Retail Distribution Capabilities are Expanding

Highlights

- Continuing to add and deepen relationships with financial institutions, which comprise 76% of Retail inflows over the last twelve months
- Writing more business through banks and broker-dealers elevates Athene's platform, creates more scale potential and diversifies underlying sources of new business origination
- Launched distribution of Fixed Annuities, Fixed Indexed Annuities (FIA) and Registered Index-Linked Annuities (RILA) at Bank of America Merrill Lynch in October
- Deepening existing relationships by adding FIA and RILA products to the shelves at larger financial institutions
- FIA product sold via the IMO channel generally has longer duration and higher surrender charges
 - This channel accounted for 52% of total FIA sales YTD

Enhances Athene's ROE on business retained

Note: Past performance is not a guarantee of future results. 1. Includes ADIP called capital, leverage and reinvested earnings

Capital Allocation Priorities Support Profitable Growth

Athene Allocates Capital to Support its Fortress Balance Sheet, Which Enables Profitable Growth and Capital Return

1. Management, together with Apollo, periodically evaluates Athene's business plan to ensure the amount of the common stock dividend is appropriate given the competing uses for its capital and may adjust this amount depending on the need to fund these competing uses from time to time.

Consistent Investment Management Philosophy

Target higher and sustainable risk-adjusted returns by capturing origination premia to drive consistent yield outperformance

Focus on downside protection given long-dated liability profile and low cost of funding

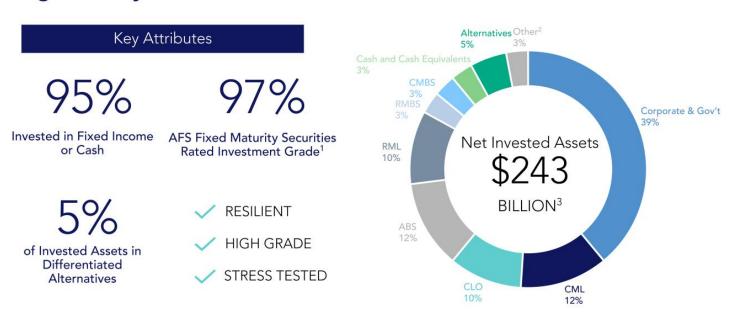

Dynamic asset allocation to take advantage of market dislocations Differentiation driven by proprietary asset origination and greater asset expertise

30-40 bps

Targeted Asset Yield Outperformance vs the Industry Without Incremental Credit Risk

High Quality Asset Portfolio Generates Safe Yield

Note: As of September 30, 2024. Net invested assets includes Athene's proportionate share of ACRA investments, based on Athene's economic ownership, but does not include the proportionate share of investments associated with the noncontrolling interests. 1. As of September 30, 2024 97% of \$183 billion of available-for-sale securities designated NAIC 1 or 2. 2. Includes short-term investments, equity securities, policy loans and other investments. 3. Represents net invested assets as of September 30, 2024. Gross invested assets were \$315 billion as of September 30, 2024, including the ACRA noncontrolling interests.

Alignment with Apollo Provides Access to Alpha-Generating Assets

Asset Sourcing Highlights

- Apollo's proprietary asset origination capabilities allow Athene to access senior-secured, private investment-grade credit, which provides compelling excess spread
- Athene's average yield on total fixed income purchases was ~65 basis points higher, net of fees, than the average yield of the BBB corporate bond index over the last 12 months
- Athene's asset portfolio generates outperformance relative to corporate credit benchmarks while recording lower impairments than the industry average
- ~\$33B of total 3Q'24 LTM deployment activity was comprised of investment grade credit directly originated by Apollo, at attractive spreads of approximately 230 basis points above comparably rated public corporate benchmarks

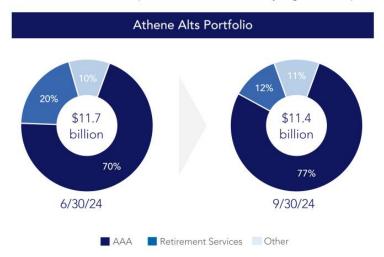

Note: Deployment numbers include the noncontrolling interests in ACRA.

