UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 8-K

CURRENT REPORT

PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Date of report (Date of earliest event reported): May 7, 2025

MATHENE

ATHENE HOLDING LTD.

(Exact name of registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization) 001-37963 (Commission file number) **98-0630022** (I.R.S. Employer Identification Number)

7700 Mills Civic Pkwy West Des Moines, Iowa 50266 1-(515) 342-4678

(Address, including zip code, and telephone number, including area code, of registrant's principal executive offices)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

□ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

□ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

□ Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

□ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbols	Name of each exchange on which registered
Depositary Shares, each representing a 1/1,000 th interest in a 6.35% Fixed-to-Floating Rate Perpetual Non-Cumulative Preferred Stock, Series A	ATHPrA	New York Stock Exchange
Depositary Shares, each representing a 1/1,000 th interest in a 5.625% Fixed Rate Perpetual Non-Cumulative Preferred Stock, Series B	ATHPrB	New York Stock Exchange
Depositary Shares, each representing a 1/1,000 th interest in a 6.375% Fixed-Rate Reset Perpetual Non-Cumulative Preferred Stock, Series C	ATHPrC	New York Stock Exchange
Depositary Shares, each representing a 1/1,000 th interest in a 4.875% Fixed-Rate Perpetual Non-Cumulative Preferred Stock, Series D	ATHPrD	New York Stock Exchange
Depositary Shares, each representing a 1/1,000 th interest in a 7.75% Fixed-Rate Reset Perpetual Non-Cumulative Preferred Stock, Series E	ATHPrE	New York Stock Exchange
7.250% Fixed-Rate Reset Junior Subordinated Debentures due 2064	ATHS	New York Stock Exchange

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company \Box

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Item 2.02 Results of Operations and Financial Condition.

On May 7, 2025, Athene Holding Ltd. (the "Company") made available on its website the Company's financial supplement for the first quarter ended March 31, 2025, furnished as Exhibit 99.1 hereto and incorporated by reference in this Item 2.02.

The foregoing information, including the Exhibit referenced, is being furnished pursuant to this Item 2.02 and shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or otherwise subject to the liabilities of that Section, nor shall it be deemed incorporated by reference in any filing or other document pursuant to the Securities Act of 1933, as amended, or the Exchange Act, regardless of any general incorporation language in such filing or document, except as shall be expressly set forth by specific reference in such a filing or document.

Item 9.01	Financial Statements and Exhibits.
(d)	Exhibits
99.1	Quarterly Financial Supplement for Athene Holding Ltd. for the first quarter 2025 (furnished and not filed).
104	Cover Page Interactive Data File (embedded within the Inline XBRL document).

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized. ATHENE HOLDING LTD.

/s/ Louis-Jacques Tanguy

Louis-Jacques Tanguy Executive Vice President and Chief Financial Officer

Important Notice

The information included in this financial supplement is unaudited and intended for informational purposes only.

Athene Holding Ltd. (AHL) is a subsidiary of Apollo Global Management, Inc. The financial statements and exhibits included in this financial supplement should be read in conjunction with AHL's reports and other filings with the US Securities and Exchange Commission, including its reports on Form 10-K, Form 10-Q and Form 8-K. This financial supplement does not constitute an offer to sell, or the solicitation of an offer to buy, any security of AHL, and nothing in this financial supplement shall in any way be relied on in connection with investment decisions. Each recipient of the information contained in this financial supplement is responsible for making its own independent assessment of the business, financial condition, prospects, status and affairs of AHL.

AHL undertakes no obligation to update or correct the information in this financial supplement. AHL makes no representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of any of the information contained in this financial supplement. AHL does not accept any liability whatsoever for any direct, indirect or consequential losses (in contract, tort or otherwise) arising from the use of this financial supplement or its contents or any reliance on the information contained herein.

This financial supplement includes certain non-GAAP measures, including net investment earnings, cost of funds, other operating expenses, spread related earnings, net investment spread, adjusted AHL common stockholder's equity, adjusted leverage ratio, net invested assets, net reserve liabilities, spread related earnings - excluding notable items, net investment spread - excluding notable items. Management believes the use of these non-GAAP measures (which are defined and discussed in greater detail and reconciled elsewhere in this financial supplement), together with the relevant GAAP measures, provides information that may enhance an investor's understanding of AHL's results of operations and the underlying profitability drivers of AHL's hese measures should be considered supplementary to AHL's results in accordance with US GAAP and should not be viewed as a substitute for the corresponding US GAAP measures.

