offsets
- Change in Fair Values of Derivatives and Embedded Derivatives – FIAs, Net of Offsets
- Integration, Restructuring and Other Non-Operating Expenses
- Stock Compensation Expense
- Income Tax (Expense) Benefit – Non-Operating

We consider these non-operating adjustments to be meaningful adjustments to net income (loss) available to AHL common shareholders for the reasons discussed in greater detail above. Accordingly, we believe using a measure which excludes the impact of these items is useful in analyzing our business performance and the trends in our results of operations. Together with net income (loss) available to AHL common shareholders, we believe adjusted operating income (loss) available to common shareholders provides a meaningful financial metric that helps investors understand our underlying results and profitability. Adjusted operating income (loss) available to common shareholders should not be used as a substitute for net income (loss) available to AHL common shareholders.

Adjusted operating ROA is a non-GAAP measure used to evaluate our financial performance and profitability. Adjusted operating ROA is computed using our adjusted operating income (loss) available to common shareholders divided by average net invested assets for the relevant period. To enhance the ability to analyze this measure across periods, interim periods are annualized. While we believe this metric is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for ROA presented under GAAP.

Adjusted operating ROE is a non-GAAP measure used to evaluate our financial performance excluding the impacts of AOCI and the cumulative change in fair value of funds withheld and modco reinsurance assets, net of DAC, DSI, rider reserve and tax offsets. Adjusted AHL common shareholders' equity is calculated as the ending AHL shareholders' equity excluding AOCI, the cumulative change in fair value of funds withheld and modco reinsurance assets and preferred stock. Adjusted operating ROE is calculated as the adjusted operating income (loss) available to common shareholders, divided by average adjusted AHL common shareholders' equity. These adjustments fluctuate period to period in a manner inconsistent with our underlying profitability drivers as the majority of such fluctuation is related to the market volatility of the unrealized gains and losses associated with our AFS securities. Except with respect to reinvestment activity relating to acquired blocks of businesses, we typically buy and hold AFS investments to maturity throughout the duration of market fluctuations, therefore, the period-over-period impacts in unrealized gains and losses are not necessarily indicative of current operating fundamentals or future performance. Accordingly, we believe using measures which exclude AOCI and the cumulative change in fair value of funds withheld and modco reinsurance assets are useful in analyzing trends in our operating results. To enhance the ability to analyze these measures across periods, interim periods are annualized. Adjusted operating ROE should not be used as a substitute for ROE. However, we believe the adjustments to net income (loss) available to AHL common shareholders and AHL common shareholders' equity are significant to gaining an understanding of our overall financial performance.

Adjusted operating earnings (loss) per common share, weighted average common shares outstanding – adjusted operating and adjusted book value per common share are non-GAAP measures used to evaluate our financial performance and financial condition. The non-GAAP measures adjust the number of shares included in the

corresponding GAAP measures to reflect the conversion or settlement of all shares and other stock-based awards outstanding. We believe these measures represent an economic view of our share counts and provide a simplified and consistent view of our outstanding shares. Adjusted operating earnings (loss) per common share is calculated as the adjusted operating income (loss) available to common shareholders, over the weighted average common shares outstanding – adjusted operating. Adjusted book value per common share is calculated as the adjusted AHL common shareholders' equity divided by the adjusted operating common shares outstanding. Effective February 28, 2020, all Class B common shares were converted into Class A common shares and all Class M common shares were converted into warrants and Class A common shares. Our Class B common shares were economically equivalent to Class A common shares and were convertible to Class A common shares on a one-for-one basis at any time. Our Class M common shares were in the legal form of shares but economically functioned as options as they were convertible into Class A common shares after vesting and payment of the conversion price. In calculating Class A diluted earnings (loss) per share on a GAAP basis, we are required to apply sequencing rules to determine the dilutive impacts, if any, of our Class B common shares, Class M common shares and any other stock-based awards. To the extent our Class B common shares, Class M common shares and/or any other stock-based awards were not dilutive, after considering the dilutive effects of the more dilutive securities in the sequence, they were excluded. Weighted average common shares outstanding – adjusted operating and adjusted operating common shares outstanding assume conversion or settlement of all outstanding items that are able to be converted to or settled in Class A common shares, including the impacts of Class B common shares on a one-for-one basis, the impacts of all Class M common shares net of the conversion price and any other stock-based awards, but excluding any awards for which the exercise or conversion price exceeds the market value of our Class A common shares on the applicable measurement date. For certain historical periods, Class M shares were not included due to issuance restrictions which were contingent upon our IPO. Adjusted operating earnings (loss) per common share, weighted average common shares outstanding – adjusted operating and adjusted book value per common share should not be used as a substitute for basic earnings (loss) per share – Class A common shares, basic weighted average common shares outstanding – Class A or book value per common share. However, we believe the adjustments to the shares and equity are significant to gaining an understanding of our overall results of operations and financial condition.

Net investment spread is a key measure of the profitability of our Retirement Services segment. Net investment spread measures our investment performance less the total cost of our liabilities. Net investment earned rate is a key measure of our investment performance, while cost of funds is a key measure of the cost of our policyholder benefits and liabilities. Investment margin on our deferred annuities measures our investment performance less the cost of crediting for our deferred annuities, which make up a significant portion of our net reserve liabilities.