Alternatives Portfolio Repositioning

- Re-positioned and reduced certain retirement services alternative investments by ~\$1B in 3Q'24
- Alternative investment portfolio is now more closely aligned with Apollo Aligned Alternatives ("AAA")

Note: Data as of September 30, 2024 and net of the noncontrolling interests in ACRA. Past performance is not indicative nor a guarantee of future results. 1. Represents pro-forma hypothetical portfolio returns if Athene's alternative portfolio as of September 30, 2024 was the same historically.

Memo: Total Outflow Rates, Incl. Strategic Reinsurance Transactions (Catalina and Venerable Transactions in 4Q'22 and 3Q'23, respectively)	9.0%	8.7%	12.1%	20.0%	11.0%	15.0%	18.4%	10.9%	12.1%	15.0%	10.4%	10.3%	9.8%	12.6%	13.8%	11.8%

Note: Projections in above table represent a best estimate and actual experience may vary. Outflow rate is calculated as outflows attributable to Athene divided by average net invested assets for the respective period, on an annualized assist. Represents outflows from funding agreements, person group unannuties, and multiply-ang quaranter fixed annuties, all of which occur based on defined maturiles or substantially lapse upon reaching their contractual term. Amounts may vary on a quararely basis, based on the time summer summer summer and the products, which have varying degrees of predictability due to policyloider actions, 3. Represents partial annuity withdrawals to meet retirement income needs within contractual annual limits. 4. Represents outflows from policies that no longer have an active surrender charge in force. S. Represents outflows from policies with an active surrender charge in force.

Athene is Committed to Strong Ratings, with an Upward Trajectory

Moody's

'A1' Outlook Stable

"Strengths also include **very good capital levels**, modest financial leverage, and strong interest coverage metrics, as well as **solid profitability** driven by strong asset returns and higher interest margins on spread-based products."

MOODY'S, SEPTEMBER 2024

S&P Global

'A+'

"We view Athene's competitive position as strong, as it has expanded its liability profile and market share over the past few years... In the past couple of years, the company has also expanded into flow reinsurance in Japan, and it has recently executed a small block acquisition there. These expansions reflect the strength of Athene's business model and its competitive advantage in its various spread-lending businesses.."

S&P, JANUARY 2024

FitchRatings

"Athene continues to benefit from its **leading position in its core markets**, including fixed annuities, pension group annuities and institutional spread products. Athene's significant operating scale affords it material competitive advantages against many annuity peers. While the company remains focused on spread-based liabilities, **Fitch Ratings views Athene as having favorable diversification relative to more modest annuity peers**, and an overall risk appetite consistent with the broader annuity sector."

FITCH, SEPTEMBER 2024

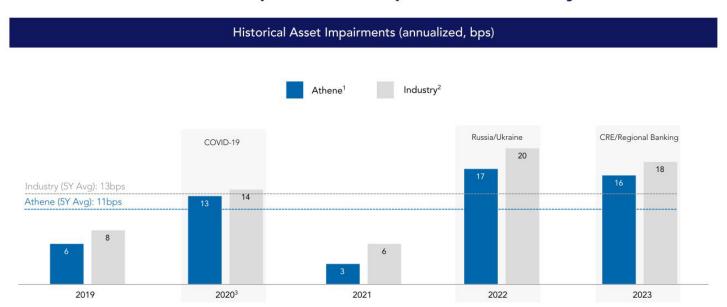

"The rating upgrade to A+ reflects a continuing trend of Athene's improving balance sheet strength. A.M Best views Athene's consolidated risk-adjusted capitalization as strongest... supported by favorable financial flexibility, including significant excess liquidity...Athene's favorable business profile reflects continued enhancements through additional distribution channels in its retail markets."

Note: Ratings represent financial strength ratings for primary insurance subsidiaries. Financial strength ratings are statements of opinions and not statements of facts or recommendations to purchase, hold or sell securities. They do not address the suitability of securities for investment purposes and should not be relied on as investment advice.