Beginning on January 1, 2025, domestic insurance companies were required to adopt new statutory accounting guidance for the principles-based bond definition. Under the new guidance, certain debt securities, which were formerly treated as a bond, will now be accounted for as a non-bond debt security. These non-bond debt securities are required to be filed with and designated by the National Association of Insurance Commissioners (NAIC). Certain of our non-bond debt securities have not received a designation and are accordingly presented as "Non-designated" within the NAIC rating tables in this financial supplement.

Note: "NM" represents changes that are not meaningful. Please refer to the Notes to the Financial Supplement section for discussion on non-GAAP metrics and the Non-GAAP Measure Reconciliations section for reconciliations of non-GAAP metrics. 1. Notable items include unusual variability such as actuarial experience, assumption updates and other insurance adjustments. 2. Refers to the amount that as-reported alternative net investment income is below (above) management's long-term expectation of an 11% average annual return. Management's long-term expectations is based on historical experience and provides investors with supplemental information for period-to-period comparability as well as a basis for developing expectations of future performance. There is no assurance that management's expected long-term expectations of future performance. There is no assurance that management's expected long-term average annual return will be achieved. Actual results may differ materially.

1. Securities denoted as non-rated by the NRSRO were classified as investment or non-investment grade according to the security's respective NAIC designation. With respect to modeled loan backed and structured securities (LBaSS), the NAIC designation methodology differs in significant respects from the NRSRO ratings methodology. The NRSRO ratings methodology is focused on the likelihood of recovery of all contractual payments, including principal at par regardless of entry price, while the NAIC designation methodology as the most appropriate way to view our AFS portfolio when evaluating credit risk since a portion of our holdings were purchased at a significant discount to par.

Notes to the Financial Supplement

KEY OPERATING AND NON-GAAP MEASURES

In addition to our results presented in accordance with US GAAP, we present certain financial information that includes non-GAAP measures. Management believes the use of these non-GAAP measures, together with the relevant US GAAP measures, provides information that may enhance an investor's understanding of our results of operations and the underlying profitability drivers of our business. The majority of these non-GAAP measures are intended to remove from the results of operations the impact of market volatility (other than with respect to alternative investments), which consists of investment gains (losses), net of offsets, and non-operating change in insurance liabilities and related derivatives, both defined below, as well as integration, restructuring, stock compensation and certain other expenses which are not part of our underlying profitability drivers, as such items fluctuate from period to period in a maner inconsistent with these drivers. These measures should be considered supplementary to our results in accordance with US GAAP and should not be viewed as a substitute for the corresponding US GAAP measures.

SPREAD RELATED EARNINGS AND NET SPREAD

Spread related earnings is a pre-tax non-GAAP measure used to evaluate our financial performance including the impact of any reinsurance transactions and excluding market volatility and expenses related to integration, restructuring, stock compensation and other expenses. Our spread related earnings equals net income available to AHL common stockholder adjusted to eliminate the impact of the following:

- Investment Gains (Losses), Net of Offsets—Consists of the realized gains and losses on the sale of AFS securities and mortgage loans, the change in fair value of reinsurance assets, unrealized gains and losses, changes in the provision for credit losses and other investment gains and losses. Unrealized, allowances and other investment gains and losses are comprised of the fair value adjustments of trading securities and mortgage loans, investments held under the fair value option, derivative gains and losses not hedging FIA index credits, all foreign exchange impacts and the change in provision for credit losses recognized in operations net of the change in AmerUs Closed Block fair value reserve related to the corresponding change in fair value of investments. Investment gains and losses are net of offsets related to the market value adjustments (MVA) associated with surrenders or terminations of contracts.
- Non-operating Change in Insurance Liabilities and Related Derivatives
 - Change in Fair Values of Derivatives and Embedded Derivatives FIAs—Consists of impacts related to the fair value accounting for derivatives hedging the FIA index credits and the related embedded derivative liability fluctuations from period to period. The index reserve is measured at fair value for the current period and all periods beyond the current policyholder index term. However, the FIA hedging derivatives are purchased to hedge only the current index period. Upon policyholder renewal at the end of the period, new FIA hedging derivatives are purchased to align with the new term. The difference in duration between the FIA hedging derivatives and the index credit reserves creates a timing difference of the FIA hedging derivatives and index credit reserves is included as a non-operating adjustment. We primarily hedge with options that align with the index terms of our FIA products (typically 1–2 years). On an economic basis, we believe this is suitable because policyholder accounts are credited with index performance at the end of each index term. However, because the term of an embedded derivative in an FIA contract is longer-dated, there is a duration mismatch which may lead to mismatches for accounting purposes.
 - Non-operating Change in Funding Agreements—Consists of timing differences caused by changes to interest rates on variable funding agreements and funding agreement backed notes and the associated reserve accretion patterns of those contracts. Further included are adjustments for gains associated with our early repurchases of funding agreements.
 - Change in Fair Value of Market Risk Benefits—Consists primarily of volatility in capital market inputs used in the measurement at fair value of our market risk benefits, including certain impacts from changes in interest rates, equity returns and implied equity volatilities.
 - Non-operating Change in Liability for Future Policy Benefits—Consists of the non-economic loss incurred at issuance for certain pension group annuities and other payout
 annuities with life contingencies when valuation interest rates prescribed by US GAAP are lower than the net investment earned rates, adjusted for profit, assumed in pricing. For
 such contracts with non-economic US GAAP losses, the SRE reserve accretes interest using an imputed discount rate that produces zero gain or loss at issuance.
- Integration, Restructuring, and Other Non-operating Expenses—Consists of restructuring and integration expenses related to acquisitions and block reinsurance costs as well as certain other expenses, which are not predictable or related to our underlying profitability drivers.
- Stock Compensation Expense—Consists of stock compensation expenses associated with our share incentive plans, including long-term incentive expenses, which are not related to our underlying profitability drivers and fluctuate from time to time due to the structure of our plans.
- Income Tax Expense (Benefit)—Consists of the income tax effect of all income statement adjustments and is computed by applying the appropriate jurisdiction's tax rate to all adjustments subject to income tax.

We consider these adjustments to be meaningful adjustments to net income available to AHL common stockholder for the reasons discussed in greater detail above. Accordingly, we believe using a measure which excludes the impact of these items is useful in analyzing our business performance and the trends in our results of operations. Together with net income available to AHL common stockholder, we believe spread related earnings provides a meaningful financial metric that helps investors understand our underlying results and profitability. Spread related earnings should not be used as a substitute for net income available to AHL common stockholder.

Net spread is a non-GAAP measure used to evaluate our financial performance and profitability. Net spread is computed using our spread related earnings divided by average net invested assets for the relevant period. To enhance the ability to analyze this measure across periods, interim periods are annualized. While we believe this metric is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for ROA presented under US GAAP.

SRE, EXCLUDING NOTABLE ITEMS AND NET SPREAD, EXCLUDING NOTABLE ITEMS

Spread related earnings, excluding notable items and net spread, excluding notable items represent SRE and net spread with an adjustment to exclude notable items. Notable items include unusual variability such as actuarial experience, assumption updates and other insurance adjustments. We use these measures to assess the long-term performance of the business against projected earnings, by excluding items that are expected to be infrequent or not indicative of the ongoing operations of the business. We view these non-GAAP measures as additional measures that provide insight to management and investors on the historical, period-to-period comparability of our key non-GAAP operating measures.

Notes to the Financial Supplement, continued

NET INVESTMENT SPREAD

Net investment spread is a key measure of profitability used in analyzing the trends of our core business operations. Net investment spread measures our investment performance plus our strategic capital management fees, less our total cost of funds. Net investment earned rate is a key measure of our investment performance while cost of funds is a key measure of the cost of our policyholder benefits and liabilities. Strategic capital management fees consist of management fees received by us for business managed for others.