- Net investment earned rate is a non-GAAP measure we use to evaluate the performance of our net invested assets that does not correspond to GAAP net investment income. Net investment earned rate is computed as the income from our net invested assets divided by the average net invested assets, excluding the impacts of our investment in Apollo, for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized. The adjustments to net investment income to arrive at our net investment earned rate add (a) alternative investment gains and losses, (b) gains and losses related to trading securities for CLOs, (c) net VIE impacts (revenues, expenses and noncontrolling interest), (d) forward points gains and losses on foreign exchange derivative hedges and (e) the change in fair value of reinsurance assets, and removes the proportionate share of the ACRA net investment income associated with the ACRA noncontrolling interest as well as the gain or loss on our investment in Apollo. We include the income and assets supporting our change in fair value of reinsurance assets by evaluating the underlying investments of the funds withheld at interest receivables and we include the net investment income from those underlying investments which does not correspond to the GAAP presentation of change in fair value of reinsurance assets. We exclude the income and assets supporting business that we have exited through ceded reinsurance including funds withheld agreements. We believe the adjustments for reinsurance provide a net investment earned rate on the assets for which we have economic exposure.
- Cost of funds includes liability costs related to cost of crediting on both deferred annuities and institutional products as well as other liability costs, but does not include the proportionate share of the ACRA cost of funds associated with the noncontrolling interest. Cost of funds is computed as the total liability costs divided by the average net invested assets, excluding our investment in Apollo, for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized.
 - Cost of crediting includes the costs for both deferred annuities and institutional products. Cost of crediting on deferred annuities is the interest credited to the policyholders on our fixed strategies as well as the option costs on the indexed annuity strategies. With respect to FIAs, the cost of providing

index credits includes the expenses incurred to fund the annual index credits, and where applicable, minimum guaranteed interest credited. Cost of crediting on institutional products is comprised of (i) pension group annuity costs, including interest credited, benefit payments and other reserve changes, net of premiums received when issued, and (ii) funding agreement costs, including the interest payments and other reserve changes. Cost of crediting is computed as the cost of crediting for deferred annuities and institutional products divided by the average net invested assets, excluding the investment in Apollo, for the relevant periods. Cost of crediting on deferred annuities is computed as the net interest credited on fixed strategies and option costs on indexed annuity strategies divided by the average net account value of our deferred annuities. Cost of crediting on institutional products is computed as the pension group annuity and funding agreement costs divided by the average net institutional reserve liabilities. Our average net invested assets, excluding our investment in Apollo, net account values and net institutional reserve liabilities are averaged over the number of quarters in the relevant period to obtain our associated cost of crediting for such period. To enhance the ability to analyze these measures across periods, interim periods are annualized.

- Other liability costs include DAC, DSI and VOBA amortization, change in rider reserves, the cost of liabilities on products other than deferred annuities and institutional products, excise taxes, premiums, product charges and other revenues. We believe a measure like other liability costs is useful in analyzing the trends of our core business operations and profitability. While we believe other liability costs is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for total benefits and expenses presented under GAAP.

Net investment earned rate, cost of funds, net investment spread and investment margin on deferred annuities are non-GAAP measures we use to evaluate the profitability of our business. We believe these metrics are useful in analyzing the trends of our business operations, profitability and pricing discipline. While we believe each of these metrics are meaningful financial metrics and enhance our understanding of the underlying profitability drivers of our business, they should not be used as a substitute for net investment income, interest sensitive contract benefits or total benefits and expenses presented under GAAP.

In managing our business, we analyze net invested assets, which does not correspond to total investments, including investments in related parties, as disclosed in our consolidated financial statements and notes thereto. Net invested assets represents the investments that directly back our net reserve liabilities as well as surplus assets. Net invested assets, excluding our investment in Apollo, is used in the computation of net investment earned rate, which allows us to analyze the profitability of our investment portfolio. Net invested assets includes (a) total investments on the consolidated balance sheets with AFS securities at cost or amortized cost, excluding derivatives, (b) cash and cash equivalents and restricted cash, (c) investments in related parties, (d) accrued investment income, (e) VIE assets, liabilities and noncontrolling interest adjustments, (f) net investment payables and receivables, (g) policy loans ceded (which offset the direct policy loans in total investments) and (h) an allowance for credit losses. Net invested assets also excludes assets associated with funds withheld liabilities related to business exited through reinsurance agreements and derivative collateral (offsetting the related cash positions). We include the underlying investments supporting our assumed funds withheld and modco agreements in our net invested assets calculation in order to match the assets with the income received. We believe the adjustments for reinsurance provide a view of the assets for which we have economic exposure. Net invested assets includes our proportionate share of ACRA investments, based on our economic ownership, but does not include the proportionate share of investments associated with the noncontrolling interest. Net invested assets also includes our investment in Apollo. Our net invested assets, excluding our investment in Apollo, are averaged over the number of quarters in the relevant period to compute our net investment earned rate for such period. While we believe net invested assets is a meaningful financial metric and enhances our understanding of the underlying drivers of our investment portfolio, it should not be used as a substitute for total investments, including related parties, presented under GAAP.

Sales statistics do not correspond to revenues under GAAP but are used as relevant measures to understand our business performance as it relates to inflows generated during a specific period of time. Our sales statistics include inflows for fixed rate annuities and FIAs and align with the LIMRA definition of all money paid into an individual annuity, including money paid into new contracts with initial purchase occurring in the specified period and existing contracts with initial purchase occurring prior to the specified period (excluding internal transfers). While we believe sales is a meaningful metric and enhances our understanding of our business performance, it should not be used as a substitute for premiums presented under GAAP.