Historical Credit Loss Experience Outperforms Industry

1. Athene's statutory fixed income impairments adjusted to include changes in mortgage loan specific reserves in relation to average invested assets of regulated entities in the US and Bermuda. 2. Industry average represents US statutory impairments adjusted to include changes in mortgage loan specific reserves per SNL Financial. Industry average includes AEL, AMP, BHF, CRBG, EQH, FG, LNC, MET, PFG, PRU, VOYA and Transamerica. 3. Athene's impairments were adjusted to exclude an internal securitization where all the underlying commercial mortgage loans are performing.

Risk Management is Embedded in Everything We Do

Managing Risk Such That Athene Can Grow Profitably Across Market Environments

Duration-Matched Portfolio with Quarterly Cash Flow Monitoring & Stress Testing

Robust risk management framework and procedures underpin focus on protecting capital and aligning risks with stakeholder expectations

Risk strategy, investment, credit, asset-liability management ("ALM") and liquidity risk policies, amongst others, at the board and management levels

Stress testing plays a key role in defining risk appetite, with tests performed on both sides of the balance sheet

Non-GAAP Measures & Definitions

Non-GAAP Definition

In addition to our results presented in accordance with accounting principles generally accepted in the United States of America (US GAAP), we present certain financial information that includes non-GAAP measures. Descriptions and the underlying profitability drivers of our business. The majority of these non-GAAP measures, provides information that may enhance an investor's understanding of our results of operations and the underlying profitability drivers of our business. The majority of these non-GAAP measures are intended to remove from the results of operations the impact of market volatility (other than with respect to alternative investments), which consists of inventment gains (losses), net of offsets and non-operating change in insurance liabilities and related derivatives, as well as integration, restructuring, stock compensation and certain other expenses which are not part of our underlying profitability drivers, as such items fluctuate from period to period in a manner inconsistent with these drivers. These measures should be considered supplementary to our results in accordance with US GAAP and should not be viewed as a substitute for the corresponding US GAAP measures.

Spread Related Earnings (SRE)

Spread related earnings is a pre-tax non-GAAP measure used to evaluate our financial performance including the impact of any reinsurance transactions and excluding market volatility and expenses related to integration, restructuring, stock compensation and other expenses. Our spread related earnings equals net income available to AHL common stockholder adjusted to eliminate the impact of the following: (a) investment gains (losses), net of offsets; (b) non-operating change in insurance liabilities and related derivatives; (c) integration, restructuring, and other non-operating expenses; (d) stock compensation expense; and (e) income tax (expense) benefit.

We consider these adjustments to be meaningful adjustments to net income (loss) available to AHL common stockholder. Accordingly, we believe using a measure which excludes the impact of these items is useful in analyzing our business performance and the trends in our results of operations. Together with net income (loss) available to AHL common stockholder, we believe spread related earnings provides a meaningful financial metric that helps investors understand our underlying results and profitability. Spread related earnings should not be used as ubstitute for net income (loss) available to AHL common stockholder.

SRE, Excluding Notable Items

Spread related earnings, excluding notable items represents SRE with an adjustment to exclude notable items. Notable items include unusual variability such as actuarial experience, assumption updates and other insurance adjustments. We use this measure to assess the long-term performance of the business against projected earnings, by excluding items that are expected to be infrequent or not indicative of the ongoing operations of the business. We view this non-GAAP measures as an additional measure that provides insight to management and investors on the historical, period-to-period comparability of our key non-GAAP operating measures.

Cost of Funds

Cost of funds includes liability costs related to cost of crediting on both deferred annuities and institutional products as well as other liability costs, but does not include the proportionate share of the ACRA cost of funds associated with the noncontrolling interests. Cost of crediting on deferred annuities is the interest credited to the policyholders on our fixed strategies as well as the option costs on the indexed annuity strategies. With respect to FIAs, the cost of providing index credits includes the expenses incurred to fund the annual index credits, and where applicable, minimum guaranteed interest credited. Cost of crediting on institutional products is comprised of (1) pension group annuity costs, including interest credited, benefit payments and other reserve changes, net of premiums received when issued, and (2) funding agreement costs, including the interest payments and other reserve changes. Additionally, cost of crediting includes forward points gains and losses on foreign exchange derivative hedges. Other liability costs include DAC, DSI and VOBA amortization, certain market risk benefit costs, the cost of liabilities on products other than deferred annuities and institutional products, premiums and certain product charges and other revenues. We include the costs related to business and ded through assumed reinsurance transactions and exclude the costs on business related to ceded reinsurance transactions. Cost of funds is computed as the total liability costs divided by the average net invested assets for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized. We believe a measure like cost of funds is useful in analyzing the trends of our core business operations, profitability and pricing discipline. While we believe cost of funds is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for total benefits and expenses present