- Net investment earned rate is a non-GAAP measure we use to evaluate the performance of our net invested assets. Net investment earned rate is computed as the income from our net invested assets divided by the average net invested assets, for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized. The primary adjustments to net investment income to arrive at our net investment earnings are (a) net VIE impacts (revenues, expenses and noncontrolling interests), (b) forward points gains and losses on foreign exchange derivative hedges, (c) amortization of premium/discount on held-for-trading securities, (d) the change in fair value of reinsurance assets, (e) an adjustment to the change in net asset value of our ADIP investments to recognize our proportionate share of spread related earnings based on our ownership in the investment funds and (f) the removal of the proportionate share of the ACRA net investment income associated with the noncontrolling interests. We include the income and assets supporting our change in fair value of reinsurance assets by evaluating the underlying investments of the funds withheld at interest receivables and we include the net investment income from those underlying investments which does not correspond to the US GAAP presentation of change in fair value of reinsurance assets. We exclude the income and assets on business related to ceded reinsurance transactions. We believe the adjustments for reinsurance provide a net investment earned rate on the assets for which we have economic exposure. We believe a measure like net investment earned rate is useful in analyzing the trends of our core business operations, profitability and pricing discipline. While we believe net investment earned rate is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for net investment earned rate is useful in analyzing the trends of our c
- Cost of funds includes liability costs related to cost of crediting on both deferred annuities and institutional products as well as other liability costs, but does not include the proportionate share of the ACRA cost of funds associated with the noncontrolling interests. Cost of crediting on deferred annuities is the interest credited to the policyholders on our fixed strategies as well as the option costs on the indexed annuity strategies. With respect to FIAs, the cost of providing index credits includes the expenses incurred to fund the annual index credits, and where applicable, minimum guaranteed interest credited. Cost of crediting on institutional products is comprised of (1) pension group annuity costs, including interest credited, benefit payments and other reserve changes, net of premiums received when issued, and (2) funding agreement costs, including the interest payments and other reserve changes. Additionally, cost of crediting includes forward points gains and losses on foreign exchange derivative hedges. Other liability costs include DAC, DSI and VOBA amortization, certain market risk benefit costs, the cost of liabilities on products other than deferred annuities and institutional products, premiums and certain product charges and other revenues. We include the costs related to business added through assumed reinsurance transactions and exclude the costs on business related to ceded reinsurance transactions. Cost of funds is computed as the total liability cost divided by the average net invested assets for the relevant period. To enhance the ability to analyze these measures across periods, interim periods are annualized. We believe a measure like cost of funds is useful in analyzing the trends of our core business, it should not be used as a substitute for total benefits and expenses presented under US GAAP.

NET INVESTMENT SPREAD, EXCLUDING NOTABLE ITEMS

Net investment spread, excluding notable items represents net investment spread with an adjustment to exclude notable items. Notable items include unusual variability such as actuarial experience, assumption updates and other insurance adjustments. We use this measure to assess the long-term performance of the business against projected earnings, by excluding items that are expected to be infrequent or not indicative of the ongoing operations of the business. We view this non-GAAP measure as an additional measure that provides insight to management and investors on the historical, period-to-period comparability of our key non-GAAP operating measures.

OTHER OPERATING EXPENSES

Other operating expenses excludes interest expense, policy acquisition expenses, net of deferrals, integration, restructuring and other non-operating expenses, stock compensation and long-term incentive plan expenses and the proportionate share of the ACRA operating expenses associated with the noncontrolling interests. We believe a measure like other operating expenses is useful in analyzing the trends of our core business operations and profitability. While we believe other operating expenses is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for policy and other operating expenses presented under US GAAP.

ADJUSTED LEVERAGE RATIO

Adjusted leverage ratio is a non-GAAP measure used to evaluate our capital structure excluding the impacts of AOCI and the cumulative changes in fair value of funds withheld and modco reinsurance assets as well as mortgage loan assets, net of tax. Adjusted leverage ratio is calculated as total debt at notional value adjusted to exclude 50% of the notional value of subordinated debt as an equity credit plus 50% of preferred stock divided by adjusted capitalization. Adjusted capitalization includes our adjusted AHL common stockholder's equity, preferred stock and the notional value of our total debt. Adjusted AHL common stockholder's equity is calculated as the ending AHL stockholders' equity excluding AOCI, the cumulative changes in fair value of funds withheld and modco reinsurance assets and mortgage loan assets as well as preferred stock. These adjustments fluctuate period to period in a manner inconsistent with our underlying profitability drivers as the majority of such fluctuation is related to the market volatility of the unrealized gains and losses associated with our AFS securities, reinsurance assets and mortgage loans. Except with respect to reinvestment activity relating to acquired blocks of businesses, we typically buy and hold investments to maturity throughout the duration of market fluctuations, therefore, the period-over-period impacts in unrealized gains and losses are not necessarily indicative of current operating fundamentals or future performance. Adjusted leverage ratio should not be used as a substitute for the leverage ratio. However, we believe the adjustments to stockholders' equity and debt are significant to gaining an understanding of our capitalization, debt and preferred stock utilization and overall leverage capacity, because they provide insight into how rating agencies measure our capitalization, which is a consideration in how we manage our leverage capacity.