Net organic growth rate is calculated as the net organic flows divided by average net invested assets. Net organic flows are comprised of net organic inflows less net outflows. Organic inflows are the deposits generated from our organic channels, which include retail, flow reinsurance and institutional. Net outflows are total liability outflows, including full and partial withdrawals on our deferred annuities, death benefits, pension group annuity benefit payments, payments on payout annuities and maturities of our funding agreements, net of outflows attributable to the ACRA noncontrolling interest. To enhance the ability to analyze these measures across periods, interim periods are annualized. We believe net organic growth rate provides a meaningful financial metric that enables investors to assess our growth from the channels that provide recurring inflows. Management uses net organic growth rate to monitor our business performance and the underlying profitability drivers of our business.

Safe Harbor for Forward-Looking Statements

This press release contains, and certain oral statements made by Athene's representatives from time to time may contain, forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such statements are subject to risks and uncertainties that could cause actual results, events and developments to differ materially from those set forth in, or implied by, such statements. These statements are based on the beliefs and assumptions of Athene's management and the management of Athene's subsidiaries. Generally, forward-looking statements include actions, events, results, strategies and expectations and are often identifiable by use of the words "believes," "expects," "intends," "anticipates," "plans," "seeks," "estimates," "projects," "may," "will," "could," "might," "should," or "continues" or similar expressions. Forward-looking statements within this press release include, but are not limited to, statements regarding future growth prospects and financial performance. Factors that could cause actual results, events and developments to differ include, without limitation: the accuracy of Athene's assumptions and estimates; Athene's ability to maintain or improve financial strength ratings; Athene's ability to manage its business in a highly regulated industry; regulatory changes or actions; the impact of Athene's reinsurers failing to meet their assumed obligations; the impact of interest rate fluctuations; changes in the federal income tax laws and regulations; the accuracy of Athene's interpretation of the Tax Cuts and Jobs Act; litigation (including class action litigation), enforcement investigations or regulatory scrutiny; the performance of third parties; the loss of key personnel; telecommunication, information technology and other operational systems failures; the continued availability of capital; new accounting rules or changes to existing accounting rules; general economic conditions; Athene's ability to protect its intellectual property; the ability to maintain or obtain approval of the Delaware Department of Insurance, the Iowa Insurance Division and other regulatory authorities as required for Athene's operations; the delay or failure to complete or realize the expected benefits from the proposed merger with Apollo Global Management; and other factors discussed from time to time in Athene's filings with the SEC, including its annual report on Form 10-K for the year ended December 31, 2020, and its other SEC filings, which can be found at the SEC's website www.sec.gov.

All forward-looking statements described herein are qualified by these cautionary statements and there can be no assurance that the actual results, events or developments referenced herein will occur or be realized. Athene does not undertake any obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes to future operating results.

Additional Information Regarding the Transaction and Where to Find It

This press release is being made in respect of the proposed transaction involving Tango Holdings, Inc. (“HoldCo”), Apollo Global Management, Inc. (“AGM”), and Athene Holding Ltd. (the “Company”). The proposed transaction will be submitted to the stockholders of AGM and the shareholders of the Company for their respective consideration. In connection therewith, the parties intend to file relevant materials with the Securities and Exchange Commission (the “SEC”), including a definitive proxy statement, which will be mailed to the stockholders of AGM and the shareholders of the Company. However, such documents are not currently available. BEFORE MAKING ANY VOTING OR ANY INVESTMENT DECISION, AS APPLICABLE, INVESTORS AND SECURITY HOLDERS OF AGM AND THE COMPANY ARE URGED TO READ THE DEFINITIVE JOINT PROXY STATEMENT/PROSPECTUS REGARDING THE PROPOSED TRANSACTION AND ANY OTHER RELEVANT DOCUMENTS FILED OR TO BE FILED WITH THE SEC CAREFULLY AND IN THEIR ENTIRETY WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION ABOUT THE PROPOSED TRANSACTION. Investors and security holders

may obtain free copies of the definitive joint proxy statement/prospectus, any amendments or supplements thereto and other documents containing important information about AGM and the Company, once such documents are filed with the SEC, through the website maintained by the SEC at www.sec.gov.

Copies of the documents filed with the SEC by AGM are available free of charge under the "Stockholders" section of AGM's website located at <http://www.apollo.com> or by contacting AGM's Investor Relations Department at (212) 822-0528 or APOInvestorRelations@apollo.com. Copies of the documents filed with the SEC by the Company are available free of charge under the "Investors" section of the Company's website located at <http://www.athene.com> or by contacting the Company's Investor Relations Department at (441) 279-8531 or ir@athene.com.

Participants in the Solicitation

AGM, the Company, and HoldCo and their respective directors, executive officers, members of management and employees may, under the rules of the SEC, be deemed to be participants in the solicitation of proxies in connection with the proposed transaction.

Information about the directors and executive officers of the Company is set forth in the Company's annual report on Form 10-K for the fiscal year ended December 31, 2020, which was filed with the SEC on February 19, 2021, its amendment to its annual report on Form 10-K/A for the fiscal year ended December 31, 2020, which was filed with the SEC on April 20, 2021, and in subsequent documents filed with the SEC, each of which can be obtained free of charge from the sources indicated above.