Other Operating Expenses

Other operating expenses excludes interest expense, policy acquisition expenses, net of deferrals, integration, restructuring and other non-operating expenses, stock compensation and long-term incentive plan expenses and the proportionate share of the ACRA operating expenses associated with the noncontrolling interests. We believe a measure like other operating expenses is useful in analyzing the trends of our core business operations and profitability. While we believe other operating expenses is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for policy and other operating expenses presented under US GAAP.

Non-GAAP Measures & Definitions

Adjusted Senior Debt-to-Capital Ratio

Adjusted senior debt-to-capital ratio is a non-GAAP measure used to evaluate our capital structure excluding the impacts of AOCI and the cumulative changes in fair value of funds withheld and modoc reinsurance assets as well as mortgage loan assets, net of tax. Adjusted senior debt-to-capital ratio is calculated as senior debt at notional value divided by adjusted capitalization. Adjusted capitalization includes our adjusted AHL common stockholder's equity, preferred stock and the notional value of our total debt. Adjusted AHL common stockholder's equity excluding AOCI, the cumulative changes in fair value of funds withheld and modoc reinsurance assets and mortgage loan assets as well as preferred stock. These adjustments fluctuate period to period in a manner inconsistent with our underlying profitability drivers as the majority of such fluctuation is related to the market volatility of the unrealized gains and losses associated with our AFS securities, reinsurance assets and mortgage loans. Except with respect to reinvestment activity relating to acquired blocks of businesses, we typically buy and hold investments to maturity throughout the duration of market fluctuations, therefore, the period-over-period impacts in unrealized gains and losses are not necessarily indicative of current operating fundamentals or future performance. Adjusted senior debt-to-capital ratio should not be used as a substitute for the debt-to-capital ratio. However, we believe the adjustments to stockholders' equity and debt are significant to gaining an understanding of our capitalization, debt utilization and debt capacity.

Net Invested Assets

In managing our business, we analyze net invested assets, which does not correspond to total investments, including investments in related parties, as disclosed in our condensed consolidated financial statements and notes thereto. Net invested assets represent the investments that directly back our net reserve liabilities as well as surplus assets. Net invested assets is used in the computation of net investment are are directly back our net reserve liabilities as well as surplus assets. Net invested assets is used in the computation of net investment are not range loans at cost or amortized costs, exhibiting derivatives, (b) cash and cash equivalents and restricted cash, (c) investments in related parties, (d) accrued investment income, (e) VIE assets, liabilities and noncontrolling interest adjustments, (f) net investment payables and receivables, (g) policy loans ceded (which offset the direct policy loans in total investments) and (h) an adjustment for the allowance for credit losses. Net invested assets exclude the derivative collateral offsetting the related cash positions. We include the underlying investments supporting our assumed funds withheld and modco agreements and exclude the underlying investments related to ceded reinsurance transactions in our net invested assets calculation in order to match the assets with the income received. We believe the adjustments for reinsurance provide a view of the assets for which we have economic exposure. Net invested assets include our proportionate share of ACRA investments, based on our economic ownership, but do not include the proportionate share of investments associated with the noncontrolling interests. Our net invested assets are averaged over the number of quarters in the relevant period to compute our net investments are drafted for such period. While we believe net invested assets is a meaningful financial metric and enhances our understanding of the underlying drivers of our investment portfolio, it should not be used as a substitute for total invest