Notes to the Financial Supplement, continued

NET INVESTED ASSETS

In managing our business, we analyze net invested assets, which does not correspond to total investments, including investments in related parties, as disclosed in our condensed consolidated financial statements and notes thereto. Net invested assets represent the investments that directly back our net reserve liabilities as well as surplus assets. Net invested assets is used in the computation of net investment earned rate, which allows us to analyze the profitability of our investment portfolio. Net invested assets include (a) total investments on the condensed consolidated balance sheets, with AFS securities, trading securities and mortgage loans at cost or amortized cost, excluding derivatives, (b) cash and cash equivalents and restricted cash, (c) investments in related parties, (d) accrued investment income, (e) VIE and VOE assets, liabilities and noncontrolling interest adjustments, (f) net investment payables and receivables, (g) policy loans ceded (which offset the direct policy loans in total investments) and (h) an adjustment for the allowance for credit losses. Net invested assets exclude the derivative collateral offsetting the related cash positions. We include the underlying investments supporting our assumed funds withheld and modco agreements and exclude the underlying investments related to ceded reinsurance transactions in our net invested assets include our proportionate share of ACRA investments, based on our economic ownership, but do not include the proportionate share of investments associated with the noncontrolling interests. Our net investment earned rate for such period. While we believe net invested assets is a meaningful financial metric and enhances our understanding of the underlying drivers of our investment portfolio, it should not be used as a substitute for total investments, including related parties, presented under US GAAP.

NET RESERVE LIABILITIES

In managing our business, we also analyze net reserve liabilities, which does not correspond to total liabilities as disclosed in our condensed consolidated financial statements and notes thereto. Net reserve liabilities represent our policyholder liability obligations net of reinsurance and are used to analyze the costs of our liabilities. Net reserve liabilities include (a) interest sensitive contract liabilities, (b) future policy benefits, (c) net market risk benefits, (d) long-term repurchase obligations, (e) dividends payable to policyholders and (f) other policy claims and benefits, offset by reinsurance recoverable, excluding policy loans ceded. Net reserve liabilities include our proportionate share of ACRA reserve liabilities, based on our economic ownership, but do not include the proportionate share of reserve liabilities asociated with the noncontrolling interests. Net reserve liabilities are net of the ceded liabilities to third-party reinsurers as the costs of the liabilities are passed to such reinsurers and, therefore, we have no net economic exposure to such liabilities, assuming our reinsurance counterparties perform under our agreements. For such transactions, US GAAP requires the ceded liabilities and related reinsurance recoverables to continue to be recorded in our consolidated financial statements despite the transfer of economic risk to the counterparty in connection with the reinsurance transaction. We include the underlying liabilities assumed through modco reinsurance agreements in our net reserve liabilities calculation in order to match the liabilities with the expenses incurred. While we believe net reserve liabilities is a meaningful financial metric and enhances our understanding of the underlying profitability drivers of our business, it should not be used as a substitute for total liabilities presented under US GAAP.

SALES

Sales statistics do not correspond to revenues under US GAAP but are used as relevant measures to understand our business performance as it relates to inflows generated during a specific period of time. Our sales statistics include inflows for fixed rate annuities and FIAs and align with the LIMRA definition of all money paid into an individual annuity, including money paid into new contracts with initial purchase occurring in the specified period and existing contracts with initial purchase occurring prior to the specified period (excluding internal transfers). We believe sales is a meaningful metric that enhances our understanding of our business performance and is not the same as premiums presented in our condensed consolidated statements of income.