Information about the directors and executive officers of AGM and HoldCo is set forth in AGM's proxy statement for its 2021 annual meeting of stockholders, which was filed with the SEC on August 16, 2021, its annual report on Form 10-K for the fiscal year ended December 31, 2020, which was filed with the SEC on February 19, 2021, and in subsequent documents filed with the SEC, each of which can be obtained free of charge from the sources indicated above.

Other information regarding the participants in the proxy solicitations of the stockholders of AGM and the shareholders of the Company, and a description of their direct and indirect interests, by security holdings or otherwise, will be contained in the preliminary and definitive proxy statements and other relevant materials to be filed with the SEC when they become available.

No Offer or Solicitation

This press release is for informational purposes only and not intended to and does not constitute an offer to subscribe for, buy or sell, the solicitation of an offer to subscribe for, buy or sell or an invitation to subscribe for, buy or sell any securities or the solicitation of any vote or approval in any jurisdiction pursuant to or in connection with the proposed transaction or otherwise, nor shall there be any sale, issuance or transfer of securities in any jurisdiction in contravention of applicable law.

Note: "NM" represents changes that are not meaningful. Please refer to Notes to the Financial Supplement section and the Non-GAAP Measure Reconciliations for discussion of non-GAAP metrics. 1 Diluted earnings per common share on a GAAP basis for Class A common shares, including diluted Class A weighted average common shares outstanding, includes the dilutive impacts, if any, for all stock-based awards, and for the nine months ended September 30, 2020, the dilutive impacts, if any, of Class B and Class M common shares. 2 Represents Class A common shares outstanding or weighted average common shares outstanding assuming conversion or settlement of all outstanding items that are able to be converted to or settled in Class A common shares, including the impacts of any stock-based awards, and for the nine months ended September 30, 2020, the impacts of Class B and Class M common shares, but excluding any awards for which the exercise or conversion price exceeds the market value of our Class A common shares on the applicable measurement date. 3 Net organic flows are calculated as organic inflows less total outflows, net of the ACRA noncontrolling interest. In Q1'21 we revised the net organic flows metric, for all periods presented, to include all outflows while previously this metric excluded inorganic business. 4 Net organic growth rate is calculated as net organic flows divided by average net invested assets, on an annualized basis. In Q1'21, we revised the net organic growth rate and average net invested assets metrics, for all periods presented, to include all outflows and net invested assets while previously these metrics excluded inorganic business.

¹ Please refer to Notes to the Financial Supplement for discussion on net invested assets including net alternative investments and Non-GAAP Measure Reconciliations for the reconciliation of investments including related parties to net invested assets. Net invested assets includes our economic ownership of ACRA investments but does not include the investments associated with the noncontrolling interest. ² Funding agreements are comprised of funding agreements issued under our FABN and FABR programs, funding agreements issued to the FHLB and long-term repurchase agreements. ³ Pension group annuities (PGA) were previously referenced as pension risk transfer (PRT). ⁴ Net outflows consist of full and partial policyholder withdrawals on deferred annuities, death benefits, pension group annuity benefit payments, payments on payout annuities and funding agreement maturities, net of the ACRA noncontrolling interest. ⁵ Net organic growth rate is calculated as net organic flows divided by average net invested assets, on an annualized basis. ⁶ In Q1'21, we revised the net outflows, net organic growth rate and average net invested assets metrics, for all periods presented, to include all outflows and net invested assets while previously these metrics excluded inorganic business.

Total investment funds including related parties	\$ 6,087	100.0 %	\$ 8,021	100.0 %

Note: The investment funds balances include the entire investment fund balance attributable to ACRA as ACRA is 100% consolidated. 1 Investment funds, including related parties, is the GAAP measure which does not include investments that we view as alternative investments. Alternative investments include CLO and ABS equity tranche securities that are included in trading securities in the GAAP view, a nonredeemable preferred stock viewed as an alternative investment for management view but included in equity securities for GAAP view, investment funds included in our funds withheld at interest reinsurance portfolios, royalties and other investments. Please refer to Notes to the Financial Supplement section for discussion on net invested assets including net alternative investments and the Non-GAAP Measure Reconciliations section for the reconciliation of investment funds, including related parties, to net alternative investments. 2 In April of 2021, we sold our investment in AmeriHome, which is held by A-A Mortgage. Following the sale of AmeriHome, A-A Mortgage distributed the majority of the proceeds, with the remaining residual investment expected to be distributed within the next year.

Net alternative investments ⁴	\$ 6,793	100.0 %	\$ 8,525	100.0 %

¹ Net invested assets includes our economic ownership of ACRA investments but does not include the investments associated with the noncontrolling interest. ² In April of 2021, we sold our investment in AmeriHome, which is held by A-A Mortgage. Following the sale of AmeriHome, A-A Mortgage distributed the majority of the proceeds, with the remaining residual investment expected to be distributed within the next year. ³ As of September 30, 2021, equities included our public equity positions in Jackson Financial Inc (ticker: JXN) and OneMain Holdings, Inc. (OMF). We held 3.8 million and 0.0 million shares in Jackson, net of the ACRA noncontrolling interest, and 0.7 million and 2.8 million shares in OneMain as of September 30, 2021 and December 31, 2020, respectively. ⁴ Net alternative investments does not correspond to the total investment funds, including related parties, on our condensed consolidated balance sheets. Net alternative investments adjusts the GAAP presentation to include CLO and ABS equity tranche securities that are included in trading securities in the GAAP view, a nonredeemable preferred stock viewed as an alternative investment for management view but included in equity securities for GAAP view, investment funds included in our funds withheld at interest reinsurance portfolios, royalties and other investments. Please refer to Notes to the Financial Supplement section for discussion on net invested assets including net alternative investments and the Non-GAAP Measure Reconciliations section for the reconciliation of investment funds, including related parties, to net alternative investments.