Net Reserve Liabilities

In managing our business, we also analyze net reserve liabilities, which does not correspond to total liabilities as disclosed in our condensed consolidated financial statements and notes thereto. Net reserve liabilities represent our policyholder liability obligations net of reinsurance and are used to analyze the costs of our liabilities. Net reserve liabilities include (a) interest sensitive contract liabilities, (b) future policy benefits, (c) net market risk benefits, (d) long-term repurchase obligations, (e) dividends payable to policyholders and (f) other policy claims and benefits, offset by reinsurance recoverable, excluding policy loans ceded. Net reserve liabilities include our proportionate share of ACRA reserve liabilities, based on our economic ownership, but do not include the proportionate share of reserve liabilities associated with the noncontrolling interests. Net reserve liabilities are net of the ceded liabilities to third-party reinsurers as the costs of the liabilities are passed to such reinsurers and, therefore, we have no net economic exposure to such liabilities, assuming our reinsurance counterparties perform under our agreements. For such transactions, US GAAP requires the ceded liabilities and related reinsurance recoverables to continue to be recorded in our consolidated financial statements despite the transfer of economic risk to the counterparty in connection with the reinsurance transaction. We include the underlying liabilities assumed through modoc reinsurance agreements in our net reserve liabilities calculation in order to match the liabilities with the expenses incurred. While we believe net reserve liabilities is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for total liabilities presented under US GAAP.

Sales

Sales statistics do not correspond to revenues under US GAAP but are used as relevant measures to understand our business performance as it relates to inflows generated during a specific period of time. Our sales statistics include inflows for fixed rate annuities and FIAs and align with the LIMRA definition of all money paid into an individual annuity, including money paid into new contracts with initial purchase occurring in the specified period and existing contracts with initial purchase occurring prior to the specified period (excluding internal transfers). We believe sales is a meaningful metric that enhances our understanding of our business performance and is not the same as premiums presented in our condensed consolidated statements of income.

Non-GAAP Measures & Definitions

Assets Under Management

Assets Under Management, or AUM, refers to the assets of the funds, partnerships and accounts to which Apollo provides investment management, advisory, or certain other investment-related services, including, without limitation, capital that such funds, partnerships and accounts have the right to call from investors pursuant to capital commitments. AUM equals the sum of:

- the net asset value, plus used or available leverage and/or capital commitments, or gross assets plus capital commitments, of the credit and certain equity funds, partnerships and accounts for which Apollo provides investment
 management or advisory services, other than certain collateralized loan obligations, collateralized debt obligations, and certain perpetual capital vehicles, which have a fee-generating basis other than the mark-to-market value of
 the underlying assets; for certain perpetual capital vehicles in credit, sross assets value plus available financing capacity:
- 2. the fair value of the investments of equity and certain credit funds, partnerships and accounts Apollo manages or advises, plus the capital that such funds, partnerships and accounts are entitled to call from investors pursuant to capital commitments, plus portfolio level financings;
- 3. the gross asset value associated with the reinsurance investments of the portfolio company assets Apollo manages or advises; and
- 4. the fair value of any other assets that Apollo manages or advises for the funds, partnerships and accounts to which Apollo provides investment management, advisory, or certain other investment-related services, plus unused credit facilities, including capital commitments to such funds, partnerships and accounts for investments that may require pre-qualification or other conditions before investment plus any other capital commitments to such funds, partnerships and accounts available for investment that are not otherwise included in the clauses above.

Apollo's AUM measure includes Assets Under Management for which Apollo charges either nominal or zero fees. Apollo's AUM measure also includes assets for which Apollo does not have investment discretion, including certain assets for which Apollo earns only investment-related service fees, rather than management or advisory fees. Apollo's definition of AUM is not based on any definition of Assets Under Management contained in its governing documents or in any Apollo Fund management agreements. Apollo considers multiple factors for determining what should be included in its definition of AUM. Such factors include but are not limited to (1) Apollo's ability to influence the investment decisions for existing and available assets; (2) Apollo's ability to generate income from the underlying assets in its funds; and (3) the AUM measures that Apollo uses internally or believes are used by other investment managers. Given the differences in the investment strategies and structures among other alternative investment managers, Apollo's calculation of AUM may differ from the calculations employed by other investment managers and, as a result, this measure may not be directly comparable to similar measures presented by other investment managers. Apollo's calculation also differs from the manner in which its affiliates registered with the SEC report "Regulatory Assets Under Management" on Form ADV and Form PF in various ways.

Apollo uses AUM, Gross capital deployed and Dry powder as performance measurements of its investment activities, as well as to monitor fund size in relation to professional resource and infrastructure needs.