¹ Funds withheld at interest represents a receivable for amounts contractually withheld by ceding companies in accordance with modco and funds withheld reinsurance agreements in which we act as the reinsurer. In managing our business we utilize invested assets, where we adjust the presentation for funds withheld and modco transactions to include or exclude the underlying investments based upon the contractual transfer of economic exposure to such underlying investments.

¹ Securities denoted as non-rated by the NRSRO were classified as investment or non-investment grade according to the security's respective NAIC designation. With respect to modeled LBASS, the NAIC designation methodology differs in significant respects from the NRSRO ratings methodology. ² We view the NAIC designation methodology as the most appropriate way to view our AFS portfolio when evaluating credit risk since a large portion of our holdings were purchased at a significant discount to par. With respect to loan-backed and structured securities, the NAIC designation methodology differs in significant respects from the NRSRO rating methodology. NRSRO ratings methodology is focused on the likelihood of recovery of all contractual payments, including principal at par regardless of entry price, while the NAIC designation methodology considers our investment at amortized cost, and the likelihood of recovery of that book value as opposed to the likelihood of the recovery of all contractual payments. ³ Please refer to Notes to the Financial Supplement section for discussion on net invested assets and the Non-GAAP Measure Reconciliations section for the reconciliation of total investments, including related parties, to net invested assets.

Note: Please refer to Notes to the Financial Supplement section and the Non-GAAP Measure Reconciliations for discussion on net reserve liabilities. Net reserve liabilities include our economic ownership of ACRA reserve liabilities but do not include the reserve liabilities associated with the noncontrolling interest. ¹ Funding agreements are comprised of funding agreements issued under our FABN and FABR programs, funding agreements issued to the FHLB and long-term repurchase agreements. ² Gross inflows equal inflows from our retail, flow reinsurance and institutional channels as well as inflows for life and products other than deferred annuities or our institutional products, renewal inflows on older blocks of business, annuitizations and foreign currency translation adjustments on large transactions between the transaction date and the transition period. Gross inflows include all inflows sourced by Athene, including all of the inflows reinsured to ACRA. ³ Acquisition and block reinsurance transactions include the reserve liabilities acquired in our inorganic channel at inception. On June 1, 2020, we entered into an agreement with Jackson National Life pursuant to which we agreed to reinsure a block of fixed and fixed indexed annuities on a funds withheld coinsurance basis providing \$28.8 billion of gross inflows. ⁴ Effective April 1, 2020, ALRe purchased 14,000 newly issued shares in ACRA increasing our ownership from 33% to 36.55% of the economic interests. ⁵ The ACRA reserve liability rollforward is a rollforward of the GAAP reserve liabilities associated with the noncontrolling interest.

¹ Diluted earnings per common share on a GAAP basis for Class A common shares, including diluted Class A weighted average common shares outstanding, includes the dilutive impacts, if any, for all stock-based awards, and for the nine months ended September 30, 2020, the dilutive impacts, if any, of Class B and Class M common shares. ² Represents Class A common shares outstanding or weighted average common shares outstanding assuming conversion or settlement of all outstanding items that are able to be converted to or settled in Class A common shares, including the impacts of any stock-based awards, and for the nine months ended September 30, 2020, the impacts of Class B and Class M common shares, but excluding any awards for which the exercise or conversion price exceeds the market value of our Class A common shares on the applicable measurement date. ³ Represents common shares vested and outstanding for all classes eligible to participate in dividends for each period presented.

KEY OPERATING AND NON-GAAP MEASURES

In addition to our results presented in accordance with GAAP, we present certain financial information that includes non-GAAP measures. Management believes the use of these non-GAAP measures, together with the relevant GAAP measures, provides information that may enhance an investor's understanding of our results of operations and the underlying profitability drivers of our business. The majority of these non-GAAP measures are intended to remove from the results of operations the impact of market volatility (other than with respect to alternative investments) as well as integration, restructuring and certain other expenses which are not part of our underlying profitability drivers, as such items fluctuate from period to period in a manner inconsistent with these drivers. These measures should be considered supplementary to our results in accordance with GAAP and should not be viewed as a substitute for the corresponding GAAP measures.

ADJUSTED OPERATING INCOME (LOSS) AVAILABLE TO COMMON SHAREHOLDERS AND ADJUSTED OPERATING RETURN ON ASSETS (ROA)

Adjusted operating income (loss) available to common shareholders is a non-GAAP measure used to evaluate our financial performance excluding market volatility and expenses related to integration, restructuring, stock compensation and other expenses. Our adjusted operating income (loss) available to common shareholders equals net income (loss) available to AHL common shareholders adjusted to eliminate the impact of the following (collectively, the non-operating adjustments):

- **Investment Gains (Losses), Net of Offsets**—Consists of the realized gains and losses on the sale of AFS securities, the change in fair value of reinsurance assets, unrealized gains and losses, changes in the credit loss allowance, and other investment gains and losses. Unrealized, allowances and other investment gains and losses are comprised of the fair value adjustments of trading securities (other than CLOs) and investments held under the fair value option, derivative gains and losses not hedging FIA index credits, and the change in credit loss allowances recognized in operations net of the change in AmerUs Closed Block fair value reserve related to the corresponding change in fair value of investments. Investment gains and losses are net of offsets related to DAC, DSI, and VOBA amortization and changes to guaranteed lifetime withdrawal benefit (GLWB) and guaranteed minimum death benefit (GMDB) reserves (together, GLWB and GMDB reserves represent rider reserves) as well as the MVAs associated with surrenders or terminations of contracts.
- **Change in Fair Values of Derivatives and Embedded Derivatives – FIAs, Net of Offsets**—Consists of impacts related to the fair value accounting for derivatives hedging the FIA index credits and the related embedded derivative liability fluctuations from period to period. The index reserve is measured at fair value for the current period and all periods beyond the current policyholder index term. However, the FIA hedging derivatives are purchased to hedge only the current index period. Upon policyholder renewal at the end of the period, new FIA hedging derivatives are purchased to align with the new term. The difference in duration between the FIA hedging derivatives and the index credit reserves creates a timing difference in earnings. This timing difference of the FIA hedging derivatives and index credit reserves is included as a non-operating adjustment, net of offsets related to DAC, DSI, and VOBA amortization and changes to rider reserves. We primarily hedge with options that align with the index terms of our FIA products (typically 1–2 years). On an economic basis, we believe this is suitable because policyholder accounts are credited with index performance at the end of each index term. However, because the term of an embedded derivative in an FIA contract is longer-dated, there is a duration mismatch which may lead to mismatches for accounting purposes.
- **Integration, Restructuring, and Other Non-operating Expenses**—Consists of restructuring and integration expenses related to acquisitions and block reinsurance costs as well as certain other expenses, which are not predictable or related to our underlying profitability drivers.
- **Stock Compensation Expense**—Consists of stock compensation expenses associated with our share incentive plans, excluding our long-term incentive plan, which are not related to our underlying profitability drivers and fluctuate from time to time due to the structure of our plans.
- **Income Tax (Expense) Benefit – Non-operating**—Consists of the income tax effect of non-operating adjustments and is computed by applying the appropriate jurisdiction's tax rate to the non-operating adjustments that are subject to income tax.

We consider these non-operating adjustments to be meaningful adjustments to net income (loss) available to AHL common shareholders for the reasons discussed in greater detail above. Accordingly, we believe using a measure which excludes the impact of these items is useful in analyzing our business performance and the trends in our results of operations. Together with net income (loss) available to AHL common shareholders, we believe adjusted operating income (loss) available to common shareholders provides a meaningful financial metric that helps investors understand our underlying results and profitability. Adjusted operating income (loss) available to common shareholders should not be used as a substitute for net income (loss) available to AHL common shareholders.

Adjusted operating ROA is a non-GAAP measure used to evaluate our financial performance and profitability. Adjusted operating ROA is computed using our adjusted operating income (loss) available to common shareholders divided by average net invested assets for the relevant period. To enhance the ability to analyze this measure across periods, interim periods are annualized. While we believe this metric is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for ROA presented under GAAP.

ADJUSTED OPERATING ROE

Adjusted operating ROE is a non-GAAP measure used to evaluate our financial performance excluding the impacts of AOCI and the cumulative change in fair value of funds withheld and modco reinsurance assets, net of DAC, DSI, rider reserve and tax offsets. Adjusted AHL common shareholders' equity is calculated as the ending AHL shareholders' equity excluding AOCI, the cumulative change in fair value of funds withheld and modco reinsurance assets and preferred stock. Adjusted operating ROE is calculated as the adjusted operating income (loss) available to common shareholders, divided by average adjusted AHL common shareholders' equity. These adjustments fluctuate period to period in a manner inconsistent with our underlying profitability drivers as the majority of such fluctuation is related to the market volatility of the unrealized gains and losses associated with our AFS securities. Except with respect to reinvestment activity relating to acquired blocks of businesses, we typically buy and hold AFS investments to maturity throughout the duration of market fluctuations, therefore, the period-over-period impacts in unrealized gains and losses are not necessarily indicative of current operating fundamentals or future performance. Accordingly, we believe using measures which exclude AOCI and the cumulative change in fair value of funds withheld and modco reinsurance assets are useful in analyzing trends in our operating results. To enhance the ability to analyze these measures across periods, interim periods are annualized. Adjusted operating ROE should not be used as a substitute for ROE. However, we believe the adjustments to net income (loss) available to AHL common shareholders and AHL common shareholders' equity are significant to gaining an understanding of our overall financial performance.

ADJUSTED OPERATING EARNINGS (LOSS) PER COMMON SHARE, WEIGHTED AVERAGE COMMON SHARES OUTSTANDING – ADJUSTED OPERATING, AND ADJUSTED BOOK VALUE PER COMMON SHARE

Adjusted operating earnings (loss) per common share, weighted average common shares outstanding – adjusted operating and adjusted book value per common share are non-GAAP measures used to evaluate our financial performance and financial condition. The non-GAAP measures adjust the number of shares included in the corresponding GAAP measures to reflect the conversion or settlement of all shares and other stock-based awards outstanding. We believe these measures represent an economic view of our share counts and provide a simplified and consistent view of our outstanding shares. Adjusted operating earnings (loss) per common share is calculated as the adjusted operating income (loss) available to common shareholders, over the weighted average common shares outstanding – adjusted operating. Adjusted book value per common share is calculated as the adjusted AHL common shareholders' equity divided by the adjusted operating common shares outstanding. Effective February 28, 2020, all Class B common shares were converted into Class A common shares and all Class M common shares were converted into warrants and Class A common shares. Our Class B common shares were economically equivalent to Class A common shares and were convertible to Class A common shares on a one-for-one basis at any time. Our Class M common shares were in the legal form of shares but economically functioned as options as they were convertible into Class A common shares after vesting and payment of the conversion price. In calculating Class A diluted earnings (loss) per share on a GAAP basis, we are required to apply sequencing rules to determine the dilutive impacts, if any, of our Class B common shares, Class M common shares and any other stock-based awards. To the extent our Class B common shares, Class M common shares and/or any other stock-based awards were not dilutive, after considering the dilutive effects of the more dilutive securities in the sequence, they were excluded. Weighted average common shares outstanding – adjusted operating and adjusted operating common shares outstanding assume conversion or settlement of all outstanding items that are able to be converted to or settled in Class A common shares, including the impacts of Class B common shares on a one-for-one basis, the impacts of all Class M common shares net of the conversion price and any other stock-based awards, but excluding any awards for which the exercise or conversion price exceeds the market value of our Class A common shares on the applicable measurement date. For certain historical periods, Class M shares were not included due to issuance restrictions which were contingent upon our IPO. Adjusted operating earnings (loss) per common share, weighted average common shares outstanding – adjusted operating and adjusted book value per common share should not be used as a substitute for basic earnings (loss) per share – Class A common shares, basic weighted average common shares outstanding – Class A or book value per common share. However, we believe the adjustments to the shares and equity are significant to gaining an understanding of our overall results of operations and financial condition.

ADJUSTED DEBT TO CAPITAL RATIO

Adjusted debt to capital ratio is a non-GAAP measure used to evaluate our capital structure excluding the impacts of AOCI and the cumulative change in fair value of funds withheld and modco reinsurance assets, net of DAC, DSI, rider reserve and tax offsets. Adjusted debt to capital ratio is calculated as total debt divided by adjusted AHL shareholders' equity. Adjusted debt to capital ratio should not be used as a substitute for the debt to capital ratio. However, we believe the adjustments to shareholders' equity are significant to gaining an understanding of our capitalization, debt utilization and debt capacity.

RETIREMENT SERVICES NET INVESTMENT SPREAD, INVESTMENT MARGIN ON DEFERRED ANNUITIES, AND OPERATING EXPENSES

Net investment spread is a key measure of the profitability of our Retirement Services segment. Net investment spread measures our investment performance less the total cost of our liabilities. Net investment earned rate is a key measure of our investment performance, while cost of funds is a key measure of the cost of our policyholder benefits and liabilities. Investment margin on our deferred annuities measures our investment performance less the cost of crediting for our deferred annuities, which make up a significant portion of our net reserve liabilities.

- Net investment earned rate is a non-GAAP measure we use to evaluate the performance of our net invested assets that does not correspond to GAAP net investment income. Net investment earned rate is computed as the income from our net invested assets divided by the average net invested assets, excluding the impacts of our investment in Apollo, for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized. The adjustments to net investment income to arrive at our net investment earned rate add (a) alternative investment gains and losses, (b) gains and losses related to trading securities for CLOs, (c) net VIE impacts (revenues, expenses and noncontrolling interest), (d) forward points gains and losses on foreign exchange derivative hedges and (e) the change in fair value of reinsurance assets, and removes the proportionate share of the ACRA net investment income associated with the ACRA noncontrolling interest as well as the gain or loss on our investment in Apollo. We include the income and assets supporting our change in fair value of reinsurance assets by evaluating the underlying investments of the funds withheld at interest receivables and we include the net investment income from those underlying investments which does not correspond to the GAAP presentation of change in fair value of reinsurance assets. We exclude the income and assets supporting business that we have exited through ceded reinsurance including funds withheld agreements. We believe the adjustments for reinsurance provide a net investment earned rate on the assets for which we have economic exposure.
- Cost of funds includes liability costs related to cost of crediting on both deferred annuities and institutional products as well as other liability costs, but does not include the proportionate share of the ACRA cost of funds associated with the noncontrolling interest. Cost of funds is computed as the total liability costs divided by the average net invested assets, excluding our investment in Apollo, for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized.
 - Cost of crediting includes the costs for both deferred annuities and institutional products. Cost of crediting on deferred annuities is the interest credited to the policyholders on our fixed strategies as well as the option costs on the indexed annuity strategies. With respect to FIAs, the cost of providing index credits includes the expenses incurred to fund the annual index credits, and where applicable, minimum guaranteed interest credited. Cost of crediting on institutional products is comprised of (i) pension group annuity costs, including interest credited, benefit payments and other reserve changes, net of premiums received when issued, and (ii) funding agreement costs, including the interest payments and other reserve changes. Cost of crediting is computed as the cost of crediting for deferred annuities and institutional products divided by the average net invested assets, excluding the investment in Apollo, for the relevant periods. Cost of crediting on deferred annuities is computed as the net interest credited on fixed strategies and option costs on indexed annuity strategies divided by the average net account value of our deferred annuities. Cost of crediting on institutional products is computed as the pension group annuity and funding agreement costs divided by the average net institutional reserve liabilities. Our average net invested assets, excluding our investment in Apollo, net account values and net institutional reserve liabilities are averaged over the number of quarters in the relevant period to obtain our associated cost of crediting for such period. To enhance the ability to analyze these measures across periods, interim periods are annualized.
 - Other liability costs include DAC, DSI and VOBA amortization, change in rider reserves, the cost of liabilities on products other than deferred annuities and institutional products, excise taxes, premiums, product charges and other revenues. We believe a measure like other liability costs is useful in analyzing the trends of our core business operations and profitability. While we believe other liability costs is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for total benefits and expenses presented under GAAP.
- Net investment earned rate, cost of funds, net investment spread and investment margin on deferred annuities are non-GAAP measures we use to evaluate the profitability of our business. We believe these metrics are useful in analyzing the trends of our business operations, profitability and pricing discipline. While we believe each of these metrics are meaningful financial metrics and enhance our understanding of the underlying profitability drivers of our business, they should not be used as a substitute for net investment income, interest sensitive contract benefits or total benefits and expenses presented under GAAP.
- Operating expenses excludes integration, restructuring and other non-operating expenses, stock compensation expense, interest expense and policy acquisition expenses. We believe a measure like operating expenses is useful in analyzing the trends of our core business operations and profitability. While we believe operating expenses is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for policy and other operating expenses presented under GAAP.

NET INVESTED ASSETS

In managing our business, we analyze net invested assets, which does not correspond to total investments, including investments in related parties, as disclosed in our consolidated financial statements and notes thereto. Net invested assets represents the investments that directly back our net reserve liabilities as well as surplus assets. Net invested assets, excluding our investment in Apollo, is used in the computation of net investment earned rate, which allows us to analyze the profitability of our investment portfolio. Net invested assets includes (a) total investments on the consolidated balance sheets with AFS securities at cost or amortized cost, excluding derivatives, (b) cash and cash equivalents and restricted cash, (c) investments in related parties, (d) accrued investment income, (e) VIE assets, liabilities and noncontrolling interest adjustments, (f) net investment payables and receivables, (g) policy loans ceded (which offset the direct policy loans in total investments) and (h) an allowance for credit losses. Net invested assets also excludes assets associated with funds withheld liabilities related to business exited through reinsurance agreements and derivative collateral (offsetting the related cash positions). We include the underlying investments supporting our assumed funds withheld and modco agreements in our net invested assets calculation in order to match the assets with the income received. We believe the adjustments for reinsurance provide a view of the assets for which we have economic exposure. Net invested assets includes our proportionate share of ACRA investments, based on our economic ownership, but does not include the proportionate share of investments associated with the noncontrolling interest. Net invested assets also includes our investment in Apollo. Our net invested assets, excluding our investment in Apollo, are averaged over the number of quarters in the relevant period to compute our net investment earned rate for such period. While we believe net invested assets is a meaningful financial metric and enhances our understanding of the underlying drivers of our investment portfolio, it should not be used as a substitute for total investments, including related parties, presented under GAAP.

NET RESERVE LIABILITIES

In managing our business, we also analyze net reserve liabilities, which does not correspond to total liabilities as disclosed in our consolidated financial statements and notes thereto. Net reserve liabilities represent our policyholder liability obligations net of reinsurance and is used to analyze the costs of our liabilities. Net reserve liabilities include (a) the interest sensitive contract liabilities, (b) future policy benefits, (c) dividends payable to policyholders, and (d) other policy claims and benefits, offset by reinsurance recoverable, excluding policy loans ceded. Net reserve liabilities include our proportionate share of ACRA reserve liabilities, based on our economic ownership, but does not include the proportionate share of reserve liabilities associated with the noncontrolling interest. Net reserve liabilities is net of the ceded liabilities to third-party reinsurers as the costs of the liabilities are passed to such reinsurers and, therefore, we have no net economic exposure to such liabilities, assuming our reinsurance counterparties perform under our agreements. The majority of our ceded reinsurance is a result of reinsuring large blocks of life business following acquisitions. For such transactions, GAAP requires the ceded liabilities and related reinsurance recoverables to continue to be recorded in our consolidated financial statements despite the transfer of economic risk to the counterparty in connection with the reinsurance transaction. While we believe net reserve liabilities is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for total liabilities presented under GAAP.

SALES

Sales statistics do not correspond to revenues under GAAP but are used as relevant measures to understand our business performance as it relates to inflows generated during a specific period of time. Our sales statistics include inflows for fixed rate annuities and FIAs and align with the LIMRA definition of all money paid into an individual annuity, including money paid into new contracts with initial purchase occurring in the specified period and existing contracts with initial purchase occurring prior to the specified period (excluding internal transfers). While we believe sales is a meaningful metric and enhances our understanding of our business performance, it should not be used as a substitute for premiums presented under GAAP.

NET ORGANIC GROWTH RATE

Net organic growth rate is calculated as the net organic flows divided by average net invested assets. Net organic flows are comprised of net organic inflows less net outflows. Organic inflows are the deposits generated from our organic channels, which include retail, flow reinsurance and institutional. Net outflows are total liability outflows, including full and partial withdrawals on our deferred annuities, death benefits, pension group annuity benefit payments, payments on payout annuities and maturities of our funding agreements, net of outflows attributable to the ACRA noncontrolling interest. To enhance the ability to analyze these measures across periods, interim periods are annualized. We believe net organic growth rate provides a meaningful financial metric that enables investors to assess our growth from the channels that provide recurring inflows. Management uses net organic growth rate to monitor our business performance and the underlying profitability drivers of our business.
